

Why Not Automate Your Canopy Garage Door?

Using the all NEW ProMatic Canopy Door Operator.
More convenience and no loss of drive through height.

HÖRMANN

NEW PROMATIC CANOPY OPERATOR

Security & Safety

Worried about security?

This "world first" provides safe and secure automation for your canopy door. Worried about getting out of your car at night in the dark to open your Up-and-over garage door, with the new ProMatic canopy operator there is no need, open the door drive in and shut the door behind you. All with the press of a button before needing to leave the security of your car!

Convenience

Tired of getting out of the car in poor weather?

With a Hörmann canopy operator you can keep the weather out, you will no longer have to open up your Up-and-over door manually. The ProMatic operator comes with two, four-button hand transmitters. This means you can open or close your garage door in the comfort of your home or car whatever the weather.

ProMatic Operator

Hörmann have developed a brand new canopy door kit which, when added to the tried and tested ProMatic operator, provides smooth and trouble-free automatic opening of your garage door at the touch of a button with the BiSecur radio technology to ensure additional security.

Canopy door operator kit

The advantages ...

- unrestricted drive-through height
- no unsightly arm fitted to the rear of the door
- no additional modifications to your existing door
- quick and easy to retrofit
