

wedi Overview

From individual products to complete systems

The wedi principle of customised design

The modular wedi system allows unlimited possibilities in bathroom and wet room design. Whether it's a new build or a renovation project, thanks to the perfectly coordinated wedi products – from simple building boards through numerous shower and bath elements to the various complete system solutions – and appropriate sealing and installation accessories, the design of any wet room or bathroom can easily be tailored to individual requirements.

New build initial situation

Renovation initial situation

Complete solution with wedi

Point shower systems

From the flush-to-floor shower element through matching drains incl. covers to ready-to-use surface finishes, all wedi system components can be combined with one another.

Fundo Top® Slim-Kit

The Fundo Top Slim-Kit combines a high-quality Fundo Top ready-to-use mineral surface with a tried and tested Fundo shower element. This unique combination offers a high degree of flexibility during installation – it can be easily cut to required dimensions and can be installed either on top of or flush with the existing substrate including suspended timber floors. Skirting strips for cladding of the visible edges on step-up shower installations plus accessories for sealing and adhesion are also included in the kit to simplify the installation process.

wedi Shower-Kit

The wedi Shower-Kit is a complete set with perfectly coordinated system components for creating 100 % water-tight flush-to-floor corner showers. Handily packaged in just a single box, it contains a wedi shower element with horizontal drainage, wedi building boards for a watertight wall solution and appropriate sealing and installation accessories.

Fundo Integro®

The Fundo Integro is the newest flush-to-floor shower element with integrated drain technology from wedi, featuring a 50 mm water trap height, a drain capacity of 0.8 litres per second, at least 1.5 % even pre-formed gradient and 100 % waterproof material. This complete shower system not only fulfils all relevant standards but offers an overall installation height of just 90 mm! The Fundo Integro is simply the perfect solution for all renovation projects, as well as a reliable and time-saving alternative for every installation.

Maximum reliability thanks to integrated drain technology

Complies with all current standards and guidelines

Fundo Plano®

The Fundo Plano offers an incredible total installation height of just 65 mm, a precisely defined slope and 40 mm water trap height. It is available in various sizes, with central or offset point drainage and either long or short side pipe-connection. Like all the other Fundo elements it guarantees a 100 % watertightness and allows for a straightforward and time-saving installation

Fundo Primo®

For classic point drainage in the shower, wedi offers Fundo Primo floor elements in a huge range of sizes and with 3 different drain locations: central, corner or offset. Whether square or rectangular, positioned in the centre or the corner of the room, they offer an ideal solution for any space.

Fundo Ligno®

The Fundo Ligno shower element with outer edges of just 20 mm has been specially developed for use in existing and new builds with wooden floors. In contrast to traditional shower elements, the wedi Fundo Ligno is adapted to the covering wood layer and as a result can be integrated into it wonderfully without cutting into floor joists or building up further height.

Fundo Borgo®, Trollo® und Nautilo®

Wet rooms offer a visual highlight with high functionality – Fundo designer shower elements, Borgo, Trollo and Nautilo unite creative linear guidance with natural shapes and can also be combined with matching wall elements allowing them to be placed even in the middle of the room! The shower is turned into a feature and becomes the absolute highlight of the bathroom.

wedi Fundo® substructure set

Flush-to-floor shower elements in the wedi Fundo range can be brought to the right height using the new wedi Fundo substructure set. Each set contains: two substructure elements with heights of 30 and 60 mm – to allow substructure heights of 30, 60 and 90 mm to be created easily and reliably – and three pre-formed drain mount rings to suit Fundo point and channel drains. What's more exterior dimensions, drain and pipe position can be individually adjusted on site.

Quick and easy
to adjust on site

wedi Fundo® point drain

Point drainage – thanks to the low construction height the Fundo point drains are perfect for both new build and renovation projects. There is a variety of different versions for vertical and horizontal designs, but with all of them, a square or round standard stainless steel grate is included in the scope of delivery.

wedi Fundo® drain covers

Whether round or square in shape, as a standard version or in solid stainless steel – the wedi drain covers are the perfect solution for all tile shapes and colours and are always supplied with the appropriate frame, in stainless steel or plastic according to type. The new tileable wedi Fundo drain cover with blackened channel is an optical highlight here.

Fundo drain cover 1.1

Fundo drain cover 2.1

Fundo drain cover 3.2

Fundo drain cover 4.2

Fundo drain cover 5.1

Fundo drain cover 7.1

Linear shower systems

Everything for the shower area with stylish linear drainage, optionally with the drainage channel close to the wall, at a distance from the wall or centrally positioned. In addition to the shower element, wedi offers matching drains and a wide variety of height-adjustable channel covers with standard, exclusive or tileable design.

Fundo Plano® Linea

Featuring modern linear drainage, the Fundo Plano Linea offers a total installation height of just 70 mm, a precisely defined slope and 40 mm water trap height. Its linear drainage is positioned very close to the wall and is available in various sizes with either a short or long channel.

Extremely flat: _____
a total installation
height of just 70 mm

Fundo Riolito® neo

The Fundo Riolito neo features a linear drainage channel right next to the wall in various lengths from 300 mm to 1100 mm. Its corresponding channel covers are equipped with height-adjustable feet to suit different tile sizes (5–25mm) and its drainage swivels through 360 degree offering further flexibility when connecting to existing pipework.

Fundo Riolito®

The Fundo Riolito captivates with its simple elegance – featuring a near-to-wall linear drainage channel that is completed by a height-adjustable channel cover in either standard stainless steel, exclusive or tileable design. A pre-formed even slope is already integrated into the shower element during the manufacturing process.

Fundo Riofino®

A different kind of linear drainage – streamlined and centred. Although it does not offer various channel lengths, the Fundo Riofino shower element impresses with its extraordinary design and sophisticated finish. It's available with height-adjustable stainless steel channel covers in standard, exclusive or tileable design.

wedi Fundo® substructure set

Flush-to-floor shower elements in the wedi Fundo range can be brought to the right height using the new wedi Fundo substructure set. Each set contains: two substructure elements with heights of 30 and 60 mm – to allow substructure heights of 30, 60 and 90 mm to be created easily and reliably – and three pre-formed drain mount rings to suit Fundo point and channel drains. What's more exterior dimensions, drain and pipe position can be individually adjusted on site.

wedi Fundo® channel drains

Linear drainage – wedi Fundo channel drains are suited to all wedi shower elements with linear drainage. Both horizontal and vertical formats swivel through 360 degrees to allow flexibility when connecting to existing pipe-work on site. Channel covers must be purchased separately due to variety of sizes and designs.

Fundo Discreto® attachment element

The new upgraded Fundo Discreto is an attachment element that allows the channel to disappear thus creates an optical illusion of the water draining away into the wall. Especially developed for the Fundo Riolito, Riolito neo and Plano Linea shower elements, it features a two-sided channel cover offering a stainless steel and a tileable option. Design possibilities are expanded by new additional formats offering channel lengths of 300 and 1100 mm and thanks to the new technical features, installation is easier than ever.

wedi Tools edge strips

wedi Fundo shower elements were especially developed for flush-to-floor installation, but can also be installed on the floor. Step-up shower enclosures are usually fitted with a door or a glass partition, which can prove challenging, due to the pre-formed gradient of the Fundo shower elements. To provide a solution here, wedi Tools edge strips are developed especially with the Fundo Riolito and Riolito neo in mind to even out side contours in order to make the fitting of rectangular glass partitions and doors straightforward. Thanks to their reinforced upper edge they serve as a stable support and can also be customised to fit Fundo Primo shower elements if needed.

wedi Fundo® channel cover Standard Plus / wedi Fundo® channel frame

An easy-to-install and attractive frame solution which hides open tile edges and optimises the overall look of the wedi Fundo channels – the new wedi channel frame convinces with its simple yet clever design. Made from brushed stainless steel for easy maintenance and sophisticated finish, it offers a seamless height adjustment for tile thicknesses between 6 and 20 mm. This 100 % wedi system component is available in five different sizes either individually to complement all wedi channel cover versions, or in a bundle with a matching wedi standard channel cover.

wedi Fundo® channel covers

High-quality aesthetic wedi channel covers are available in standard, exclusive or tileable designs for wedi floor elements with linear drainage.

wedi Fundo® slope and end profiles for Fundo Riolito® neo, Plano® Linea / wedi Fundo® slope profiles for Fundo Riolito®

Especially designed for the Fundo Riolito, Fundo Riolito neo, and Fundo Plano Linea shower elements, wedi profiles are trimmable and allow for a perfect transition in all directions thus provide a high-quality connection to the adjoining floor/wall tiles. The profiles are available in both right and left versions as well as in different heights.

Design and shape

wedi designer elements in a wide variety of shapes – from benches and corner structures to loungers and neat end solutions – allow for stylish, modern bath and wellness facilities to be created simply and easily, ready for direct tiling. The new wedi Top surfaces offer a seamless alternative to traditional tiling – whether as full wall panels or as finished surface covers for Fundo shower elements – with their classic, contemporary design they impress with their simplicity.

wedi Top Wall

The ready-to-install wedi Top Wall design surfaces offer a unique option of seamless thus attractive and low-maintenance wall cladding. They are made from a high-quality, coloured material with an aesthetically pleasing natural stone look and are available in anthracite black and grey. wedi Top Wall elements are a perfect medium for designing throughout the whole bathroom – they can easily be cut into desired shapes and colours can be arranged to achieve characteristic patterns in a blink of an eye.

Fundo Top®

The new wedi Fundo Top range offers ready-to-use shower floor surfaces in both point and linear design. The one-piece high-quality material is non-slip (R11), warm to the touch and has an antibacterial surface. As a perfect alternative to traditional tiling, it features a pre-formed slope that is perfectly adapted to the gradient of the wedi Fundo Primo, Riolito neo and Plano shower elements and due to its groutless finish it is extremely easy to fit and maintain. In addition to grey and anthracite black colour variants in the natural stone look, a homogeneous white colour variant is also available.

Fundo Top® accessories

To match the ready-to-use Fundo Top surfaces, there are various colour-matched accessories available. The handy Fundo Top cladding/skirting boards are particularly suitable for the cladding of any visible edges e.g. in case of step-up showers thus complete the visually attractive, colour-coordinated look of a shower area. Fundo Top inlays in a set with matching tileable channel covers are available for linear designs.

wedi Sanoasa® benches

The wedi Sanoasa benches offer plenty of space for relaxation and for comfortable personal care. With a straight, bevelled or rounded seat edge and a variety of widths or as a completely free-standing seat, the right variant is available for every taste and purpose.

wedi Sanoasa® corner seat element

The free-floating corner seat element is available in two different sizes and thanks to its triangular, compact shape it is the perfect seating solution for small showers. Installation can be done both on the raw surface as well as later on the finished tiling.

wedi Sanoasa® bench elements

The Sanoasa benches in the Comoda and Bellina ranges are available in so many different designs that they enable the construction of almost any seating combination. Whether it be straight, round or corner structures or neat end solutions, they provide a highlight in bathrooms, leisure or wellness facilities.

wedi Sanoasa® loungers

wedi Sanoasa loungers stand out due to their distinctive and unique shapes. They are available in five different designs, with or without integrated heating and can be tiled or plastered as desired.

wedi Sanbath® washbasins

The stylish Sanbath Cube and Wave washbasins can be tiled to match the design of the bathroom. They already have all of the necessary recesses for fittings and can therefore be installed easily, quickly and safely.

wedi Sanbath® bathtubs

The wedi Sanbath bathtubs in the Cube and Wave ranges stand out with their purist design. They are delivered ready for installation and, directly after positioning and connection, are ready-to be tiled.

wedi Sanbath® shower units

The creative shape of the Sanbath shower units in combination with limitless possibilities in individual tiling allow for unique bathroom designs.

Building systems

The wedi building board forms the basis for the versatile wedi building systems and is available in a variety of designs: in small or large size for floor and wall applications, as a slotted variant for round structures and in the form of functional elements, e.g. for shelf and niche solutions, for the cladding of pipe connections and toilet retaining wall installations. All variants are fully sealed and can be tiled directly. They combine a light weight with high stability, and are part of the certified modular wedi system.

wedi building board

wedi building boards form the basis for all wedi system solutions. They are 100 % waterproof, extremely robust and available in numerous designs. All of them can be cut to the desired size and shape without any loss of function or forfeiture of the guarantee and offer thermal insulation and waterproofing at the same time. Thanks to their versatility they make almost anything possible; from wall/floor cladding, through customised individual items and solutions such as tailor-made washstands or partition walls for example, to the complete floor to ceiling system – a whole bathroom from a single source.

100 % watertight

Installation advantages
save time and money

wedi building board XL and XXL

The large-size wedi building boards are particularly notable due to their extraordinary widths of up to 1.20 m. As a result, they are not only ideal for use as free-standing walls, they also reduce the number of joints thus simplify installation enormously. The XL and XXL formats offer the same benefits as the standard wedi building boards and despite their size due to their low weights they are easy to handle.

wedi building board Construct®

The wedi Construct building board offers countless possibilities in the design of individual shapes. Regardless of whether it is narrow radii or semi-circular solutions, thanks to its factory-cut longitudinal and traverse sections, the Construct building board gives free rein to every idea.

wedi Vapor

The wedi Vapor building board is the perfect medium for constantly humid areas where a vapour barrier is needed for structural reasons, such as steam rooms, internal walls and surrounds of indoor swimming pools or communal shower facilities for example that are commonly found in wellness and leisure sectors.

Ideal for wellness facilities

wedi Mensolo® L / U

The practical Mensolo prefabricated elements in L and U shapes are extremely versatile; whether it be a complete shelving structure, a cleverly integrated storage space in the shower or a simple pipe cladding it can be constructed in a blink of an eye and can be tiled or plastered and painted.

wedi Bathboard®

The prefabricated wedi Bathboard bath cladding with a thickness of 20 mm and can be used for almost every bath format. Thanks to the height-adjustable feet, uneven areas of up to 10 cm can be safely levelled during the installation.

wedi I-Board®

wedi I-Board is a ready-to-use installation board for cladding of wall-hung toilets. Despite its low weight it's extremely robust and has a very high load-bearing capacity thus creates an additional ledge surface in the toilet area. Furthermore, thanks to its width of 1200 mm, it can be easily adapted to practically any requirements.

wedi Sanwell® niches

The wedi Sanwell niches are perfect, aesthetically pleasing storage solutions for bathrooms or showers. They provide an easy-to-maintain storage space for shower accessories or decorative elements without compromising on floor space. The available range of sizes and formats interlock with all other wedi elements.

wedi Sanwell® wall element

The Sanwell wall element with a width of 900 mm or 1200 mm incl. niche is perfect for use as a free-standing wall. Both the size of the wall itself and the size of the integrated niche is customisable to suit and because it is made from waterproof polystyrene rigid foam, it is very easy to handle and fit. Laborious construction and sealing is no longer required.

wedi Moltoromo®

Due to its modular design and selection of various components (round, angled and curved pieces) nearly every customised wall combination can be brought to life using the interlocking components of the wedi Moltoromo system. Assembly is quick and straightforward using tongue and groove joints. Decoration with tile or plaster has barely any limitations.

Fundo design showers

Extravagant wall elements in round or spiral shapes combined with appropriate floor elements are perfect as free-standing showers in spacious rooms. They are optionally available with or without supply channels to suit all requirements.

System accessories

Safety in the system: from special adhesives and medium-bed mortar through mechanical fixings to sealing solutions – wedi accessories are perfectly coordinated with each other thus guarantee a secure, straightforward installation and complete watertightness in the entire system.

wedi 320 tile adhesive

The universal wedi 320 thin-bed mortar based on a hydraulic binding agent is ideal for fixing and laying wedi building boards as well as wall and floor tiles in interior areas. It is waterproof and frost-resistant.

Waterproof and
frost-resistant

wedi 610® adhesive sealant

As a versatile one-component adhesive sealant, wedi 610 is ideal for the simple, secure and waterproof joint connections between wedi components in just one easy step. The combination of wedi building boards and wedi 610 has a general building authority test certificate for highly stressed areas.

Free from solvents,
silicone and PCP

wedi 520 sealant

The flexible and 2-component wedi 520 sealant is suitable for indoor and outdoor applications. It bridges cracks and guarantees the highest degree of safety should any surface cracks subsequently develop. Especially developed for flexible joint sealing of wedi sealing and decoupling membranes and for the sealing of joints in conjunction with wedi Tools sealing tape e.g. where wedi products meet non-wedi surfaces. Suitable for full surface sealing in all wedi sealing systems.

Hydraulic
drying

wedi Tools® reinforcement tape

The optionally self-adhesive wedi Tools reinforcement tape is a special fabric tape that is particularly suitable for fixing or bridging of building board joint edges.

Self-adhesive
version
available

wedi Tools® sealing tape and sealing corners

wedi Tools sealing tape and sealing corners are suitable for the secure sealing of intersections such as corners, pipe connections and butt joints. They are made from TPE coated polypropylene fleece and have very good adhesion properties.

For corner,
connecting and
butt joints

wedi Tools® tub sealing tape

The fleece laminated wedi Tools tub sealing tape consists of a TPE-coated polypropylene fleece equipped with butyl strips. It has good adhesion properties and is suitable for secure sealing of tubs and shower trays made from steel enamel, acrylic or similar materials. It is optionally available in a set with the self-adhesive decoupling strip which creates tension compensation between the tub and the adjoining wall.

wedi Fundo® sealing set

The wedi Fundo sealing set consists of wedi 520 sealant, wedi tools sealing tape and wedi tools sealing corners, and is especially suited for waterproof connection of Fundo shower elements to other materials outside of the system e.g. floor screed or plasterboard.

Especially for wedi
Fundo floor elements

wedi Tools® sealing gaiters

The flexible and fleece laminated wedi sealing gaiters are suitable for the sealing of all pipes under ceramic flooring in shower and wet rooms. Available in nominal diameters of ½ to ¾ inch, DN 40 – 75 and DN 90 – 125, they always offer a reliable sealing solution for ducts in a variety of sizes.

wedi Subliner® Dry & Flex

The flexible, crack-bridging wedi Subliner Dry & Flex sealing and decoupling membrane is made from a highly tear-resistant polyethylene film and is suitable for fast sealing for projects with fixed completion dates in conjunction with ceramic tiles and slabs, as well as with natural stone cladding for walls and floors in indoor and outdoor areas. The special membrane provides improved tension compensation when sudden temperature changes occur. It is tested and approved for areas of use up to W2-I.

wedi Subliner® Dry

wedi Subliner Dry is a thin-layered, crack-bridging sealing membrane made from highly tear-resistant polyethylene film which, thanks to its special layer of fleeced material on both sides, provides the optimum anchorage for tile-laying materials. Tested and approved for areas of use up to W2-I.

wedi Subliner® Flex

The wedi Subliner Flex crack-bridging decoupling membrane for wall and floor surfaces in indoor areas is made from a robust reinforcement fabric with a special fleece layer on each side that ensures excellent adhesion of tile setting compounds.

wedi Nonstep® Plus

The wedi Nonstep Plus sound insulation composite board consists of a 6 mm wedi building board bonded in the factory to a 5 mm rubber mat, creating an overlap. It is used for decoupling under ceramic flooring, laminate or ready-to-lay parquet.

wedi Nonstep® Plan

wedi Nonstep Plan impact sound insulation is a thin-layered rubber granulate mat with a flexible, mineral coating which is used for decoupling under ceramic floor coverings, laminate or ready-to-lay parquet.

wedi Nonstep® Pro

wedi Nonstep Pro is the ideal product for efficient impact sound insulation of both footstep and water impact noises. It doesn't just fulfil the minimum requirements, but as part of the modular wedi system it has been tested for adherence to the increased sound insulation requirements and passed.

wedi Tools® edge insulation strip

The wedi tools edge insulation strip prevents the transfer of noise between the Fundo floor element and the adjacent area (wall, floor screed, etc.) and thus is an indispensable complement to the wedi Nonstep Pro sound insulation mat.

wedi Tools® fixings set

For a more secure hold under the tiles: the Fixings set allows you to install heavy items such as fittings or glass doors safely. The reinforcement boards are simply glued into the corresponding recess in the wedi building board using wedi 610 and reinforced before tiling.

wedi Tools® metal dowels & washer

The wedi Tools metal dowels and insulation board washers are suitable for the permanent mounting of the building board system on a wide range of surfaces. wedi insulation board washers prevent the screws from being driven into the XPS foam.

wedi Tools® cavity dowels set

The cavity dowels set contains everything you need for mounting after tiling. Bathroom accessories such as mirrors, soap dispensers or towel holders can thus be installed quickly and easily. On tiled wedi building boards (min. 20mm thick), they support loads of up to 25 kg.

wedi Tools® connector

The stabilising wedi Tools connectors are suitable for mechanical mounting and/or connection of wedi building boards.

Good to know

wedi is about much more. On the following pages, we give you an overview of all of the services wedi offers. Our customers are at the heart of our business: from project business through commitment to reliability and standards to the manufacturer's guarantee our aim is to provide a real added value for maximum peace of mind.

So that safety is guaranteed in your system

The CE labelling of the wedi products documents their tested and approved use as a sealing system for wet rooms.

Systems from wedi are labelled with the French VOC classification. A+ stands for exceptionally low emission, non-hazardous product systems.

The wedi product systems satisfy the construction guidelines and regulations that are valid in England, Wales, Northern Ireland and Scotland.

The system solutions from wedi have a wide range of differing technical building approvals and test certificates.

TÜV Rheinland confirms and certifies the excellent wedi quality management system in accordance with DIN ISO 9001:2015.

The barrier-free wedi products have been tested, assessed and certified for their conformity by the DIN CERTCO organisation for conformity assessments.

The wedi product systems have been technically tested and labelled in France by the CSTB (Centre scientifique et technique du bâtiment).

When manufacturing its products, wedi uses certified green electricity from renewable energies.

The wedi construction systems are labelled with the leading Finnish emissions classification. In this context, M1 stands for the highest quality.

The Norwegian test seal, which corresponds to the European requirements, certifies the high technical quality of the wedi product systems.

The wedi quality management and the high product quality are labelled with the Finnish VTT test seal.

The MK test seal qualifies wedi products for use in Denmark in accordance with the country-specific guidelines, norms and standards.

A functional shower enclosure with practical seating and storage

wedi is renowned for its modular system solutions; from the wall structures made from wedi building boards, through the wedi Sanwell niche and the free-floating Sanoasa bench to the classic shower element with point drainage – all elements, including wedi accessories are designed to interlock and work together in order to deliver a 100 % waterproof and thermally insulating full system solution.

Products used

- [1] [wedi building boards](#) ▪ for cladding wall and floor surfaces and for creating shelving solutions
- [2] [wedi Sanwell niche](#) ▪ for the creation of storage in the shower and bath
- [3] [wedi Tools sealing gaiter](#) ▪ flexible sealing for pipes and fittings
- [4] [wedi Sanoasa bench 4](#) ▪ bench, supported on 3 sides
- [5] [wedi Tools tub sealing tape](#) ▪ for reliable sealing of bathtubs and shower trays
- [6] [wedi 320](#) ▪ for full-surface bonding of tiles and the wedi Fundo elements to the substrate

- [7] [Fundo Primo](#) ▪ shower element, in this case with offset point drainage
- [8] [Screed](#)
- [9] [wedi edge insulation strips](#) ▪ sound insulation for the area between wedi Fundo floor elements and the wall
- [10] [PE-film](#) ▪ standard construction foil as a protective layer between the sound insulation mat and mortar
- [11] [wedi Nonstep Pro](#) ▪ sound insulation mats for water noise insulation under wedi Fundo floor elements

Unlimited possibilities with custom builds

Individual steam baths

wedi offers countless options for designing a steam bath. From the choice of the cabin geometry through the design of the vapour coating on the roof, comfortable seating and bath furniture to the technical equipment and furnishings, a multitude of details can be planned and realised according to the client's requirements. Wall and roof elements can be coated in the factory, milled recesses for cables can be incorporated into the individual modules or lighting and sound technology can be integrated during the manufacturing process. Quick installation is guaranteed thanks to the accuracy of fit and the lightness of the materials from wedi.

Communal showers and shower cubicles

wedi product systems form the perfect basis for modular showers. Multitude of floor elements, wall structures and practical shower solutions are available in the standard product range and custom-made elements or solutions can be made through wedi's bespoke service. While communal showers usually consist mostly of standard products, individual shower cubicles are manufactured for the actual intended use and can be equipped with a wide range of additional elements – 100 % waterproof with easy bonding and no additional sealing.

Pool & underwater structures

Whether swimming pools, jacuzzis or underwater elements such as steps, loungers or benches, wedi designs and manufactures a wide variety of customised solutions based on the client's specification. Requirements such as milled recesses and ducts for massage jets, lighting or sound technology can be integrated into the product design during the manufacturing process.
