60 years of dependable drainage products

Wade, part of Alumasc Water Management Solutions has been operating in the building industry for over 60 years. Wade's class-leading products are designed and manufactured to meet individual project specification, ensuring many years of reliable service after installation.

Ongoing research and development has seen our product offering expand to accommodate the ever-increasing demands of modern construction projects.

Our state-of-the-art design, manufacturing and distribution facility in Halstead allows us to maintain consistently high standards in product production, and to provide unrivalled technical support to our customers, from design stages through to project completion. Our longevity has resulted in a wide range of solutions suitable for almost all drainage applications, including floor, shower, rodding eyes, roof outlets, non-freeze water points grease converters and channel drainage.

As project requirements continue to evolve, Wade continues to push the boundaries of product development, maximising on decades of industry experience.

Wade is part of the AWMS family

Alumasc (AWMS) is a UK-based supplier of premium building products. The majority of the group's business is focussed on sustainable building products that enable customers to manage energy and water use in the built environment.

They include: **Skyline** Architectural Aluminium; **Alumasc Rainwater** Gutters & Downpipes; **Harmer** Building Drainage; **Wade** Building Drainage and **Gatic** Drainage & Engineered Access Covers.

Designed and manufactured in the UK

Our facility in Halstead is equipped with the latest technology, allowing the design and manufacture of an extensive product range, including bespoke solutions. Where applicable, our skilled workforce utilises automated processes for maximum efficiency, resulting in the following manufacturing capabilities:

- Laser Cutting
- Folding
- Welding
- Machining
- Milling
- Linishing

Our honed production methods make possible a virtually unlimited range of standard and made-to-order engineered drainage solutions that are both fit for purpose and cost effective.

Research & Development

A rolling programme of research and development keeps Wade at the forefront of the drainage industry.

Our commitment to invest in up-to-the-minute technology and QA processes, not only ensures consistent product performance, but also provides a valuable resource when seeking solutions to building drainage practices.

Interactive PDFs - A Wade first!

A new way to navigate; if you open your PDF in Adobe Acrobat, you can click on certain elements throughout the brochure. See below for full details of what you can click on!

In addition to compliance with environmental legislation, Alumasc is committed to developing its own measures to limit the adverse effects of its activities on the environment. To this end, Alumasc operates an environmental policy that fully integrates all aspects of company activities.

Green Economy

The Alumasc Group plc is pleased to be recognised by London Stock Exchange as contributing to the global green economy. The Mark is given to companies and funds that derive more than 50% of revenues from environmental solutions.

The Alumasc Group plc provides high-quality, low carbon, sustainable building products, systems and solutions, which help manage the scarce resources of energy and water in the built environment, and improve quality of life for the owner/occupier.

BSI ISO 9001:2015

This certification provides a structured framework for quality management systems (QMS), enabling us to enhance their overall efficiency and effectiveness. The standard also promotes a customer-centric approach, emphasising the importance of meeting customer requirements and delivering consistent, high-quality products and services.

Sustainability

Alumasc actively pursues sustainability in its full range of products, and, with its partners and suppliers, is committed to putting consideration for the built and wider environment at the core of all aspects of current business and future development.

Professional memberships

- The Chartered Institution of Building Services Engineers (CIBSE) is the professional body that exists to advance and promote the art, science and practice of building services engineering. Supporting a community of built environment professionals in their pursuit of excellence.
- The Society of Public Health Engineers (SoPHE) provide a higher profile and focus for public health engineers within CIBSE. Providing a recognised framework to support public health engineers in their field.
- EHEDG certification reflects a commitment to quality and reliability, by opting for EHEDG-certified manufacturers, you can trust that you are making a safe and informed choice, aligning with the highest hygienic standards in the industry.
- For over 50 years, NBS has helped architects produce their specifications and connect them with manufacturers. NBS Source helps specifiers select products confidently and efficiently.

Introduction - Range Summary

Wade floor drainage products are readily available in standard units with associated components. The standard range gives designers and installers great flexibility to create visually appealing and effective drainage in both new build and refurbishment projects, providing practical options for a vast number of applications in buildings across all sectors.

Adjustable Height

Adjustable Height gullies provide an accurate and efficient means of installation. The range comprises Vari-Level and Multi-Level, offering height adjustability for differing applications. Vari-Level provides the ultimate in design flexibility with a wide range of grating and bodies that are interchangeable to fit most drainage applications.

Fixed Height

The Fixed Height gully range comprises two distinct options: Fixed Height gullies and Direct Connection. Fixed Height gullies offer a grating section which is fixed to the gully body with no height adjustment.

For applications where a gully body is not required, the Direct Connection range can be used to directly connect to pipework. A comprehensive range of high-quality gratings and rodding eyes are available.

Accessories and Bespoke

A full range of accessories, including standard optional extras, is available to cover most applications. In addition, a fully bespoke service is available for non-standard applications.

Design Considerations

A few FAQ’s that it is worth considering before you speak with our Sales & Technical team. Typically these questions are the starting point in specifying your ideal product.

Aesthetics

Material Type

Grating Style

Floor Finish

Performance

Flow Rate

Load Rating

Interval Servicing

Environment

Industrial

Commercial

Hygiene

Design Considerations

Quality and suitability of materials is a key design consideration when choosing the correct drainage material for application. To help identify materials quickly and easily, we have introduced the following materials key throughout the brochure;

Materials Key

- CI

Cast Iron

 - Cast Iron is a widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are surface coated to provide protection, paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing. Used for bodies, membrane clamping collars, threaded pipework adaptors and accessories such as extensions.
- DI

Ductile Iron

 - A versatile and strong material, Ductile Iron is a type of cast iron known for its impact and fatigue resistance, elongation, and wear resistance due to the spherical (round) graphite structures in the metal. Used for Gratings, Ductile Iron provides a long durable service in high traffic areas. A zinc anti-corrosion coating is applied by sherardizing.
- MS

Mild Steel

 - Mild steel is a ferrous metal made from iron and carbon, It's a malleable material that is easy to work with and makes it ideal for use in fabricated and machined parts. Used for pipe adaptors and couplings for connections to pipework.
- NB

Nickel Bronze

 - Nickel Bronze is a cast alloy with a fine grain effect which blends well with most floor finishes. The nickel and copper content makes it a very durable material and is suited to a long-life service. When left, the material will gradually tarnish to a darker bronze but will keep its high lustre finish if cleaned/polished. Used for Gratings, Rodding Eyes and funnels.
- PL

Plastic

 - Certain plastics provide a high degree of resistance to heat, chemical and abrasion resistance. Components such as removable traps, dip tubes, extensions and threaded pipework adaptors use a range of Polypropylene and ABS plastic.
- SS

Stainless Steel

 - Stainless Steel is a corrosion-resistant metal containing significant amounts of nickel and chromium; Grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including food and hygiene applications. In areas with more aggressive environments, such as swimming pools or marine applications, grade 316 is available on request. Used for bodies, gratings, funnels, rodding eyes, filter buckets and fixings.

Fixings

- A key practical design feature of the gully is it's accessibility for maintenance; gratings and rodding eyes provide access to the drain below and are supplied with standard (flat head or cross head) stainless steel fixing screws. Security screws are available for high security areas where unauthorised access is prohibited. Refer to 'Optional Extras' on product pages to specify.

Fixings & Seals

- Seals and Gaskets provide a vital role in connections of auxiliary components and mating parts to ensure odour control and airtight seals in sensitive areas. 'Superseal' rodding eyes provide a double seal O'ring with screw mechanism for additional compression.

Adjustable Height Gullies

Range Overview

Wade Adjustable Height gullies offer an extensive core range of standard components for wide ranging applications that require high quality drainage solutions.

Vari-Level - Page 12

Vari-Level gullies provide a standard range of components that can be combined to give specifiers and designers a wide choice of materials flexible enough to suit many applications and floor finishes.

Vari-Level fine adjustment allows precise installation for finished floors, whilst the extensive range of accessories provides the ultimate in practicality and performance.

Multi-Level - Page 49

Multi-Level gullies are designed to give height adjustability during installation. Multi-Level gullies include the facility for a membrane clamping collar to ensure a watertight joint between the gully body and membrane.

Gratings are available in ductile iron or stainless steel to suit a range of requirements, from plant rooms to pedestrian areas. Drainage can also be provided at membrane level via weep holes or a slotted collar.

Vari-Level Guide

The term Vari-Level refers to the fine threaded adjustability of the finished height of a grating or rodding eye above a body or adaptor; this feature enables installation exactly at finished floor level by rotating the grating or rodding eye.

Example of a Vari-Level gully assembly with accessories and threaded pipework adaptor

	Funnel (Bolt-on)	<div>NBSSMS</div>	Funnels for indirect waste pipes available in single or multiple options.
	Grating or Rodding Eye	<div>NBSSCI</div>	High performance grating and rodding eyes suitable for a number of configurations.
	Extension	<div>CIPLSS</div>	A range of extensions to provide additional height adjustability.
	Membrane clamping collar (with gasket)	<div>SSCIPL</div>	Every body has a collar option to suit varying installations.
	Body	<div>SSCIPL</div>	Industry leading range of gully bodies in a wide selection of materials and configurations. Exceptional array of outlet types and inlet options.
	Threaded pipework adaptor	<div>CIPLMS</div>	A range of connectors to suit new or existing pipework installations.

Vari-Level - Range Summary

The standard Vari-Level range of components is split into gully bodies, gratings, rodding eyes and accessories. For ease, each component is split into material type and can be identified throughout by the material symbol.

CI

Cast Iron Bodies - Pages 14-24

An extensive range of cast iron gully bodies, with multiple outlet configurations. Available in shallow and deep sump variants, trapped and non-trapped, with side-inlet options.

**SS**

Stainless Steel Bodies - Pages 24-27

Stainless Steel gully bodies are available in Grade 304 or 316, trapped or non-trapped, with vertical and horizontal outlet configurations, and side-inlet options.

**PL**

Plastic Bodies - Page 28

Plastic ABS trapped gully bodies are available trapped or non-trapped, with vertical and horizontal outlet configurations, and side-inlet options.

**CI**

Grates & Rodding Eyes - Page 31

SS**NB**

A comprehensive range of gratings and rodding eyes, in cast iron, stainless steel and nickel bronze, including Superseal covers, security gratings and funnels.

**CI**

Accessories - Pages 42-48

SS**NB****PL****MS**

The Vari-Level accessories list includes bolt-on funnels, extension pieces, filter buckets, pipe adaptors, and other practical accessories for specialist applications.

Vari Level Bodies - non-trapped

C2 - C5 Series cast iron drain bodies offer a compact solution which is ideal for use in structural deck construction and for use with thin membranes. e.g. single ply.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Reversible membrane clamping collar for additional height adjustability.
- C5 Series Body allows for up to 4 side inlets, see page 29 to specify.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - Did you know?

- The membrane clamping collar must be ordered separately. Use spec code C.C for standard 4" NPSM throat collar.
- Height adjustability is -30mm +/-15mm
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height. E.g. L2106 Grating has overall height of 57mm: 57mm - 30mm = **Min 27mm**
57mm + 10mm = **Max 72mm**.

Optional Extras

W - add suffix 'W' to collar for weepholes eg C.CW
TP - add suffix 'TP' for Trap Primer

CI

C2 Series Vertical Threaded Outlet - Shallow Sump

Outlet Size (BSP)	Free Area (cm ²)	Weight (kg)	Spec Code	
			Collar	Body
2"	19	2.8	C.C	C202
3"	44	2.9	C.C	C203
4"	78	2.8	C.C	C204

C3 Series Vertical Spigot Outlet - Shallow Sump

Outlet Size (mm)	Free Area (cm ²)	Weight (kg)	Spec Code	
			Collar	Body
82	44	3.1	C.C	C343
110	78	3.3	C.C	C344
90	44	3.4	C.C	C363
117	78	3.7	C.C	C364
87	44	3.3	C.C	C393

C5 Series Vertical Threaded Outlet - Deep Sump

Outlet Size (BSP)	Free Area (cm ²)	Weight (kg)	Spec Code	
			Collar	Body
2"	19	7.6	C.C	C502
3"	44	6.9	C.C	C503
4"	78	7.8	C.C	C504

Vari Level Bodies - non-trapped

D2 - D7 Series cast iron drain bodies have a threaded BSP outlet, in vertical, 45° and Horizontal configuration.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Reversible membrane clamping collar for additional height adjustability.
- D4 Series Body allows for up to 4 side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - Did you know?

- The membrane clamping collar must be ordered separately. Use spec code C.D for standard 4" NPSM throat collar.
- Height adjustability is -30mm / +10mm
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 30mm = Min 27mm
57mm + 10mm = Max 67mm..

Optional Extras

W - add suffix 'W' to collar for weepholes eg C.CW

D2 Series Vertical Threaded Outlet - Shallow Sump

CI

Outlet Size (BSP)	Free Area (cm ²)	Weight (kg)	Spec Code	
			Collar	Body
4"	78	7.2	C.D	D204
6"	176	6.9	C.D	D206

D4 Series Vertical Threaded Outlet - Deep Sump

CI

Outlet Size (BSP)	Free Area (cm ²)	Weight (kg)	Spec Code	
			Collar	Body
4"	78	11.6	C.D	D404
6"	176	19.8	C.D	D406

Vari Level Bodies - non-trapped

D2 - D7 Series cast iron drain bodies have a threaded BSP outlet, in vertical, 45° and horizontal configuration.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Reversible membrane clamping collar for additional height adjustability.
- D4 Series Body allows for up to 4 side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - *Did you know?*

- The membrane clamping collar must be ordered separately. Use spec code C.D for standard 4" NPSM throat collar.
- Height adjustability is -30mm /+10mm
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 30mm = Min 27mm
57mm + 10mm = Max 67mm.

Optional Extras

W - add suffix 'W' to collar for weepholes eg C.CW

D604 45° Threaded Outlet

CI

			Spec Code	
Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Collar	Body
4"	78	10.7	C.D	D604

D7 Series Horizontal Threaded Outlet - Shallow Sump

CI

					Spec Code	
Outlet Size (BSP)	A (mm)	B (mm)	Free Area (cm2)	Weight (kg)	Collar	Body
2"	127	86	19	7	C.D	D702
3"	127	73	44	6.5	C.D	D703
4"	150	83	78	10	C.D	D704

Vari Level Bodies - non-trapped

B504 cast iron drain body offers a compact 45° outlet.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Optional membrane clamping collar.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - *Did you know?*

- B504 can be used without a membrane clamping collar.
- Height adjustability is -15mm /+5mm
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 15mm = **Min 42mm**
57mm + 5mm = **Max 62mm**.

Optional Extras

C.B - for optional collar use spec code (C.B)

B504 45° Threaded Outlet

CI

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code	
			Collar	Body
4"	78	3.5	C.B	B504

Vari Level Bodies - non-trapped

D10 - D12 series cast iron drain bodies provide a wide flange which can be set at structural slab level to accept damp proof membranes up to 30mm thickness.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Membrane clamping collar allows for up to 30mm thickness of damp proof membrane.
- Suitable for use with Asphalt.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - Did you know?

- The membrane clamping collar must be ordered separately. Use spec code C.D10 for standard 4" NPSM throat collar
- Height adjustability is -20mm /+0mm
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 20mm = **Min 37mm**
57mm + 0mm = **Max 57mm**.

Optional Extras

W - add suffix 'W' to collar for weepholes eg C.D10W

D10 Series Vertical Threaded Outlet - Shallow Sump

CI

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code	
			Collar	Body
2"	19	5	C.D10	D1002
3"	44	4.3	C.D10	D1003
4"	78	3.3	C.D10	D1004

4"	78	183	117	91	6.5	C.D10	D1209

Vari Level Bodies - non-trapped

SD10 - SD30 series cast iron drain bodies can be used for sub-surface drainage such as with cavity membranes.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Can accommodate up to 30mm thickness of membrane.
- Height rotating collar provides additional adjustability.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets, Traps & Bolt-on-Funnels	45

Technical - Did you know?

- The included cast iron slotted membrane clamping collar provides sub-surface drainage where insulation is.
- Height adjustability is **-10mm +/-30mm**
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 10mm = **Max 47mm**
57mm - 30mm = **Min 27mm**.

SD10 Series Vertical Threaded Outlet - Shallow Sump

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code
2"	19	11.8	SD102
3"	44	10.8	SD103
4"	78	10.2	SD104

						Spec Code	
Outlet Size (BSP)	Free Area (cm2)	A (mm)	B (mm)	C (mm)	Weight (kg)	Collar	Body
2"	19	119	145	80	12.9	C.D10	SD302
3"	44	119	145	67	12.3	C.D10	SD303
4"	78	183	90	117	14.1	C.D10	SD304

Vari Level Bodies - non-trapped

SD40 - SD60 series cast iron drain bodies can be used for sub-surface drainage such as with cavity membranes, where the waterproof is below the insulation.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Additional cast iron extension flange, typically for extension through insulation.
- Height rotating collar provides additional adjustability.
- Can accommodate up to 30mm thickness of membrane.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43

Technical - Did you know?

- The cast iron slotted membrane clamping collar provides additional sub-surface drainage where insulation is used above the waterproofing
- Suitable for 80-100mm insulation, Custom size from 45mm upwards - please specify the insulation thickness on purchase
- Height adjustability is **-10mm /-30mm**
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 10mm = **Max 47mm**
57mm - 30mm = **Min 27mm.**

SD40 Series Vertical Threaded Outlet - Shallow Sump

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code
2"	19	17.6	SD402
3"	44	16.6	SD403
4"	78	16.0	SD404

SD50 Series Vertical Spigot Outlet - Shallow Sump

Outlet Size (mm)	Free Area (cm2)	A (mm)	B (mm)	Weight (kg)	Spec Code
60	19	238	60	17.0	SD502
87	44	165	87	17.4	SD503
112	78	190	111	17.2	SD504

SD60 Series Horizontal Threaded Outlet - Shallow Sump

Outlet Size (BSP)	Free Area (cm2)	A (mm)	B (mm)	C (mm)	Weight (kg)	Spec Code
2"	19	119	145	80	18.7	SD602
3"	44	119	145	67	18.1	SD603
4"	78	183	90	117	19.9	SD604

Vari Level Bodies - p-trapped

G2 - G3 Series cast iron drain bodies offer a compact 50mm P-Trap solution.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Optional membrane clamping collar. Including flanges for Asphalt and Timber Deck application.
- Body allows for up to 3 optional side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets & Bolt-on-Funnels	45

Technical - Did you know?

- Can be used without a membrane clamping collar
- Height adjustability is -10mm /-30mm
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 10mm = **Max 47mm**
57mm - 30mm = **Min 27mm**.

Optional Extras

A - for optional stainless steel support plate for asphalt use suffix 'A' to the spec code
C - for optional membrane clamping collar use suffix 'C' to the spec code
D - for optional stainless steel support plate for a timber deck and cast iron membrane clamp for installation in a timber deck use suffix 'D' to the spec
E - for optional 25mm grating extension use suffix 'E' to spec code.
 Note: only one suffix can be used.

Vari Level Bodies - s-trapped

G5, G6 and G1014 cast iron drain bodies offer a compact 50mm S-Trap solution.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Optional membrane clamping collar. Including flanges for Asphalt and Timber Deck application.
- Body allows for up to 3 side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets & Bolt-on-Funnels	45

Technical - *Did you know?*

- Can be used without a membrane clamping collar, if required, it can be ordered separately
- For Asphalt or Timer Deck application please see page 44 for U15 and U16 accessories.
- Height adjustability is **-30mm /+10mm**
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 30mm = **Min 27mm**
57mm + 10mm = **Max 67mm.**

Optional Extras

A - for optional stainless steel support plate for asphalt use suffix 'A' to the spec code
C - for optional membrane clamping collar use suffix 'C' to the spec code
D - for optional stainless steel support plate for a timber deck and cast iron membrane clamp for installation in a timber deck use suffix 'D' to the spec
E - for optional 25mm grating extension use suffix 'E' to spec code.
Note: only one suffix can be used.

G5 Series Vertical Spigot Outlet - 50mm Seal

111	64	9.0	G1014

Vari Level Bodies - trapped

GC144 and GD series cast iron drain bodies offer 50mm with full bore access to pipework. Compatible with concrete screed build-up.

Key Features

- Compatible with most Vari-Level Gratings and Rodding Eyes.
- Reversible membrane clamping collar for additional height adjustability.
- Full access to pipework via removable trap.
- Body allows for up to 4 side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets & Bolt-on-Funnels	45

Technical - Did you know?

- The membrane clamping collar must be ordered separately.
- Height adjustability GC144 is **-30mm /+15mm**
- Height adjustability GD Series is **-30mm /+10mm**
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 30mm = **Min 27mm**
57mm + 10mm = **Max 67mm**.

Optional Extras

- C.C - Use spec code C.C for GC144.
- C.D - Use spec code C.D for GD series.
- W - add suffix 'W' to collar for weepholes eg C.CW

GC144 Vertical Spigot Outlet, Plastic Bottle Trap - 50mm Seal

CI

PL

Outlet Size (mm)	Free Area (cm2)	Weight (kg)	Spec Code	
			Collar	Body
110	20	11.1	C.C	GC144

- Note:**
- This body assembly is designed for low volume drainage applications (max. flow rate of 1 l/s).
 - Frequent cleaning of the bottle trap will be necessary in applications where very high amounts of hair and other waste materials are present

GD Series Vertical Spigot Outlet, SS Bell Trap - 50mm Seal

CI

SS

Outlet Size (mm)	Free Area (cm2)	Weight (kg)	Spec Code	
			Collar	Body
110	78	17.3	C.D	GD144
117	78	17.3	C.D	GD164

Vari Level Bodies - p-trapped

H2 and J204 cast iron drain bodies provide a 100mm P-Trap solution.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Optional membrane clamping collar.
- Body allows for up to 3 side inlets, see page 29 to specify

Product Accessories

	Page
Gratings & Rodding Eyes	31
Extension Pieces	42
Pipe Adaptors	43
Filter Buckets & Bolt-on-Funnels	45

Technical - Did you know?

- Can be used without a membrane clamping collar, if required, it can be ordered separately.
- Height adjustability is **-10mm /+10mm**
- Note: To calculate distance A (adjustability) apply the -/+ dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 10mm = **Min 47mm**
57mm + 10mm = **Max 67mm**.

Optional Extras

- C.H2** - Use spec code C.H2 for H2 Series
- C.J2** - Use spec code C.J2 for J204

H2 Series Horizontal Threaded Outlet - 100mm seal

CI

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code
3"	44	17.4	H203
4"	78	16.4	H204

J204 Horizontal Threaded Outlet - 100mm seal

CI

Outlet Size (BSP)	Free Area (cm2)	Weight (kg)	Spec Code
4"	78	19.7	J204

- Note:**
- The close proximity of grating and rodding eye prevents the adjacent use of the widest versions.
 - The inlet closest to the outlet is not trapped; select sealed rodding eyes only and ensure that the access cover is installed closest to the outlet.

Vari Level Bodies - trapped

QG114 and QG214 stainless steel drain bodies are generally suitable for use in high specification applications e.g. Hygienic environments or where high corrosion resistance is necessary.

Key Features

- Compatible with all Vari-Level Gratings and Rodding Eyes.
- Grade 304 SS drain bodies with optional Grade 316 available on request.
- Body allows for up to 4 (max 3 on QG214) side inlets, see page 29 to specify

Product Accessories

110	78	2.1	QB214

Vari Level Bodies - trapped

GP312, GP614 and GP1104 ABS plastic drain bodies are suitable for use in lower volume drainage applications, such as light commercial or domestic drainage.

Key Features

- Compatible with most Vari-Level Gratings and Rodding Eyes.
- Membrane clamping collar included.
- Full access to pipework via removable trap.
- GP1104 supplied with 3no optional knock out 56mm side inlets.

Product Accessories

	Page
Gratings & Rodding Eyes	31
Pipe Adaptors	43
Filter Buckets & Bolt-on-Funnels	45

Technical - Did you know?

- A gasket is supplied to ensure a watertight joint between membrane (or body if no membrane is being used) and membrane clamping collar.
- ABS has a maximum continuous operating temperature of 75°C.
- Height adjustability GP312 & GP614 is -5mm /+10mm
- Height adjustability GP1104 is -0mm /+10mm
- Note: To calculate distance A (adjustability) apply the +/- dimension (above) to the overall grating height.
E.g. L2106 Grating has overall height of 57mm:
57mm - 0mm = Min 57mm
57mm + 10mm = Max 67mm.

Optional Extras

W - For Weepholes (to provide supplementary drainage at membrane level) add Suffix 'W'

GP312 Horizontal Spigot Outlet - 50mm Seal

PL

Outlet Size (mm)	Free Area (cm2)	Weight (kg)	Spec Code
50	14	0.6	GP312

- Note:**
- Outlet size 56mm internal diameter socket

GP614 Vertical Spigot Outlet - 50mm Seal

PL

Outlet Size (mm)	Free Area (cm2)	Weight (kg)	Spec Code
110/50	14	0.6	GP614

- Note:**
- 110mm outlet size = external diameter.
 - 50mm reducer = 56mm external diameter socket

GP1104 Horizontal Spigot Outlet - 50mm Seal

PL

Outlet Size (mm)	Free Area (cm2)	Weight (kg)	Spec Code
110	67	0.6	GP1104

- Note:**
- Extensions may be stacked to obtain extra height, but access to trap/plug will be restricted when used with G2-G10/GC/GD/GP/QG series

Vari-Level Clamping Collars

Membrane clamping collars are components used to secure a damp proof membrane to a gully body. Wade manufactures a range of Vari-Level gully bodies, and each has a membrane clamping collar to suit.

Two different types of membrane clamping collar are available

1) Membrane clamping collar (fig. 1 & 2) Vari-Level gully bodies without a threaded inlet require a membrane clamping collar which serves the dual purpose of clamping the membrane and connecting the grating/cover to the body. The appropriate membrane clamping collar must be specified to go with the required gully body and grating/cover. Unless specified otherwise, a gasket is supplied to ensure a watertight joint between membrane (or body if no membrane is being used) and membrane clamping collar.

2) Optional membrane clamping collar (fig. 3) For Vari-Level gully bodies with a threaded inlet for connecting the grating/cover, the membrane clamping collar is an optional extra, to be specified if the application includes a damp-proof membrane

To specify

The below table lists membrane clamping collar Spec. Codes by gully body series. Select the appropriate membrane clamping collar from the table to fit the gully body.

Options

Membrane clamping collars are machined to produce variations to suit particular installations such as: 'W' with weepholes to provide supplementary drainage at membrane level.

Note:

Some membrane clamping collars are reversible (figure 1), thereby increasing the height adjustability of grating/cover above the body (please refer to height adjustability guide on gully body pages). All membrane clamping collars include stainless steel fasteners to connect to the gully body.

Body Series	For use with 4" throat Vari-Level grating/cover
B504	C.B (optional)
C series	C.C - standard 4" throat version (gasketed) C.CW - includes weepholes (not sealed)
D2-D7 series	C.D - standard 4" throat version (gasketed) C.DW - includes weepholes (not sealed)
D10-D12 series	C.D10 - standard 4" throat version (gasketed) C.D10W - includes weepholes (not sealed)
G2-G10 series	add suffix 'C' to body Spec. Code (optional)
GC144	C.C - standard 4" throat version (gasketed) C.CW - includes weepholes (not sealed)
GD series	C.D - standard 4" throat version (gasketed) C.DW - includes weepholes (not sealed)
GP series	This series is supplied as an assembly which includes a body, membrane clamping collar and gasket For weepholes - Add suffix 'W' to body spec code.
H2 series	C.H2 (optional)
J204	C.J2 (optional)
QB series	Add suffix 'C' to body Spec. Code (optional)
QG series	Add suffix 'C' to body Spec. Code (optional)

Vari-Level Side Inlets

Side inlets in a gully permit the underfloor connection of pipes from fixtures such as sinks and wash basins, from drainage channels and from other gullies.

Side inlets in Wade trapped gullies are located completely above the water level, except in GD series where the inlets are partially below the water level.

The illustrations represent typical gully bodies, viewed from above, and show the Spec. Codes for all possible combinations of locations.

Unless otherwise requested, side inlets in cast iron gully bodies will be supplied as BSP female threads (specify thread size); stainless steel bodies have BSP female threads up to 2"; above 2", spigot inlets are supplied to suit BS 416 pipework.

GP1104 plastic gully body has three side inlets moulded-in that will accept 50mm plastic pipework; these inlets are usable by removing knock-outs from the body on site.

Gully bodies with verticle outlet

Gully bodies with 'P' or 'S' trapped outlet

Gully bodies with horizontal outlet

To specify/order

Quote the Spec. Code for the selected body with suffix 'I' and the locations and size of each inlet.
e.g. G304 body with 2 side inlets tapped 1.5" BSP, in locations per illustrations 2B.
Specify G304I 2B 1.5

Vari-Level Gratings - range summary

Vari-Level floor drainage gratings are specifically designed to offer adjustable height settings, allowing for precise customisation to meet various drainage requirements. These gratings provide exceptional flexibility, ensuring effective water management in diverse environments such as pedestrian areas, food processing facilities, and laboratories.

CI

Cast Iron - Page 32

For use in unfinished floors, such as plant rooms and car parks. Suitable for restoration and refurbishment projects to match period architecture.

NB

Nickel Bronze - Pages 33-34

For use in pedestrian areas to suit a variety of floor finishes, including ceramic and vinyl tiles, marble, paving, terrazzo, resin and wood.

SS

Stainless Steel - Pages 35-37

For use in high specification applications, including food preparation areas, prison cells, showers, and areas where high corrosion resistance is a requirement.

P - add suffix 'P' for polished finish (not applicable to L35 and L36 series)

Vari-Level Rodding Eyes - range summary

Vari-Level rodding eyes are intelligently designed fixtures that provide easy access and maintenance for underground drainage pipes. These innovative rodding eyes offer adjustable height settings, allowing for precise alignment with the floor surface.

CI

Cast Iron - Page 39

For use in unfinished floors, such as plant rooms and car parks. Suitable for restoration and refurbishment projects to match period architecture.

NB

Nickel Bronze - Pages 39-40

For use in pedestrian areas to suit a variety of floor finishes, including ceramic and vinyl tiles, marble, paving, terrazzo, resin and wood.

SS

Stainless Steel - Page 41

For use in high specification applications, including food preparation areas, prison cells, showers, and areas where high corrosion resistance is a requirement.

Vari-Level Extension Pieces

Used to increase the height between the top of a body/adaptor and grating/rodding eye.

U1 Series

CI

Compatibility

- Vari-Level Gratings Cast Iron and stainless steel
- Adaptors and Bodies with 4" NPSM throat

Spec. Code	Thread Size NPSM		Overall Height (mm)	Height Adjustment		Max O.D. (mm)	Weight (kg)
	Female (inches)	Male (inches)		Min.	Max.		
U102	4" NPSM	4" NPSM	60	37	55	130	1.1
U103	4" NPSM	4" NPSM	100	40	95	130	1.6
U104	4" NPSM	4" NPSM	152	85	145	130	2.5

- Note:**
- Extensions may be stacked to obtain extra height, but access to trap/plug will be restricted when used with G2-G10/GC/GD/QG series trapped bodies. Generally no more than two large (U104) extensions are recommended on trapped gully bodies

UP104

PL

Compatibility

- All Vari-Level Gratings and GP series bodies with 4" NPSM throat

Spec. Code	Thread Size NPSM		Overall Height (mm)	Height Adjustment		Max O.D. (mm)	Weight (kg)
	Female (inches)	Male (inches)		Min.	Max.		
UP104	4"	4"	152	36	145	120	0.4

- Note:**
- Extensions may be stacked to obtain extra height, but access to trap/plug will be restricted when used with G2-G10/GC/GD/GP/QG series trapped bodies
 - Stainless Steel extensions are available as custom made items - Please advise required gained height if required.

Vari-Level - Gratings & Rodding Eye Adaptors

Vari-Level adaptors are specifically designed to provide seamless integration between various floor levels and drainage systems. These versatile adaptors enable the connection of Vari-Level Gratings and Rodding Eyes directly to pipe systems.

Vari-Level NPSM Threaded Pipework Adaptors

CI PL

Product Code	Product Material	Description	Max Outside Diameter (mm)	Pipework O.D. (mm)	Overall Length (mm)	Weight (kg)

** T501	Cast Iron	4" BSPT male inlet and 122mm dia	122	130	2.8
T1702	ABS	2" BSPT male inlet and 54mm dia. outlet	* 2"/54mm	60	0.1
T1704	ABS	4" BSPT male inlet and 110.2, 111, 114, 117mm dia. outlet	* 4"/110mm	126	0.2
T1802	ABS	2" BSPT male inlet and 50mm dia. outlet	50	90	0.2

***Note:**
* I.D. - pipework connecting end is a female socket for solvent weld pipework system
** Requires an additional note that on request these can be provided to custom made lengths up to 900mm long
*** T103 in lengths greater than 600mm are mild steel sherardized

Clay and PVC Gully Adaptors

CI

Vari-Level Accessories

Filter Buckets, Removable Bottle Trap and Backwater Valve for use inside throat of grating and frames with 4” throats. Only one accessory can be used per installation.

Filter Buckets

PL
UP701

For use with direct connection gratings/tundish with 110mm outlets.
Will not work with backwater valves and removable bottle traps

Note:

- Not compatible with: K1807, K1897, K2801, K2891.

UP702

Deep version for use with direct connection gratings and tundishes with 110mm outlets.
Will not work with backwater valves and removable bottle traps

Note:

- Compatible with 4” Vertical non-trapped bodies. Please check with Wade technical.
- Not compatible with: K1807, K1897, K2801, K2891.
- Sufficient space will need to be provided in pipework below to allow room to fit

Removable Bottle Trap

PL
U1404

50mm seal. Max flow rate of 1l/s

Note:

- Compatible with direct connection gratings and tundishes with 110mm outlets. Please check with Wade technical.
- Not compatible with: K1807, K1897, K2801, K2891.
- Sufficient space will need to be provided in pipework below to allow room to fit

Backwater Valve

SS
PL
U704

Note:

- Compatible with direct connection gratings and tundishes with 110mm outlets. Please check with Wade technical.
- Not compatible with: K1807, K1897, K2801, K2891.
- M - add suffix 'M' for grade 316 stainless steel

Tapered Outlet Plug

PL
UX9901

Tapered to temporarily plug 100mm inlet or outlet during installation

Male Hollow Plug

CI
U1802

Malleable iron 2" BSP male hollow plug.
Used to block a side inlet; must be sealed

Note:

- Fits all vari-level bodies with 4" NPSM Throat

Planter Drains

Wade offers a range of products providing drainage of moisture in planting areas and flower boxes, minimising loss of soil.

P801

Key Features

- For applications where a grating is required at the surface, in a paved area, or where access is required; for use with D10-D12 series bodies, shown on page 18

Spec Code		
Code	Add Length (mm)	Weight
P801	Specify Length	4.0

P901 Series

Key Features

- For applications where the standpipe is concealed by soil; for use with Vari-Level bodies and collars shown on page 14. Dome is removable for access purposes

Note:

- Fits all vari-level bodies with 4" NPSM Throat

Spec Code		
Code	Add Length (mm)	Weight
P901	Specify Length	0.7

P10 Series

Key Features

- For applications where all drainage is concealed by soil; versions available to suit asphalt or sheet/brush on membranes
- For use with vari-level bodies shown on pages 14

Spec Code	Installation Type	Body Type	Membrane	Dome free area cm ²	Weight kg
P1001	1	C2-C5 Series	Sheet or brush on	115	0.3
P1002	2	D10-D12 Series	All types	115	1.3

Multi-Level - range summary

The Multi-Level range comprises standard gullies in cast iron and stainless steel that give a practical level of height adjustability. The Multi-Level range includes heavy-duty gullies for robust applications, such as car parks, yards, and plant rooms.

CI M101, M301 and M401- Page 50-51

The M101, M301 and M401 provide a versatile range of adjustable height gratings in cast/ductile iron, that, when combined with drain bodies, provide an effective means of drainage for areas that require L15 load class rating.

CI WD Series - Pages 52-55

The WD series provides an extensive range of cast iron bodies with ductile/stainless steel grating options, in various pre-assembled configurations for use in areas requiring surface and sub-surface drainage over a lower-level membrane.

CI F Series - Page 56

The F Series offers heavy-duty deep sump gullies for use in car parks, yards, warehouses and plant rooms. Offering ductile iron and stainless steel hinged grating variants, with class ratings of M125 and P400.

SS Q Series - Page 57-58

The Q series Vari-level range is made up entirely of stainless steel gully assemblies, providing a fine level of adjustability as standard, with a choice of gratings to suit individual project requirements.

Multi-Level Gully - M series assemblies

The M101 grate assembly, when combined with C.M1 collar offers a compact solution for screed and asphalt type finishes.

Key Features

- Ductile Iron Grating with high quality sherardized coating
- Rotating design allows for height adjustment
- Compatible with D2 series, D4 series, D604, D7 series and GD series Gully Bodies

Technical - Did you know?

- C.M1 clamping collar is required for assembly and must be ordered separately
- U301 extension piece - can be stacked to achieve extra height
- Side inlet options are available depending on gully body type
- Bolt-on-funnels U502 and U602 can be used for indirect waste connection

Product accessories

	Page
Pipe Adaptors	43
Bolt-on-Funnels	45

Optional Extras

- B - add suffix 'B' to grating for stainless steel Filter Bucket
- W - For Weepholes (to provide supplementary drainage at membrane level) add Suffix 'W' to collar spec code
- H - add suffix 'H' to M101 for Pin Torx screws for security applications

Multi-Level Gullies - shallow sump

WD20 - WD23 Series gullies for areas subject to light vehicular traffic, requiring surface and sub-surface drainage over a sub-surface membrane.

Key Features

- L15 Load Class Ductile Iron Grating with high quality sherardized coating
- Rotating design allows for height adjustment
- Slotted collar provides sub-surface drainage

Technical - *Did you know?*

- The slotted collar also serves as membrane clamping collar
- WD20 - WD23 series are supplied as complete units
- Extension Pieces - add the spec code for extension pieces from the table;

Optional Extras

WG301 - add Spec code WG301 for Stainless Steel Filter Bucket

Spec Code	Height
WG502	35mm
WG501	96mm

Multi-Level Gullies - trapped

Q2434 and Q2334 stainless steel drain gullies are suitable for use in high specification applications such as food preparation with tiled, resin and concrete floors.

Key Features

- Suitable for tiled, resin and concrete floor finishes
- Grade 304 SS drain bodies with optional Grade 316 available on request
- A choice of six Gratings, to specify grating use spec code
- Body allows for up to 4 (Q2334 max 3) side inlets, see page 29 to specify

Product accessories

Fixed Height Units

Range Overview

Wade Fixed Height options comprise an extensive range of drainage solutions to suit most applications. The range is split into Fixed Height gullies and Direct Connection; each section is organised by material types and can be identified throughout by the material symbol.

Fixed Height Gullies - Pages 61-75

Fixed Height gullies have integral grating that provides a fixed height from the body to the grating, meaning they cannot be adjusted independently of each other.

The range offers a comprehensive array of configurations, with trapped and non-trapped options, to suit almost any application. The range includes cast iron, stainless steel, nickel bronze, and various plastic components.

Direct Connection - Pages 77-91

The Direct Connection floor drainage gratings and rodding eye ranges serve as an effective means of providing high quality drainage, trapped or non-trapped, directly onto proprietary pipework, allowing direct connection to 110mm pipework and other common sizes.

The range is split into Gratings (pages 78) and Rodding Eyes (pages 86).

Fixed Height Gullies - range summary

The standard range of Fixed Height gullies is available with cast iron, stainless steel or plastic gully bodies, and a wide selection of gratings. The range is organised by material type and can be identified throughout by the material symbol.

CI Cast Iron Gullies - Pages 62-67

DI An extensive range of cast iron Fixed Height gullies, with multiple outlet configurations. Available in shallow and deep sump variants, with circular or square grating options.

Fixed Height Gullies - non trapped

The WB30 - 33 series is suitable for areas subject to light vehicular traffic.

Key Features

- Circular Ductile Iron Grating with high quality sherardized coating
- Membrane clamping collar which also serves to connect the grating to the body (included)

Technical - *Did you know?*

- Sherardized protective coating is a high performance, maintenance free coating for cast iron and ductile Iron
- The membrane clamping collar and grate assembly is included

U511

Note: U511 is grade 316 stainless steel as standard

Fixed Height Gullies - trapped

Q10 to Q14 series fixed height bodies have a large sump suitable for use in high specification areas like food preparation where high corrosion resistance is required.

Key Features

- Suitable for tiled, resin and concrete floor finishes
- Grade 304 S/S with Grade 316 available request
- A choice of four gratings, to various applications
- Body allows for up to 4 (max 3 on Q1234 and Q1334) 100mm side inlets, see page 29 to specify

Product Accessories

Pipe Adaptors	Page 91
---------------	---------

Technical - *Did you know?*

- Fixed height gratings are loose fitted (no screws). Specify grating required using the spec code on page 66

Optional Extras

- B** - add suffix 'B' for stainless steel filter bucket
- I** - add suffix 'I' for side inlets, see page 29 to specify
- M** - add suffix 'M' for grade 316 stainless steel
- N** - add suffix 'N' for non-trapped (Q10 and Q14 only)

Q8 Series - Backflow Valve Gully

SS

For use in pools or pits where safeguard against backflow is required

Key Features

- Grade 304 SS with optional Grade 316 available on request
- Integral backflow flap in stainless steel

Product Accessories

	Page
Pipe Adaptors	90

Outlet Size (mm)	Free Area (cm2)	Load Rating	Aperture (mm)	Weight (kg)	Spec Code
114	185	N/A	13	22.0	Q801
172	185	N/A	13	22.0	Q802

Technical - Did you know?

- Q8 Series is supplied with an integrated flange for membrane clamping
- M - add suffix 'M' for grade 316 stainless steel

Shower Gullies - horizontal outlet

For use in wet bathrooms and shower areas decked with flexible sheet flooring.

Key Features

- Watertight - clamping collar provides a water-tight seal between the flooring material and gully even when the grating is removed.
- Water seal - formed by a bucket and dip tube, the water seal depth of 50mm complies with plumbing codes of practice in the U.K.
- Flow rate - (grating and funnel versions) rate in excess of 40 l/min; comfortably exceeds the minimum rate of 24 l/min required by BS EN 274 - discharge from a single shower head.
- Accessible - removable grating and trap enable easy access from above for maintenance purposes.

Optional Extras

- H** - add suffix 'H' to add Pin Torx screws for security applications (not GV5007). GV5247 comes as standard with Pin Torx screws.
- I** - add suffix 'I' for tapped cover to connect direct connection waste pipe 1.25", 1.5" or 2" (GV5107, GV5247, GV5517, GV5103, GV5503 only)
- M** - add suffix 'M' for grade 316 stainless steel (Excluding GV5007)
- P** - add suffix 'P' for polished stainless steel (note that GV5817 is polished as standard)

Technical - Did you know?

- GV5007 secured grating has no visible fixings and is removable only upon depressing an unobtrusive lever.
- The removable trap bucket helps to eliminate blockages and intercepts jewellery and other items which might otherwise be washed away.
- 56mm outlet socket for solvent-weld connection to PVC pipework.

GV5 Series - 50mm Horizontal Outlet - Trapped

PL SS NB

Stainless Steel Options

Shower Gullies - vertical outlet

For use in wet bathrooms and shower areas decked with flexible sheet flooring.

Key Features

- Watertight - clamping collar provides a water-tight seal between the flooring material and gully even when the grating is removed.
- Water seal - formed by a bucket and dip tube, the water seal depth of 50mm complies with plumbing codes of practice in the U.K.
- Flow rate - (grating and funnel versions) rate in excess of 40 l/min; comfortably exceeds the minimum rate of 24 l/min required by BS EN 274 for the discharge from a single shower head.
- Accessible - removable grating and trap enable easy access from above for maintenance purposes.

Optional Extras

- H** - add suffix 'H' to add Pin Torx screws for security applications (not GV6007). GV6247 comes as standard with Pin Torx screws.
- I** - add suffix 'I' for tapped cover to connect direct connection waste pipe 1.25", 1.5" or 2" (GV6107, GV6247, GV6517, GV6103, GV6503 only)
- M** - add suffix 'M' for grade 316 stainless steel (Excluding GV6007)
- P** - add suffix 'P' for polished stainless steel (note that GV6817 is polished as standard)

Technical - Did you know?

- The 110mm body can be solvent welded to PVC or push-fit into a ring seal connector. The 56mm socket reducer (included) can be used to connect to 56mm PVC pipework.
- GV6007 secured grating has no visible fixings and is removable only upon depressing an unobtrusive lever.
- The removable trap bucket helps to eliminate blockages and intercepts jewellery and other items which might otherwise be washed away.

Direct Connection

Direct Connection Guide

Direct Connection gullies look identical to Vari-Level gullies when installed, but are machined to enable direct connection to pipework by means of proprietary couplings or ring seal sockets. In most cases, one version of grating or access cover is suitable for all pipework of the same size. However, tolerances of castings and pipework are such that in some cases different versions of the same style and size of grating or access cover may be required for different pipework. This is made clear by the specification codes in the tables on the following pages.

	Gratings	<div>CI</div> <div>NB</div> <div>SS</div>	High performance gratings suitable for all types of flooring and finishes.
	Rodding Eyes	<div>CI</div> <div>NB</div> <div>SS</div>	High performance rodding eyes - gasketed and double sealed options with hinged and secured versions.
	Accessories	<div>PL</div>	Complimentary accessories, including traps and filter buckets.
	Adaptors	<div>CI</div> <div>SS</div> <div>PL</div>	A range of connectors to suit new or existing pipework for direct connection.

Typical Installations / Assembly

Direct Connection Gratings - range summary

Direct Connection floor drainage gratings serve as the visible surface covering for floor drains, providing an effective solution for water removal in various applications. Designed to withstand heavy loads and facilitate efficient water flow, these gratings ensure optimal drainage performance and prevent water accumulation, enhancing safety and hygiene in residential, commercial, and industrial environments.

CI Cast Iron - Page 79

For use in unfinished floors, such as plant rooms and car parks. Suitable for restoration and refurbishment projects to match period architecture.

NB Nickel Bronze - Pages 80-82

For use in pedestrian areas to suit a variety of floor finishes, including ceramic and vinyl tiles, marble, paving, terrazzo, resin and wood.

SS Stainless Steel - Page 83-85

For use in high specification applications, including food preparation areas, prison cells, showers, and areas where high corrosion resistance is a requirement.

Direct Connection Rodding Eyes - Range Summary

Direct Connection floor drainage rodding eyes are specialised fixtures designed to facilitate easy access and maintenance of underground drainage pipes. With their robust construction and user-friendly design, they are suitable for use in residential, commercial, or industrial settings, and play a crucial role in ensuring efficient and effective drainage system management.

CI

Cast Iron - Page 90

For use in unfinished floors, such as plant rooms and car parks. Suitable for restoration and refurbishment projects to match period architecture.

NB

Nickel Bronze - Page 87-88

For use in pedestrian areas to suit a variety of floor finishes, including ceramic and vinyl tiles, marble, paving, terrazzo, resin and wood.

SS

Stainless Steel - Page 89

For use in high specification applications, including food preparation areas, prison cells, showers, and areas where high corrosion resistance is a requirement.

Bespoke Products

Bespoke Products

Your requirements, met by our products

At Wade, we understand that each building is different, and that the needs of a building will often change during its life. Whether you're working on new projects or refurbishment, we can offer a comprehensive, made-to-measure service, and provide best practice advice on projects large and small.

Virtually anything is possible when it comes to drainage; from aesthetic integrity for high-end specifications, to practical functionality for industrial drainage, Wade can help.

Our range of products in cast iron, stainless steel and nickel bronze can be adapted to create one-off, project-specific solutions for both heritage and contemporary buildings.

Equipped with the latest manufacturing technology, our in-house facility allows the design and manufacture of a wide range of products, including bespoke or made-to-measure solutions. Where applicable, processes are automated for efficiency and combined with a skilled workforce.

Bespoke Products

100L capacity commercial kitchen dump drain

Large commercial kitchens, such as those found in schools, hospitals and private sector restaurants, require an efficient means of dumping large amounts of water, often hot, from bratt pans and other similar appliances. This 100 litre capacity dump gully was designed and manufactured to meet the client's exacting specification.

- Bespoke 304 grade stainless steel floor gully.
- Designed to take 100 litres dumped from a kitchen bratt pan.
- For use in a flexible vinyl floor finish, with RPV edge for welding.
- Sump designed for compatibility with on-site pipework requirements.

Bespoke Products

New Everton FC stadium, Liverpool

Our ability to manufacture bespoke sizes, provides clients with total flexibility when it comes to aesthetics and performance. In this example, the client wanted to integrate the gully top into the floor covering to provide a seamless, unobtrusive design. We were able to produce a high specification stainless steel peripheral slot grating with square recess, to sit over a trapped gully, resulting in seamless surface water drainage.

- A custom-made, square-topped gully with recessed central cover for infilling with the floor finishes
- Peripheral drain slot, to suit the site floor finish, depth, functionality and aesthetic requirements
- Insert bottle trap and vari-level threaded pipework adaptor for ease of installation and performance.

Museum of London, Docklands London

Working closely alongside the installing contractors and architect, we can offer efficient, practical solutions to suit your project timeline and specification. Our technical team understands the pressures of meeting project deadlines and can offer advice on best practice for all manner of drainage configurations..

- A custom-made grade 304 stainless steel, 'L' shaped outlet, designed to receive and seal a damp-proof membrane.
- Restricted space on site meant that this narrow compact design was needed to allow sufficient room for installation whilst providing the right amount of flow for optimum drainage capacity.
- The project timeline dictated a quick turnaround, Wade was able to provide swift drawings for sign-off, and a short lead-time.

Specification - Care & Maintenance

Materials and finish of Wade floor gullies and access covers, described below, are selected to provide lasting performance and to blend with surroundings. The products require the minimum of maintenance, but periodic inspection should be carried out to ensure absence of matter which could impede drainage. Measures set out below will sustain appearance and prolong service life.

Stainless Steel - Grade 304 /316 SS

Used for bodies, gratings, funnels, rodding eyes, filter buckets and fixings.

A corrosion-resistant metal containing significant amounts of nickel and chromium; AISI grade 304 stainless steel is used as standard, which is suitable for general use in and around buildings including most coastal locations. In applications such as swimming pools or having an aggressive atmosphere, grade 316 is recommended and is available on request. An even higher grade may be required for applications in highly corrosive environments including where exposure to seawater may be anticipated.

Clean with soap and warm water rinse and wipe dry. Gratings may also be cleaned in certain dishwashers.

Under no circumstances treat with metal scouring pads, metal scrapers or wire wool as these will contaminate surfaces leaving rust spots.

Nickel bronze - BS EN 1982 NB

Used with satin finish for gratings, funnels and rodding eyes. A cast alloy with a fine grain effect which blends well with most floor finishes. The satin finish is generally maintained by the slight abrasive action of passing traffic. In unused areas the material will gradually tarnish. To restore lustre, apply a plain nylon scouring pad (not soap-filled) in the direction of the grain. Note: Avoid covering nickel bronze items with plastic sheeting after installation, otherwise blackening may occur.

Ductile iron - BS EN 1563 + 1564 DI

Used only for gratings. A casting with the ductility of steel, yet with more than twice the tensile strength of cast iron. A zinc anti-corrosion coating is applied by sherardizing.

Cast iron - BS EN 1561 CI

Used for bodies, membrane clamping collars, threaded pipework adaptors and accessories such as extensions. A widely used metal in the drainage industry, its resistance to corrosion permits extended use under extreme conditions. Castings are coated with a high grade lacquer paint to provide internal and external surface coverage. Paint will gradually wear off and is replaceable; oxidation (surface rusting) is a natural process which does not weaken the material. A zinc anti-corrosion coating is applied to certain castings by sherardizing.

Polypropylene PL

Used for the removable trap in stainless steel gullies. Maximum continuous operating temperature of 100°C.

ABS PL

Used for bodies, dip tubes, extensions and threaded pipework adaptors. A cost-effective, fire-resistant material, with a maximum continuous operating temperature of 75°C.

Nylon 6 PL

Used for bottle trap, filter bucket and ‘SuperSeal’ plug. Chosen for its toughness and durability; maximum continuous operating temperature of 180°C.

Neoprene PL

Used for gaskets and seals. Maximum continuous operating temperature of 100°C.

Nitrile PL

Used for O-rings in ‘SuperSeal’ plug assemblies. Maximum continuous operating temperature of 110°C.

Silicone rubber PL

Used for O-ring in removable bottle trap. Maximum continuous operating temperature of 250°C.

Specification - Glossary

RODDING EYE

Removable, solid cover set in a frame at finished floor level to enable access to pipework or services without disturbing the floor finish; most versions are sealed.

ADAPTOR

Component used to connect one item to another.

APERTURES

Openings in a GRATING which may be holes or slots.

AUXILIARY INLET

See SIDE INLET

BACK INLET

See SIDE INLET

BACKWATER VALVE

Non-return valve fitted to a GRATING or BODY which prevents the flow of foul water back into a drained area.

BELL TRAP

TRAP with vertical inlet and outlet on the same axis.

BODY

Bowl-like part of a GULLY, fitted below or in the floor, on which the GRATING is generally fitted and to which pipework is connected; may be trapped or non-trapped.

BODY ASSEMBLY

Body with factory-fitted components.

BODY COLLAR

See MEMBRANE CLAMPING COLLAR

BUCKET

Removable receptacle fitted within a GULLY to intercept solids, debris etc.

CHANNEL GRATING

Long, narrow gratings fitted in a channel, or frame, to provide linear drainage.

CLAMP COLLAR/RING

See MEMBRANE CLAMPING COLLAR

CLAMPING DEVICE

See MEMBRANE CLAMPING COLLAR

CLEANOUT

See RODDING EYE

COVER

See RODDING EYE

DAMP-PROOF MEMBRANE (DPM)

Protective covering generally laid on top of a structural slab in a ground floor to prevent damp from entering the building. When a GULLY is fitted in such a floor, the membrane is dressed on the FLANGE, into the mouth of the BODY, and clamped with a MEMBRANE CLAMPING COLLAR to ensure a watertight joint.

DEEP SEAL

WATER SEAL of 75mm or more.

DIRECT CONNECTION

Version of BODY/GRATING/COVER, outlet of which is is machined to enable direct connection to pipework.

EXTENSION

Accessory used to increase the effective height of a GRATING or COVER above a BODY.

FILTER BUCKET

See BUCKET

FFL

FINISHED FLOOR level.

FINISHED FLOOR

Floor covered with asphalt, carpet, ceramic tiles, flexible sheet, marble, paviers, resin, terrazzo, vinyl, or wood etc.

FLANGE

Part of the BODY leading to the mouth, over which the DAMP-PROOF MEMBRANE is laid.

FLEXIBLE SHEET

Flexible watertight finished layer for floors, affixed to the FLANGE by means of a CLAMPING COLLAR; requires GRATINGS and COVERS to suit.

FLOOR DRAIN

See GULLY

FLOW RATE

Maximum amount of liquid (litres/sec.) that can be drained, at a given head of water. See page 2 Design Considerations.

FRAME

Support for a GRATING or COVER which is connected to a BODY either directly or by means of a MEMBRANE CLAMPING COLLAR.

FUNNEL

Accessory to receive waste pipes, condensate lines or discharges from sinks, refrigeration units, boiling pans etc.

GRATE

See GRATING

GRATING

Removable component of a GULLY fitted at floor level; upper surface contains APERTURES to receive waste water; generally fitted in a FRAME; most versions are HEIGHT ADJUSTABLE (VARI-LEVEL or MULTI-LEVEL) and can be increased in height by means of an EXTENSION; versions available for DIRECT CONNECTION to pipework.

GRATING FREE AREA

Area of APERTURES in a GRATING, expressed in cm².

GULLY

Discharge fitting, the top of which is a GRATING or COVER, capable of installation at floor level, intended to receive waste water either through APERTURES in a GRATING and/or from pipes connected to the BODY of the gully, may be trapped or non-trapped.

HEAD OF WATER

Height of water above the GRATING, used to determine FLOW RATE.

HEIGHT ADJUSTABILITY

Facility to adjust the height of a GRATING or COVER above the FLANGE to suit floor level.

Specification - Glossary

I.D.

Internal diameter.

K3

LOAD RATING class, see page 2 for details.

L15

LOAD RATING class, see page 2 for details.

LOAD RATING

Capability to withstand loads, expressed in classes, or N/mm². (see page 2 for details).

M125

LOAD RATING class, see page 2 for details.

MEMBRANE CLAMPING COLLAR

Used to clamp a DAMP-PROOF MEMBRANE to a BODY; supplied with some series as part of the BODY, but on others it is an option. (See Section 5C for Vari-Level versions).

M.J.

Mechanical joint.

MULTI-LEVEL

Range of gullies in which the height of a GRATING may be adjusted to suit floor level, using a 'peg and cam' principle.

O.D.

Outside diameter.

OUTLET

Part of BODY through which waste water is discharged into connecting pipework.

'P' TRAP

TRAP with a vertical inlet, and an OUTLET inclined slightly below the horizontal.

PLANT ROOM

Part of premises housing machinery and/or services.

PLANTING AREAS

Gardens, shrubberies etc., may be located on a roof.

'Q' TRAP

TRAP with a vertical inlet, and an outlet inclined at 45° below the horizontal.

RAISING PIECE

See EXTENSION

RODDING EYE/POINT

See RODDING EYE

'S' TRAP

TRAP with a vertical inlet and an offset outlet parallel to it.

SEAL

See WATER SEAL

SIDE INLET

Permits the underfloor connection of other fixtures (sinks, wash basins etc) into a GULLY.

STRAINER

Meshed accessory used to intercept debris. (term is sometimes used by others to denote GRATING).

STREAMLINE (GRATINGS)

Stainless steel (304) reverse wedge profile with 5mm slot width. Grade 316 available to order.

SUMP

Bowl of BODY; large sump enables sudden surges of waste water to be retained, thereby controlling flow through the GULLY.

SUPERSEAL

Range of quick-release, double-sealed RODDING EYE.

THREAD

Four standard types are used in Wade GULLIES:

BSP

(British Standard Pipe) - outlet thread of a BODY, connection to SIDE INLET;

BSPT

(British Standard Pipe, Tapered) - thread on screw-in THREADED PIPEWORK ADAPTORS;

NPSM

(National Pipe Straight Mechanical) - thread on GRATINGS allowing easy height adjustment when installed with BODY, MEMBRANE CLAMPING COLLAR, or ADAPTOR; Metric-I.S.O. - thread used for all fixing screws, studs etc.

THREADED PIPEWORK ADAPTOR

Converts threaded outlet BODY to a spigot outlet allowing connection to pipework using a proprietary coupling.

TRAP

Removable or integral part of a BODY which prevents, by means of a WATER SEAL, the passage of foul air from the outlet to the inlet.

TRAP SEAL

See WATER SEAL

TUNDISH

See FUNNEL

UNFINISHED FLOOR

Generally, bare concrete.

UNI-LEVEL

Range of gullies with non-height ADJUSTABLE grating.

VARI-LEVEL

Range of gullies comprising various BODIES which accept various GRATINGS and COVERS which are HEIGHT ADJUSTABLE with a fine thread to enable accurate installation at FINISHED FLOOR LEVEL.

VINYL

A form of flexible sheet flooring; requires GRATINGS and COVERS to suit.

WATER SEAL

Effective height of water (min. 50mm) in a trap which prevents the passage of foul air.

WEEPHOLES

(Optional) holes located in a MEMBRANE CLAMPING COLLAR or a BODY which provide supplementary drainage at membrane level.

Quality by Tradition • Performance by Design
