# About Protektor Wemico

**Protektor Wemico is the roof and facade designers' provider of choice for high-quality aluminium roof coping solutions.**

Protektor Wemico offers a range of off-the-shelf, quick delivery, aluminium copings and ancillary components. We also supply custom copings in a wide range of sizes and RAL colours.

Our time-tested range includes straight lengths, prefabricated corners, upstands and stop-ends together with Protektor Wemico's unique, wind-tested coping bracket system, designed and tested to withstand even the most extreme weather conditions.

# Key Features

## of Protektor Wemico Copings

### Reduced Lead Times

Available ex-stock in anthracite grey, typically delivered within 48 hours. All sizes held uncoated ready to be powder coated to any standard RAL colour.

### Secondary Protection

Protektor Wemico copings can be installed over a secondary waterproof membrane, providing two lines of defence and guaranteeing a waterproof solution.

### Weatherproof

Roof copings protect the parapet wall with the integral fall directing water onto the roof area.

### Custom Copings

Non standard options are available to suit your requirements. Site visits are available upon request.

### Wind Uplift

Protektor Wemico roof copings are tested under extreme conditions to withstand static wind speed loads of up to 6kN (220mph).

### Warranty

A warranty of up to 30 years is available upon request at the point of order (location dependent).

### Easy to Install

Designed to be easy to install. The coping lengths, corners and upstands simply snap onto heavy-duty sloping brackets. To complete your installation, end caps are available to suit.

# Standard Copings

Protektor Wemico sloping aluminium copings are designed to provide a durable, long-lasting protective closure system for parapet walls. Designed in a range of sizes to suit a variety of wall types. **Standard copings are stock items.**

Our skilled technical support team will work with you on more complex roof and parapet details, offering a comprehensive prefabrication design service. Designed for easy installation on-site, providing a secure secondary seal.

# Membranes

Wemico Membranes provide an ancillary waterproof barrier suitable for use with our coping systems.

This product is available in a variety of sizes and is designed for easy installation on-site, providing a secondary line of defence.

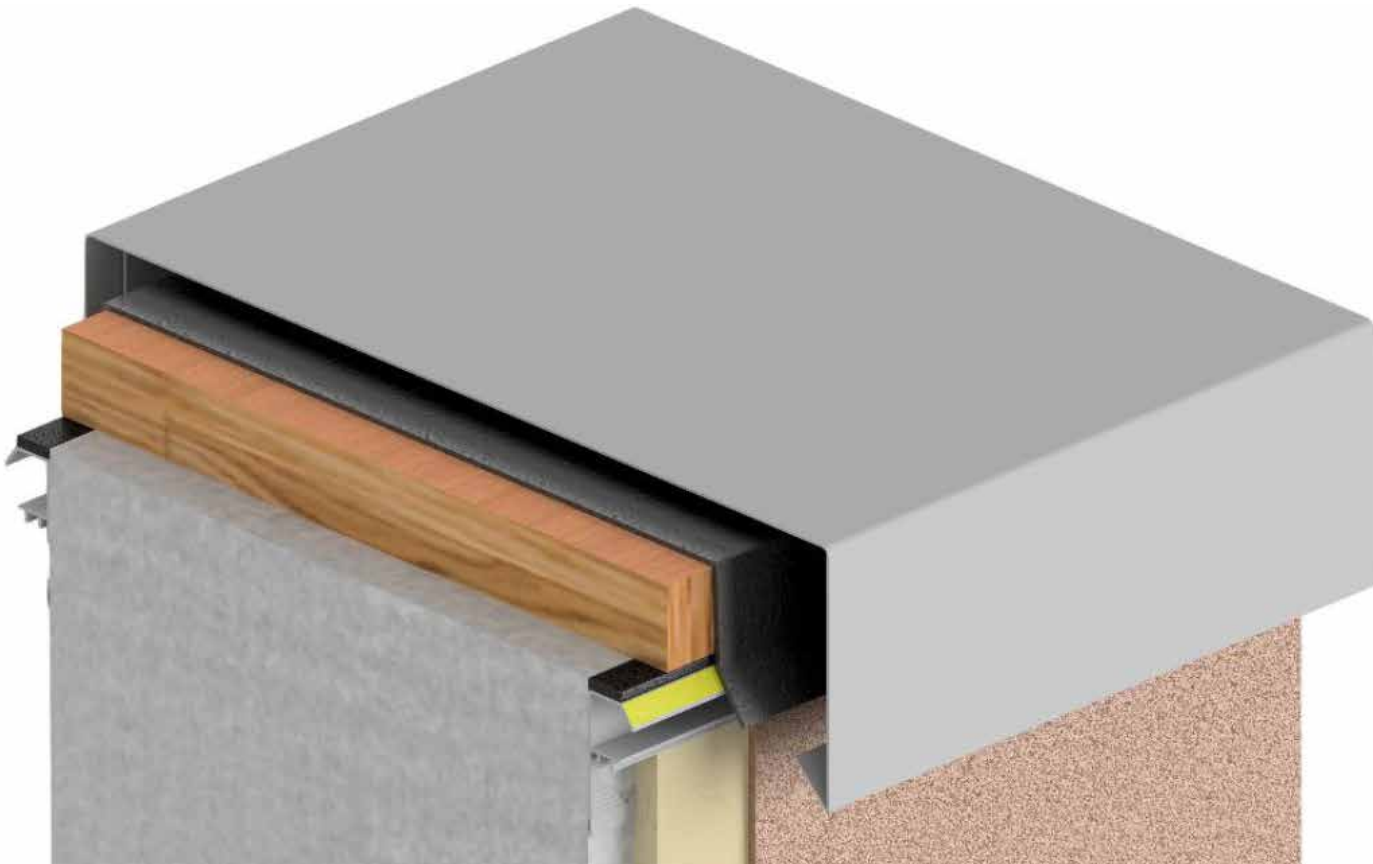

A2 Membrane			
CODE	SIZE DIM A	DESCRIPTION	LENGTH
MEMBRANE-A2 250	300mm	A2 FIRE MEMBRANE	10m
MEMBRANE-A2 300	300mm	A2 FIRE MEMBRANE	10m
MEMBRANE-A2 350	300mm	A2 FIRE MEMBRANE	10m
MEMBRANE-A2 400	500mm	A2 FIRE MEMBRANE	10m

Other sizes available to order.

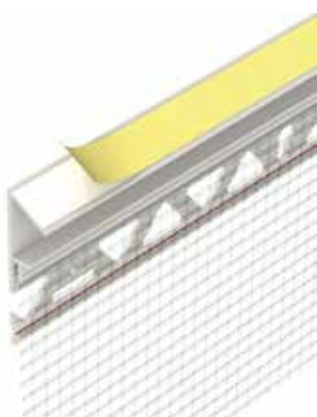

Universal Membrane			
CODE	SIZE DIM A	DESCRIPTION	LENGTH
MEMBRANE-UNIV 250	250mm	UNIVERSAL MEMBRANE	25m
MEMBRANE-UNIV 300	300mm	UNIVERSAL MEMBRANE	25m
MEMBRANE-UNIV 350	350mm	UNIVERSAL MEMBRANE	25m
MEMBRANE-UNIV 500	500mm	UNIVERSAL MEMBRANE	25m

Other sizes available to order.

# Connection Profiles

**PAS-PRO Connection Profiles provide a water tight seal between render and parapet that protects from driving rain and ensures optimum weather tightness.**

PAS-PRO - Connection Profile (37207)			
CODE	RENDER	DESCRIPTION	LENGTH
37207	6mm	Connection Profile	2.5m

PAS-PRO - Connection Profile (37214)			
CODE	RENDER	DESCRIPTION	LENGTH
37214	8mm-14mm	Connection Profile	2.5m

# Powder Coating

Protektor Wemico aluminium copings are available in a **variety of colours**. Our highly durable polyester powder coatings are available to order in any standard RAL colour.

The polyester powder coating provides a hard, durable finish that is UV-resistant and weatherproof.

An optional product guarantee is available for a period of up to 30 years (if requested at point of order).

Please contact us for advice on our standard range of colours.

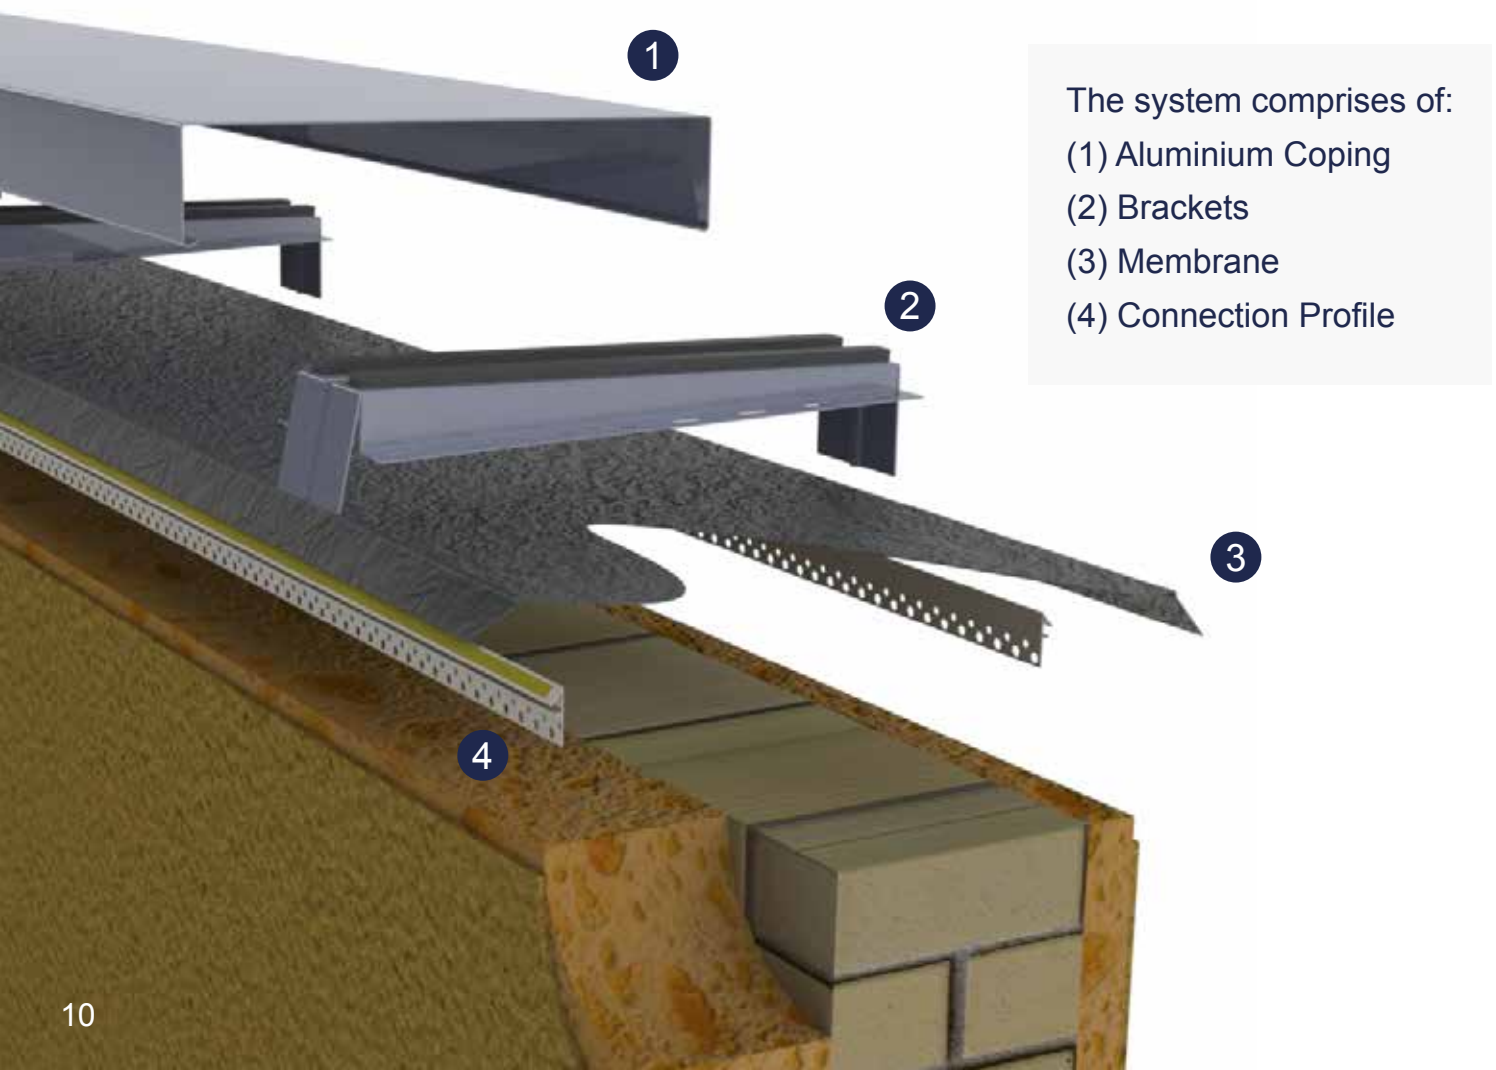

# Installation

Protektor Wemico copings are **designed and engineered** to be mounted on aluminium top hat brackets for maximum security.

Protektor Wemico brackets are designed to be highly resistant to wind uplift. The brackets are suitable for most substrates (subject to the use of appropriate fixings).

We would advise fitting our copings with ancillary weatherproof membranes and connection profiles, which will help to protect against driven rain and provide a watertight system seal.
