

CA8 Coded Access

CA8 - Coded Access

- Back lit metal keypad
- 32 Codes
- Two 6 AMP output relays
- 1-8 digit codes
- Master code secure programming
- Stand alone or integrated

The CA8 coded access system gives an extra dimension to an Entryphone® system providing additional features that enhance convenience and security.

While visitors can be admitted in the usual way using the Entryphone® system, a problem arises when authorised personnel need to gain access. The usual method to allow entry for an authorised person is to issue them with a key; however, this can cause problems if a key is lost or stolen or the individual is no longer authorised. Changing the lock and re-issuing keys can be expensive and inconvenient.

The coded access system solves these problems. By entering the correct 1-8 digit code, authorised personnel can gain access. No keys are necessary and the code numbers and the release time can be changed quickly and easily by the use of the master code.

Available in brushed, mirror polished stainless steel or brass effect polished stainless.

Integrated unit

As well as our standard coded access units all our entrance panels can be ordered with the CA8 module wffited as an integrated unit. We will submit a drawing detailing the layout for approval before manufacturing the panel.
