

Tapered trellis design, perfect for covering large spans cost effectively

16mm polycarbonate roofing solution for longevity. Fabric roof covering also available

25 year structural guarantee

Fordingbridge manufactures all steel work in its very own workshop on the site of our head office in Arundel.

The CE (Conformity European) mark is a mandatory European mark for specific products, including structural steel products, according to the 93/68/EEC marking directive. It is a symbol to show compliance with European legislation. Before a product is marked, the manufacturers have to satisfy the conformity assessment procedures according to the Construction Products Directive (CPD).

Steel sizes and availability

Stanchions are available in circular hollow section (CHS) posts and square hollow section (SHS) posts. Our tapered trellis design for steelworks can span up to 19m and our box hoop design can span up to 7m.
