

When to choose award-winning Altro XpressLay™ flooring

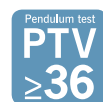

- If downtime is an issue, for example in a busy hospital or school. Tests prove installing Altro XpressLay can halve your installation time
- If adhesive odours could be a problem for staff, students or patients
- If the subfloor is damp; Altro XpressLay can be applied at up to 97% relative humidity
- If sustainability is a factor when planning and carrying out installations
- If you need to have easy access to the subfloor and the flooring itself, for example where underfloor heating and essential services are installed
- If you want to be able to remove the flooring easily post-installation

Love Altro Walkway™? Try Altro XpressLay™!

It's what's underneath that counts

Altro adhesive-free flooring

Altro adhesive-free flooring gives a quick fit without compromising on safety or durability. Its unique formulation allows the floor to lie flat and perform like a traditional adhered safety floor **without the need for an adhesive**. With Altro Looselay double-sided, moisture tolerant tape, the floor edges and joints are secured in place while being installed, coved and welded. With no adhesive, there is **no drying time and no resulting odours**.

Allowing the subfloor to breathe, installations can be quicker and easier as no damp-proof membrane (DPM) is required. You can **halve installation time** compared with a traditional installation.

Altro adhesive-free flooring has the **same guarantees** and performance you would expect from an Altro safety floor but with additional benefits. It can be installed over existing flooring or on fresh concrete. The floor can be removed easily, reused and is **100% recyclable** at the end of its life. Genius!

 **Did you know?**

Altro XpressLay has a life expectancy of 15 years and a 10 year guarantee

Lesley Meaker
Salisbury Hospital's ArtCare
design team

“We chose Altro XpressLay because it was so quick to install, just a few hours, and this meant we **didn't have to close the other ward** while the corridor was out of action.”

Smell and sound-free

No adhesive means there are no odours, which is perfect in many environments where there are lots of people living and working, and shutting down shop or installing noisy extractor fans are not an option. Customer feedback tells us this has been a distinct advantage as adhesive odours often cause disruption and complaints.

Overlay without uplift

You can install Altro adhesive-free flooring over existing sound and secure surfaces such as tiles and even flaky paint, minimising building waste and saving you time and hassle.

Call time on downtime

With Altro XpressLay, no DPM and no adhesive are required, your installation can be up and ready in half the time of a traditional adhered safety floor, letting you get back to business with minimal interruption.

Weld, walk and start again

With no adhesive, you don't have to wait for it to 'cure'. Just lay, weld and walk on the same day. No adhesives means no tacky areas and trafficking glue through a building. You can plan builds in stages without being held up by drying times. And when the flooring has come to the end of its long and useful life, taking it up and replacing it could not be easier; you have no cost and time-consuming "making good" of the subfloor to worry about.

Did you know?

Over 100,000m² of Altro XpressLay is being laid in the Princess Alexandra Hospital in Brisbane, Australia

Salisbury Hospital Dementia Unit

Fresh slab? No problem!

You can apply Altro XpressLay to a damp subfloor or a new concrete floor at up to 97% relative humidity, allowing you to install flooring quickly and easily without having to wait for the substrate to dry.

Matt Bundell, Managing Director,
Admiral Flooring

“Altro XpressLay is so easy to install. There is no uplifting of the base flooring or vinyl, no adhesives, no dust, no stoppage or disruption. It would have taken us at least six weeks to lay a conventional vinyl flooring. And if any sections need to be replaced in the future they can be easily cut out and a new one dropped in.”

Access all areas

As Altro XpressLay isn't stuck down it means you can easily lift up the flooring to access the subfloor - particularly handy if there is localised flooding or issues with the substrate. Also any damage to the flooring itself can be quickly rectified. Just cut the flooring that needs replacing, patch the damage, lay the new flooring and weld. Business can go on as usual. It's that simple!

Richard Roberts, Managing Director,
Roberts Flooring

“Altro XpressLay not only offered a fast track solution, that could easily be removed, without damaging the raised access floor, but it also had the advantage of being recyclable at the end of its life.”

Remove, reuse, recycle

Altro XpressLay flooring is 100% recyclable post-consumer and can be re-used in other installations. Waste is minimal as only one product used. Any leftover Altro XpressLay flooring can be used elsewhere, returned to us, or a Recofloor collection point, for recycling. At the end of its life, it can be removed quickly and reused or recycled; there's no flooring covered with adhesive and bits of substrate to deal with.

Built to last

Altro XpressLay flooring holds as effectively as an Altro safety floor installed using adhesive; no rucks, no movement. It achieves optimum installation results and conformity to our 10 year guarantee. We tested Altro XpressLay using a 900kg drilling rig with caterpillar tracks; the flooring did not move (so a patient on a trolley will be no problem at all!).

i Did you know?

Altro XpressLay can be installed with underfloor heating on because there is no adhesive to damage
