

# ▶ Loft Safety Products

## Features and Benefits

- ▶ Heavy duty rubber on base to prevent accidental electric shocks
- ▶ Anti-slip strips fitted to top of slats
- ▶ Rolls or folds away for easy storage
- ▶ Allows safe access to loft space whilst working
- ▶ Easily transportable
- ▶ Simple and quick to use

## Joist Safety Matting and Loft Hatchway Safety Cover, simple, safe access for loft work.

Our Joist Safety Matting is designed specifically for the safe laying of loft insulation between joists, and prevents the age old problem of putting your foot through the ceiling. It's lightweight, easily manoeuvrable and simply rolls out to cover the space between the joists.

The Loft Hatchway Safety Cover is intended to provide a strong, safe, simple to use, temporary cover for protection during work in domestic lofts. Like the matting, it folds away, and once fixed in place can still be opened and closed without having to totally remove it.

Both products shown rolled and folded for storage

## Technical Specification

▶ Weight Joist Safety Matting 400	5.8 kg
▶ Weight Joist Safety Matting 600	8.0 kg
▶ Weight Hatchway Safety Cover	6.5 kg
▶ Size Joist Safety Matting 400	45 cm x 100 cm
▶ Size Joist Safety Matting 600	65 cm x 100 cm
▶ Size Hatchway Safety Cover	70 cm x 85 cm
▶ Material	high-grade aluminium

### Compliance

- ▶ EN12811

## Joist Safety Matting

Made from hollow aluminium slats that roll up into a tight bundle, the mats are available for both 400 mm and 600 mm joist centres and in 1 m lengths that can be joined if required. The undersides of the slats are covered in heavy duty rubber to prevent accidental electric shock and the top side has anti-slip strips fitted.

## Loft Hatchway Safety Cover

The unique design incorporates folding hollow aluminium slats that hinge to allow access and egress during working. Fixing is by screwing or clamping to the edge of the hatchway. The top side of the slats have anti-slip strips fitted.
