

Technical specification

Single Conic

The single conic canopy is perfect for creating a feature or a sheltered sitting or meeting area.

Dimensions

Available at 3, 4, 5 and 6 metered squared. Standard eave height is 2.4 metres. Large single conic structure is available up to 15m.

Frame

The steel frame can have a low maintenance hot dip galvanised finish or a polyester powder coated finish. Available in a range of colours. This canopy has base plates resin bolted to foundations. All frames are guaranteed for 25 years.

Foundations

Typical foundation size:
1250mm x 1250mm x 900mm C35. Set 300mm below.
Dependent on ground conditions and location.

Cladding

The structure is clad in a pvc tensile fabric. Comes in three grades: 502, 702 and 1002 used depending on size. All are guaranteed for 10 years.

Optional extras

Fordingbridge can supply and install padded covers for canopy posts, available in a range of colours to cover various post widths and heights.

Tensile Fabric

A cost-effective fabric for creating large covered spaces
