

# Air Admittance Valves

- Removes the need to penetrate the outer roof shell
- Prevents the loss of water from traps and seals
- Saves on cost of additional pipes and fittings
- Labour cost savings
- Environmentally friendly – no foul gases emitted

Manufactured by  

Air Admittance Valves (AAV's) allow air to freely enter the sanitary pipe work system and prevents the escape of foul gases into the building. They are suitable for 32-110mm waste and soil pipes.

The AAV32-63 AAV provides a universal connector for 32mm, 40mm 50mm and 63mm waste pipes, and the AAV70-110 32mm is an ideal air admittance valve for 70mm, 75m, 90mm and 110mm soil pipe systems.

When installed into sanitary pipe work systems, air admittance valves will prevent the loss of water from trap seals due to induced siphonage.

Each product is manufactured from high gloss white plastic that provides a modern, clean aesthetic look. Every product is individually tested and numbered prior to dispatch thereby ensuring that the end user can install the product with added assurance and confidence.

Old Product Code	New Product Code	Description	Colour	Standards
AAV50	AAV32-63	Air Admittance Valve White Push Fit 32/40/50/63mm	White	PN-EN 12380:2005
