

On board with a Good Thinking Company

Lindab **Marine**

Energy efficient and customised
indoor climate solutions

Passenger ships

Navy ships

Offshore

Yachts

Cargo ships

A world leader in marine & offshore ventilation

Lindab has more than 35 years' experience of supplying ventilation solutions to anything from passenger ships and navy ships to oil rigs, yachts and cargo ships. Our continuous product development has made us one of

the world's leading suppliers to the HVAC industry. Our solutions for the marine and offshore industries are based on the same well-known, tested and documented products.

The right indoor climate solution – customised for your project

As your partner, we develop a customised solution to meet your needs and those of the end users, while supporting you throughout the entire project. You get a complete combination of ventilations systems, products, knowledge, consulting and support – all in one package. We help you to plan, dimension and optimise your project with smart IT tools, and provide complete documentation of your systems and industry-leading products. This means you can carry out your project more efficiently, and offer your customers a safe and comfortable indoor climate.

-
- > The most energy-efficient and intelligent solutions on the market
 - > We assist with consulting services and technical support in all phases of project implementation
 - > Proven quality products and systems that simplify design, installation, commissioning and operation
 - > We supply the complete ventilation solution – customised for your project

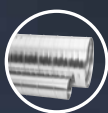

Unique co-development capability

The engineers and professors in R&D investigate new products, do difficult calculations and drawings and realise ideas from customers into products you cannot find in the market. In our laboratory we can together with

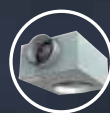

our customers test different solutions and even build a mock-up model and conduct tests based on the factual circumstances.

We provide following products:

Ducts and fittings

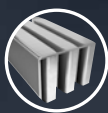

Boxes and diffusers

Circular and rectangular silencers

Mounting systems and accessories

Rectangular splitter silencers

Safety and quality always come first

The overall focus to prevent accidents is fundamental to Lindab. A zero accident vision is supported through specialists, procedures, training and actions.

Quality has always been essential to the success of Lindab. Our products are characterised by high quality,

ease of installation and environmental thinking.

This has been recognised with certification from MED, IMO, ISO, Eurovent and others.

Certificates and approvals

This is just a small selection of certificates and approvals. Please see www.lindabmarine.com for more information.

Production all over Europe – delivery on time

Lindab's production units in several countries serve different needs. The flexibility in production and an overall objective of short time to market meet the customers' need for delivery on time. Innovative machinery and modern production techniques support this.

At Lindab solving challenges is standard practice. By shifting orders, delivering by road or air and putting ourselves in the customers' place, we always strive to achieve the best result every time – delivery on time.

Local presence and global experience

Marine ventilation needs local presence and global experience. At Lindab we meet our customers with a world of possibilities - and a range of skilled people in different areas.

Where to find us

As a customer of Lindab you are very highly valued and we know that we need to be available to help you overcome challenges. We have trained customer service teams in 22 branches across the country in addition to Business Development Managers and indoor climate solutions specialists who are able to visit you anywhere nationally. Our long-standing relationships are built on an uncomplicated and trustworthy approach.

Most of us spend the majority of our time indoors. Indoor climate is crucial to how we feel, how productive we are and if we stay healthy.

We at Lindab have therefore made it our most important objective to contribute to an indoor climate that improves people's lives. We do this by developing energy-efficient ventilation solutions and durable building products. We also aim to contribute to a better climate for our planet by working in a way that is sustainable for both people and the environment.
