## Anti Graffiti Coatings

Excellence  
in paint  
since 1890

Johnstone's 2 Pack, water based Anti Graffiti Coatings have been formulated to provide a permanent, easily cleaned Anti Graffiti finish for all types of internal and external surfaces. On application it provides a seamless, tile-like surface enabling easy removal of graffiti, grease and other contaminants leaving no residue shadowing.

Applied as a system to a non-combustible substrate such as stripped, bare or newly plastered walls, Johnstone's 2 Pack Anti Graffiti Finish and Glaze gives a Class 'O' fire rating, providing an important first line of defence against the spread of fire.

## System Specification

In order to create a permanent anti graffiti surface the following specification should be used  
For a white or pastel finish:

- 1 coat of Johnstone's 2 Pack Adhesion Promoting Primer
- 2 coats of Johnstone's Anti Graffiti Finish

For a clear satin glaze:

- 1 coat of Johnstone's Stormshield Stabilising Solution
- 2 coats of Johnstone's Anti Graffiti Glaze

## System Features

- **Water based** Environmentally friendly and non hazardous. Easily and safely applied
- **Class 'O' fire rating** Achieves Class 'O' when applied to a non-combustible surface
- **Easily cleaned** Easier to clean than textured surfaces
- **Permanent system** A 2 pack polyurethane formulation that gives a satin finish, will withstand repeat cleaning
- **Reduced life cycle costings** Resistant to mould growth and chemicals, ensures a durable long life system

## Please Note

- For detailed application instructions, please refer to individual product data sheets or the back of the tin.
- To achieve Class 'O' ensure application instructions and coverage rates are followed exactly.
- Drying/curing times will vary according to climate conditions.

## Intended Uses

Public buildings are prime targets for vandalism through the use of spray paints, inks, marker pens and paint.

Johnstone's Anti Graffiti Coatings provides a solution to this growing problem of graffiti.

Johnstone's Anti Graffiti coatings are ideal for use in the following areas:

- Communal areas
- Staircases and corridors
- Multi storey housing
- Traditional housing
- Public buildings
- Leisure centres
- Sheltered housing
- Airports and stations
- Car parks
- Prisons
- Hospitals
- Schools and colleges
- Public transport infrastructure

## 2 Pack Adhesion Promoting Primer

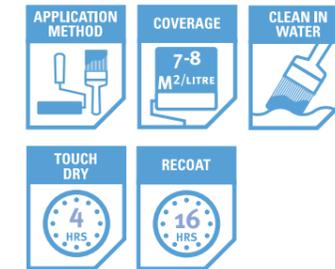

Size 2.5L (2 Litre Base + 0.5 Litre Activator)

This water based curing system promotes adhesion on difficult substrates. For use with Johnstone's 2 Pack Anti Graffiti Finish.

- White
- Water based
- Interior & Exterior Use
- Maintains and preserves the appearance of the surface

### Ideal Usage:

Masonry, Tiles, Metals, Concrete and previously painted surfaces

## 2 Pack Anti Graffiti Finish & Glaze

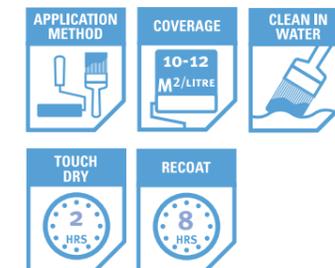

Size: 5L (4.3 Litre Base + 0.7 Litre Activator)

Johnstone's 2 Pack Anti Graffiti Finish & Glaze have been specifically formulated to provide a permanent and easily cleaned anti graffiti finish for all types of internal and external surfaces. The water based formulations are quick drying to ensure rapid project completion with minimal disruption. Available in clear and a range of pastel shades.

- Class 'O' on non combustible surfaces
- Polyurethane
- For interior and exterior use
- Water based
- Permanent system
- Non-yellowing Satin finish
- Excellent chemical and abrasion resistance
- Resistant to mould growth

### Ideal Usage:

Brick, masonry, natural stonework and other areas prone to graffiti

## Graffiti Remover

Size: 5L

Johnstone's Graffiti Remover is used for the removal of graffiti from surfaces already protected with Johnstone's Anti Graffiti Coatings.

- Quick and easy to use
- Leaves no shadowing/ghosting

### Ideal Usage:

Brick, masonry, natural stonework and other areas prone to graffiti
