Rainwater Overview

For almost 90 years, Alumasc has been promoting the efficient use, retention, recycling and disposal of water. Under the Alumasc Water Management Solutions (AWMS) banner, customers benefit from a complete package of rainwater and drainage products that control the flow of rainwater throughout the entire building envelope; all supported by our unrivalled technical teams.

Within the AWMS portfolio, sits Alumasc Rainwater Systems: the UK's market-leading manufacturer of metal gutters and downpipes, and the only UK manufacturer to offer systems in Aluminium, Cast Iron, Galvanised Steel, Copper and Zinc. Systems are available to suit both traditional and contemporary architecture, with BBA approved powder coated finishes and bespoke design options, all manufactured to the highest standard for strength, long life and durability.

Heritage Cast Aluminium

Heritage is a comprehensive range of traditional gutter profiles, round, square and rectangular pipes, and all associated fittings and accessories.

Contemporary Aluminium

This premium, high-performance rainwater range features the Aqualine and AX extruded aluminium gutter systems, GX pressed aluminium gutter system, Flushjoint extruded aluminium pipe system, Swaged aluminium pipe system and Guardian extruded aluminium security pipe system.

Apex Cast Iron

Apex Heritage is a comprehensive range of traditional gutter profiles, round, square and rectangular pipes and all associated fittings and accessories. Designed to provide all the essential architectural features appropriate to traditionally designed buildings, the Apex Heritage range is also fully in tune with modern fast track building contracts.

Infinity Rainwater Systems

The Infinity range is a lightweight range of contemporary, eco-friendly and cost effective alternative to plastic gutters, without the risk of shrinking, leaking or colour fading. The gutter is available in a choice twelve finishes and two profiles along with a connecting round downpipe system.

Complimentary Products

Alumasc Water Management Solutions provides a wide range of products and services to support and compliment your project. With our nationwide network of sales and support teams we are able to bring your most complex of projects to life.

Skyline Architectural Aluminium

Skyline aluminium fabrications are manufactured by Alumasc exclusively in the UK, and delivered fully finished to site ready for installation. Our experienced technical teams are always available to provide advice and support.

Our objective with Skyline Architectural Aluminium is to stimulate architects to push their creativity to the limit with designs of aesthetic merit, high performance and low maintenance. Promotion of sustainability is central in the Skyline ethos of providing whole life cost benefits. High performance and sustainability go hand-in-hand with low maintenance aluminium manufactured from materials that are 100% recyclable.

Skyline Architectural Aluminium embodies integrated design solutions that are relevant to all aspects of the aesthetic and functional performance of buildings. Alumasc has a long pedigree of over 50 years of industry experience and product development, working with architects to create some of the most ambitious and prestigious projects in the UK.

Continuing research and development has seen our product offering develop and expand to meet the needs of modern construction projects. We were early leaders in recognising the potential of aluminium in building and of the innovative role this versatile material can play. From a core, trusted range of Skyline Fascia, Soffits and Copings, Skyline Architectural Aluminium has evolved to also include Skyline Window Surrounds, Door Canopies, Anti-Climb Barriers, Column Casings and Architectural Planters.

Alumasc is now the leading UK supplier of architectural aluminium fabrications, which are delivered to site ready for installation.

The benefits of Skyline Architectural Aluminium solutions include functionality combined with aesthetic quality, colour coordination and bespoke manufacture. There are no limits to the size and type of project undertaken, and we offer full guidance to professional installers.

Aluminium Colour Options

Alumasc Aluminium Rainwater Systems are available in plain mill finish or in our range of BBA approved polyester powder coatings. The standard aluminium RAL range offers a choice of 29 colours, all with a 30% gloss finish unless otherwise stated.

Traditional & Contemporary Aluminium Rainwater Systems: In-House Powder Coatings

Alumasc's in-house powder coating plant gives both the control and the freedom to produce a range of colour finishes to a level not typically available in the construction industry. Utilising the technologies and procedures adopted for its automotive precision castings division, Alumasc benefits from high specification coating techniques that fulfil the rigors of testing prescribed by some of the world's leading vehicle producers. Finishes of this quality maintain their appearance even when subject to harsh geographical weather conditions.

The aluminium undergoes a series of pretreatments to provide the ideal prepared surface to receive an electrostatically applied polyester powder in the chosen colour. This is then 'baked' and bonded to the fitting in a carefully controlled oven; the complete process is achieved on a continuous line to obtain the best results. The performance of polyester powder coated rainwater systems greatly exceeds that of site painted systems.

Approvals & Quality Control

Polyester powder coating is in accordance with BS EN 12206-1:2004. This refers to the coating of aluminium and aluminium alloys for architectural purposes. In the case of rainwater systems it is accepted that such a coating is both decorative and protective. Alumasc systems will certainly be finished to this standard, and in most cases will exceed it.

Along with independent auditing to the ISO 9001:2008 Quality Management Standard, Alumasc maintains BBA certification for the powder coating of its aluminium rainwater goods in respect of longevity of performance and colourfastness - British Board of Agrément Certificate No. 86/1671.

Choice of Colour

The standard aluminium colour range comprises 29 colours and additional colours with a BS or RAL number available to special order, subject to quantity and cost.

The colours reproduced on this page are for general guidance only.

Please contact customer services for further information on colour choice and samples.

Aluminium Colour Options

Alumasc Aluminium Rainwater Systems are available in plain mill finish or in the Raincote range of BBA approved polyester powder coatings. The standard aluminium RAL range offers a choice of 29 colours, all with a 30% gloss finish unless otherwise stated.

Traditional & Contemporary Aluminium Rainwater Systems: In-House Powder Coatings

Alumasc's in-house powder coating plant gives both the control and the freedom to produce a range of colour finishes to a level not typically available in the construction industry. Utilising the technologies and procedures adopted for its automotive precision castings division, Alumasc benefits from high specification coating techniques that fulfil the rigors of testing prescribed by some of the world's leading vehicle producers. Finishes of this quality maintain their appearance even when subject to harsh geographical weather conditions.

The aluminium undergoes a series of pretreatments to provide the ideal prepared surface to receive an electrostatically applied polyester powder in the chosen colour. This is then 'baked' and bonded to the fitting in a carefully controlled oven; the complete process is achieved on a continuous line to obtain the best results. The performance of polyester powder coated rainwater systems greatly exceeds that of site painted systems.

Approvals & Quality Control

Polyester powder coating is in accordance with BS EN 12206-1:2004. This refers to the coating of aluminium and aluminium alloys for architectural purposes. In the case of rainwater systems it is accepted that such a coating is both decorative and protective. Alumasc systems will certainly be finished to this standard, and in most cases will exceed it.

Along with independent auditing to the ISO 9001:2008 Quality Management Standard, Alumasc maintains BBA certification for the powder coating of its aluminium rainwater goods in respect of longevity of performance and colourfastness - British Board of Agrément Certificate No. 86/1671.

Choice of Colour

The standard aluminium colour range comprises 29 colours and additional colours with a BS or RAL number available to special order, subject to quantity and cost.

The colours reproduced on this page are for general guidance only.

Please contact customer services for further information on colour choice and samples.

RAL 1013M Pearl White Matt		RAL 7016M Anthracite Grey Matt*		RAL 8017M Chocolate Brown Matt

Apex Cast Iron Colour Options

Alumasc Cast Iron Rainwater systems are available in a range of 8 standard colour options to suit tradition heritage projects. Alumasc's in-house paint plant produces a certified factory painted high quality two-pack epoxy primer and a top coat finish.

Pre-finished painted black

Apex Heritage Cast Iron Rainwater - Painted

Apex Heritage Cast Iron offers renowned quality and is available pre-painted on all four gutter profiles (Half Round, Victorian Ogee, Beaded Half Round and Moulded) plus the full range of circular or square/rectangular downpipes with authentic socketed joints.

Now available in 8 standard colours to suit traditional heritage projects, other RAL colours are available on request.

The high-performance two-pack epoxy primer and a top coat finish is factory-applied under controlled conditions and has been successfully developed to give a smooth and long-lasting finish to the cast iron. The new 'certified factory-painted finish' marque guarantees the product has received the fully painted finish. This is certified with approved stickers on the product giving both the client and specifier piece of mind.

By removing the need for on-site pre-installation painting, Alumasc's painted cast iron offers the following benefits:

- 60% saving on time, as there is no need to paint several coats on site
- Quicker installation and less disruption on site
- 30% saving on cost as there is no need for extra labour to paint on site
- The painted finish only costs 20% more than the primed finished product
- Durable, even and long-lasting finish
- Independent tests carried out on the finish, confirm excellent resistance to salt, heat and frost

Factory-applied oxide primer

Apex Heritage Cast Iron Rainwater - Primed

A factory-primed finish is also available with a one coat oxide primer. This primer will give protection against corrosion during transportation and short-term undercover storage, and will provide a suitable surface for additional painting. On-site handling and painting are the responsibility of the contractor.

Alumasc recommends that a further priming coat be applied on site, followed by 1 undercoat and 2 gloss coats of an alkyd paint system. All individual elements should receive the first gloss coats before fixing, and be finished with the final gloss coat after the installation is complete. It is advisable to take the paint finish inside collars and within the ends of rainwater pipes to avoid the possibility of rust staining.

Colours are reproduced for general guidance only. For exact colour and finish references, swatch samples, or any further information, please contact Alumasc.

Infinity Rainwater Materials and Finishes

Quality and suitability of materials is a key design consideration when choosing the correct material for rainwater applications. Infinity rainwater systems are available in a wide range of materials that offer smart, contemporary and sustainable choices for all projects.

Materials

GS Galvanized Steel

- Stable material with only 1.2mm/m 100k thermal Expansion
- Ideal for traditional and modern buildings in both new build and refurbishment applications
- A competitive alternative to uPVC systems, with increased flow rates and longevity
- Low maintenance system
- Lightweight, stylish and long lasting
- Environmentally friendly and fully recyclable
- 15 year warranty 5km from the sea

ZM ZM Galvanized Steel

- Environmentally friendly and fully recyclable
- Slower natural weathering process
- Enhanced protection with 310g/sqm metallic coating
- Market leading **full system warranty** for C4 environments
- Up to 15 year warranty for C4 environments (ca. 300m-2000m from the seafront)
- Up to 20 year warranty for C3 environments (ca. 2000m plus from the seafront)

CG Coated Galvanized Steel

- Available in 7 finishes including black, anthracite grey, white and 4 other colours
- Stable material with only 1.2mm/m 100k thermal Expansion
- Scratch resistance ≥ 30 N according to EN13523-12:2004
- UV-resistance RUV 4 according to EN10169-2
- Low maintenance system with no need to repaint
- Environmentally friendly and fully recyclable
- 15 year warranty 2km plus from the sea

Cu Copper

- The natural properties of copper means that this material is corrosion resistant meaning that it will never rust
- Non-magneticThe copper patina visibly changes colour beautifully with age
- Environmentally friendly and fully recyclable

NZ Natural Zinc

- When Natural Zinc is damaged or scratched, it has self healing properties
- Consistent texture and finish that does not change over the lifespan of the product
- Environmentally friendly and fully recyclable

QZ Quartz Zinc

- The Quartz Zinc shade is already pre-weathered therefore will maintain its colour finish
- Resistant surface to the accumulation of dirt and debris, ensuring that good waterflow and discharge rates are maintained
- Permanent corrosion prevention
- Environmentally friendly and fully recyclable

Technical Support

We offer full technical and project support as standard. We have a national network of Area Sales Managers, and provide technical, design, and after-sales support from our manufacturing and sales office in Burton Latimer, UK.

- Free Site Survey
- Product Samples
- Take-offs and Estimations
- Rainwater Calculations
- Supply & Fit Options
- UK Wide Coverage
- Project Support
- After-sales Support

For Project Quotations, Customer Service, Technical & Sales Orders call or email:
