

# ▶ TRIMLINE SYSTEM

The Trimline System has been designed specifically for fascia, soffit or gutter replacement on standard sized homes.

A standard Trimline System comprises two Mono-Dec Access Platforms with a Catwalk spanning between them. The System also includes two Rolling Window Bars and a pair of Stand-Offs with wheels for tackling deep soffits and obstacles such as downpipes or satellite dishes. An End Support Frame is available to accommodate limited access situations.

## Technical Description
