Stainless Steel Drains & Channels Overview

Floor and Channel Hygienic Drainage Systems

ALUMASC

WATER MANAGEMENT SOLUTIONS

Overview

Stainless Steel Floor Outlets

Stainless Steel Bespoke Channel

Stainless Steel Modular 120

Applications

- Food & Drink Production and Processing
- Commercial Kitchens
- Hospitality
- Chemical & Pharmaceutical Industries
- Sports & Leisure
- Healthcare
- Retail

Hygienic Drainage Solutions

Harmer's Stainless Steel Floor Drain and Channel products are designed and manufactured in accordance with the most recent guidelines on hygiene requirements.

HARMER

BUILDING DRAINAGE

Stainless Steel Drainage Systems Floor Outlets

The new high performance stainless steel, trapped floor drain range, featuring standard and compact drains with a choice of grate finishes to suit any application.

Features and Benefits

Harmer Stainless Steel floor outlets offer a wide range of standard and compact drains available with fixed or two part adjustable drain bodies, horizontal or vertical outlets, and a choice of square or circular grate finishes to suit the application and load class required.

Compliances

- Grate options available for load class ratings to BS EN 1253 (In-door) - K3 (3kN), L15 (15 kN), M125 (125kN)
- The stainless steel is fully pickle passivated to ensure high quality corrosion-free joints

Flow Performance

- High flow performance
- High sump volume

Robust and Secure

- Available in Grade 304 as standard or Grade 316 on request
- Using 1.5mm - 2mm steel sheets. All components are welded in argon shield to ensure high quality joints
- Excellent corrosion resistance and durability

A Choice of Body and Grates

- Standard and compact drain body options, either fixed or two part adjustable bodies to suit different floor depths
- 4 grate finishes to suit design and load class requirements (Plate, Ladder, Perforated and Mesh Anti-Slip)
- Available trapped only, with vertical or horizontal spigot connection. Trap can be removed manually

Low Maintenance

- Integral waste basket to be used when drained waste water has a high content for solids
- Easy to clean and maintain with easy access to the trap and waste basket

Easy and Quick to Install

- Easy to install, the drain body can be installed into the floor and the trap and basket with grate can follow when ready
- Suitable for tiled, sheet vinyl and resin floor installations

Value for Money

- Stainless steel is very durable and resistant in industrial applications so its life cycle cost is excellent

Sustainable

- Stainless Steel is 100% recyclable
- Around 60% recycled material is used in the production of stainless steel

HARMER

BUILDING DRAINAGE

Stainless Steel Bespoke Floor Channels

High performance stainless steel linear floor drainage range, featuring standard and slot channel options with a choice of grate finishes to suit all applications.

Features & Benefits

Harmer Stainless Steel floor channels offer a range of bespoke linear floor drains, either as a standard or slot channel design with a choice of gratings to meet all applications and load requirements. Both systems are custom manufactured in a wide range of sizes and shapes to suit any project design.

Compliances

- Grate options available for load class ratings to BS EN 1433: 2002 load class A15 (15kN) to C250 (250kN)
- The stainless steel is fully pickle passivated to ensure high quality corrosion-free joints

Flow Performance

- Standard Channels are used to drain high volumes of water and waste
- Slot Channels are used to drain water and limited amounts of waste

Robust and Secure

- Available in Grade 304 or Grade 316 stainless steel Using 1.5mm - 2mm steel sheets
- All components are welded in argon shield to ensure high quality joints
- excellent corrosion resistance and durability

A Choice of Channels and Grates

- Channel sections up to 4m; longer channels will be connected with flanges suitable for all types of floor including vinyl floor finishes
- 5 grate options for the Standard Channel ranging from A15 to C250 load class
- The Standard Channel is available with either a v shaped or flat bottom profile
- The Slot Channel is available in four styles: Standard Mini Channel, Slot Channel, Mini Slot Channel and Maxi Slot Channel

Low Maintenance

- Easy to clean and maintain with easy access channel and drain body

Easy and Quick to Install

- The channel incorporates an integral fall which can be designed to the project requirements
- Integral feet and supports to help secure positioning

Value for Money

- Stainless steel is very durable and chemically resistant, ideal for industrial applications, offering excellent life-cycle costings

Sustainable

- Stainless steel is 100% recyclable
- Around 60% recycled material is used in the production of stainless steel

HARMER

BUILDING DRAINAGE

Stainless Steel Modular 120 Floor Channels

Modular stainless steel channel drainage system

Features & Benefits

Harmer Modular 120 features a high performance stainless steel modular channel system in a range of depths with a choice of grating finishes to suit a variety of internal drainage applications.

Compliances

- Fully tested and classified to BS EN:1433 - Drainage Channels for Vehicular & Pedestrian Areas
- Grate options available for load class ratings to BS EN 1433: 2002 load class A15 (15kN) to C250 (250kN)
- All Stainless Steel is fully pickle passivated to ensure a high quality corrosion resistant drainage system

Flow Performance

- Designed to drain high volumes of effluent water

Robust & Secure

- Supplied with a synthetic edge infill to all channel lengths to ensure a resistance to high loads

A choice of Channels and Grates

- Suitable for tiled, resin or concrete floor applications
- All channel lengths are supplied with concrete anchor tabs and levelling feet
- Available as standard in grade 304 Stainless Steel and also in made to order 316 grade Stainless Steel
- Available in a choice of 3 grate finishes (Anti-Slip, Quattro & Ladder)

Low Maintenance

- Excellent corrosion resistance
- Channels are available in 1000mm or 500mm lengths
- Available in a range of sloping and level invert depths from 50-100mm
- Each channel section is jointed using bolted flange plates, with a neoprene gasket to ensure a watertight seal
- Channels are available with closing end plates

Value for Money

- Stainless steel is very durable and chemically resistant, ideal for Industrial applications, offering excellent life cycle costings

Sustainable

- Stainless steel is 100% recyclable
- Around 60% recycled material is used in the production of stainless steel
