

WALK THRU STAIRWELL ACCESS

Walk Thru Stairwell Access has been designed as a safe solution to stairwell maintenance which is traditionally undertaken using boards and step ladders. The system provides users with a stable working platform above a staircase, whilst still allowing access up the stairs to the first floor. This is achieved by simply rolling back the aluminium slatted decking as required.

Technical Description

- ▶ Length adjustment 1.5m, 2m, 2.5m (longer to order)
- ▶ Height adjustment 1.7m – 3.17m (higher to order)
- ▶ Material High grade aluminium
- ▶ Supplied with stabilisers and fully adjustable handrails
