The right door for every room – your security is guaranteed

Whether it is a new construction or modernisation, Hörmann offers the right door with suitable functions for houses and blocks of flats, schools and authorities and for industrial and trade buildings: Whether it is security doors for side or front entrances, fire-retarding doors for heating rooms, multi-purpose doors for work and utility areas or internal doors for offices and classrooms, you are guaranteed to find your preferred door in the Hörmann steel doors programme. Discover all the advantages and functions of our high-quality steel doors and individual design possibilities on the following pages.

Blocks of flats

Schools and authorities

Industrial and trade companies

The classification of the individual doors shows you at a glance which functions the respective door fulfils and for which characteristics – from highly suitable (★★★★★ / 5 stars) to unsuitable (no stars).

“A good reputation must be earned.”

August Hörmann

In keeping with the tradition started by the company's founder, the name Hörmann delivers brand name quality with extensive product expertise. The family business has over 80 years of experience as a construction component specialist and sees itself as your partner from the very beginning of building and renovation projects. It's no surprise that Hörmann is one of Europe's most successful door providers. This makes a Hörmann door a reassuring purchase.

1 Quality products from Germany

All doors are developed and manufactured by Hörmann. Our highly qualified employees work intensively on new products, continual further developments and improvements to details. The results are patents and unique products on the market. Endurance tests under real conditions ensure **mature series products with Hörmann quality.**

2 Doors for generations

We are convinced of our products and our uncompromising quality assurance. That is why **you will enjoy a Hörmann function door in your house for many years.**

3 An eye on the future

Hörmann is setting a good example. This is why the company obtains **100 % of its energy consumption from green sources.** Together with an intelligent and certified energy management system, CO₂-neutral mailing and the recycling of valuable materials, **more than 40000 tons of CO₂ are saved each year.** And last but not least, Hörmann also offers products for sustainable construction.

4 Up to 49 % improved thermal insulation

You are looking for basement and side doors with the same thermal insulation as your entrance door? Then our security door KSI Thermo46 and multi-function doors MZ Thermo46 and MZ ThermoPlus65 are the right choice for you: **the MZ ThermoPlus65 provides up to 49 % better thermal insulation than conventional multi-purpose doors.**

Further information can be found on pages 10 / 11 or 14 / 15.

5 Break-in-resistant RC 2 security equipment

Security doors KSI 40 / KSI Thermo46 are available **with approved, break-in-resistant RC 2 security equipment as standard.** For you, this means: feeling even more secure in your own home. For the steel construction project door H3 OD, the equipment is optionally available as an additional function.

* Up to 49 % better thermal insulation for the MZ Thermo65 compared to a conventional multi-purpose door

Our security doors' certified break-in resistance is also recommended by police information centres.

6 Steel profile frame VarioFix

For the Hörmann steel profile frame VarioFix, wall tolerances of up to 20 mm are no problem: The adjustable decorative rebate easily compensates for different wall thicknesses during renovations and new construction projects. As easy to fit as a timber frame, the steel profile frame is additionally distinguished by its long service life and attractive design. **Only VarioFix offers high resistance and an elegant shape without visible foldback coupled with the fitting principle of timber frames.** Additional information about our frame types can be found on pages 30 / 31.

7 Door operator PortaMatic

Are you physically disabled or would you simply **like more convenience**? Then equip your internal doors with the innovative door operator PortaMatic. This allows you to **automatically close and open** the doors via a hand transmitter or button, improving your **quality of life**.

KSI Thermo46

High security and the best thermal insulation

Thanks to the door leaf with thermal break, the security door KSI Thermo46 offers the best thermal insulation and reduces the risk of condensation forming in heated rooms. The break-in-resistant RC 2 security equipment means you can also feel secure in your home. We recommend using this quality door as an external door for basements, outbuildings and garages.

External door for

- Basements
- Heated outbuildings
- Garages with direct access to the house

Ready-to-fit door set

Door leaf and frame with thermal break, door leaf galvanized and painted in Traffic white (similar to RAL 9016)

Single-leaf

Break-in-resistant, RC 2 according to DIN EN 1627 on closing side

Thermally insulated

$U_D = 1.1 \text{ W/(m}^2\cdot\text{K)}$

The same thermal insulation as with entrance doors

These days, saving energy is important throughout the entire home. The security door KSI Thermo46 provides excellent thermal insulation thanks to the **door leaf filled with PU rigid foam**; door leaf, frame and threshold all come with **a thermal break**. The door also features double seals on all four sides. With all of this, the KSI Thermo46 has a thermal insulation value usually only found in entrance doors.

Security as standard

Basement and side doors are often weak spots when it comes to security. In this respect, the KSI Thermo46 offers the best equipment as well: 2 conical swing bolts and 2 additional security bolts **4** and 1 lock bolt **3** engage in the frame's lock plate and firmly pull the door shut. 3 further security bolts **5** and 3 guide rollers **2** on the hinge side make it practically impossible to force the door open.

The security door KSI Thermo46 features a 46 mm-thick door leaf and a very good thermal insulation value of up to $1.1 \text{ W/(m}^2\cdot\text{K)}$.

* Up to 30 % better thermal insulation compared to a conventional security door

KSI 40

The proven classic for more security

Basement entrances, outbuildings and garages are often equipped with old doors that can be forced open in seconds. Always remember: if the basement door is open, the whole house is accessible. This is why we recommend the security door KSI 40 with standard security equipment for these areas.

Page 32

Sturdy door leaf

The KSI 40 features a double-skinned, 40-mm-thick door leaf with 3-sided thick rebate and sheet steel on both sides (0.8 mm). The stability of the door leaf is a result of the all-round reinforcement frame and the mineral wool insert which is glued over the entire surface. A 3-sided EPDM seal and double lip seal (incl. aluminium semi-circular threshold as a bottom edge) seal the door reliably. This means you can always rely on the door in terms of function and tightness. Hörmann offers this door as a complete set with frame.

High security

The standard security of the KSI 40 lets you and your family sleep peacefully, as it comes with pull-off protection and a drill-resistant security lever / knob handle set **3**. The solid steel bolts on the hinge side **5** make it almost impossible to force the door open. The KSI 40 has been tested in accordance with European standard DIN EN 1627 on the opening and closing side and has resistance class 2.

1.5-mm-thick corner frame with all-round seal

3-part hinge (standard)

Three-way adjustable VX hinge (on request)

Solid steel security bolts on the hinge side

MZ Thermo65 / MZ Thermo46

External doors with thermal break and the best thermal insulation values

The multi-purpose doors are more than just extremely robust. Thanks to the thermal break, they offer up to 49 % better thermal insulation and reduce the risk of condensation forming in heated rooms. They are available with or without glazing as well as in numerous colours and decor surfaces.

TPS 051: $U_D = 1.6 \text{ W}/(\text{m}^2 \cdot \text{K})$

TPS 021 / 051 glazing

Double insulated glazing (24 mm) with a U-value of up to approx. $1.4 \text{ W}/(\text{m}^2 \cdot \text{K})$, with synthetic glazing frame

Glazing THP 051

Triple insulated glazing (46 mm) with a U-value of up to approx. $1.0 \text{ W}/(\text{m}^2 \cdot \text{K})$, with synthetic glazing frame

High thermal insulation

The MZ Thermo65 / MZ Thermo46 multi-purpose door will help you reduce heating losses permanently. The door leaf with PU rigid foam infill, frame and threshold all come with a thermal break. This and the all-round double seals on all four sides make sure the door is perfectly sealed and improves thermal insulation by up to 49 % compared to a conventional multi-purpose door.

Stability and functionality

The MZ Thermo46 / MZ Thermo65 is exceptionally stable and robust thanks to the fully filled door leaf. The door can be optimally adjusted using the three-way adjustable guide rollers.

With or without glazing

On request, the MZ Thermo65 / MZ Thermo46 also comes with glazing to let daylight into your workshop or hobby room. The glazed versions also offer excellent thermal insulation on the interior and exterior thanks to insulated safety glass.

The multi-purpose door

MZ Thermo65 offers first class insulation with a 65-mm-thick door leaf and a particularly high U_D -value of up to $0.87 \text{ W}/(\text{m}^2 \cdot \text{K})$.

The multi-purpose door

MZ Thermo46 features a 46-mm-thick door leaf and a thermal insulation value of up to $1.1 \text{ W}/(\text{m}^2 \cdot \text{K})$.

Possible additional functions:

T30 fire-retarding*

As a fire-rated door H8-5 up to door size 1000 x 2125 mm (see page 18)

* For doors without glazing and with corner frame

Stability for you

This ready-to-fit door set is especially robust thanks to a double-skinned, 45-mm-thick door leaf rebated on both sides, sheet thickness of 0.9 mm, mineral wool infill and steel reinforcement. The door provides a very high level of security with 2 solid steel security bolts. A 2-mm-thick corner frame with all-round EPDM seal keeps the door shut tight and has a bottom threshold rail that can be easily removed. The door is also available with a block frame and a 3-sided EPDM seal on request.

2-mm-thick corner frame with all-round seal

More light thanks to glazing

Hörmann also offers its multi-purpose door MZ with glazing. Due to security reasons, this glazing is kept very narrow or very small, but it still lets you benefit from daylight inside. 7 mm wired glass is provided as standard, but 20 mm insulated wired glass with a view of 230 x 1360 mm is also possible. The natural-finish aluminium glazing frame is fastened on the closing side with glazing beads as standard. For doors opening inwards, the glazing frame is optionally available with glazing beads on the opening side.

Round glazing (optional)

Glazing view 5 (optional)

Glazing view 9 (optional)

H8-5

The best-selling boiler room door in Europe

For decades, the fire-rated door H8-5 has been providing optimum safety for boiler rooms and rooms with oil tanks. This door is the best example of how you can benefit from Hörmann's expertise in fire protection.

Sturdy door leaf

The double-skinned, 45-mm-thick door leaf is rebated on two sides. With a sheet thickness of 0.9 mm it is highly stable and is equipped with a fire-retarding mineral wool infill, steel reinforcement and 2 steel security bolts. The lock and lever handle set can be used with profile cylinders and deadlock keys. One deadlock key is provided.

Integrated fire protection

On both the door and fire hatch the fire-proof material is not exposed but is concealed on the front side across the full width and flush-fitting.

Sealed all-round

The 2-mm-thick corner frame with all-round seal reliably seals the fire-rated door H8-5. The bottom threshold rail is easy to remove if fitted with a continuous floor.

2-mm-thick corner frame with all-round seal

The model H8-5 fire hatch is recommended for rooms with oil tanks.

H3 OD

The functional door between garage and home

Due to fire hazards in garages, a fire-rated door between the house and garage is required by law. The H3 OD steel construction project door is the best choice for this sensitive area. On request, this door can also act as a seal against smoke and engine noise and additionally protects your family from unwanted visitors with the RC 2 security package.

Clear fire-proof glass F30

Door leaf glued over the entire surface

The fully bonded composite construction of the door leaf ensures particularly high stability. The door always closes securely and accurately with a satisfying noise. The risk of door leaf warping or unevenness is virtually eliminated by the permanently flush surface.

Rebate and door leaf on request

We supply the fire-rated door H3 OD in the thin rebate version as standard. The door comes in a thick rebate version for an identical view with your internal doors or in the version with a flush-closing door leaf for a very elegant door appearance on request.

With optional glazing

On request, the steel construction project door H3 OD is available with clear fire-proof glass for more light. These doors are equipped with an additional overhead door closer.

A frame for all wall types

The steel construction project door H3 OD is fitted quickly, easily and flexibly with the universal corner frame as standard. Thanks to the diagonal or anchor plate, the frame can be fitted in almost all fitting situations and wall types. The universal corner frame can be easily upgraded to a profile frame with the Vario B53 counter frame.

Thin rebate version as standard

Optional thick rebate version

Optional flush-closing version

Universal corner frame, brickwork

Universal corner frame with counter frame Vario B53, concrete

* The acoustic values apply to solid doors without glazing and are not applicable to doors fitted into gas concrete.

** The resistance class RC 2 applies to doors without glazing and is not applicable to doors fitted into partition walls.

*** Please note: Glazed doors require an overhead door closer.

Quadro

For all fire protection requirements

The fire-rated door Quadro is tested for fire protection categories T30, T60 or T90 and can therefore be used in all areas. The door can be fitted left-hand hinged or right-hand hinged by simply turning the element.

Acc. to RAL-RG 426

* For doors without glazing and with corner frame

Sturdy door leaf

The double-skinned, 40-mm-thick door leaf with a thick rebate on 3 sides consists of galvanized sheet steel (0.6 mm) and a honeycomb insert glued over the entire surface, making it dimensionally stable and robust.

Fully equipped as standard

As standard, you will receive the internal door ZK with a fitted lock and bright galvanized top hinge parts V 0020, firmly screwed into the reinforced sections, but without a lever handle set.

As a door leaf or ready-to-fit with a frame

The internal door ZK is supplied as a door leaf or as a ready-to-fit door set, i.e. complete with lever handle set and special corner frame in Traffic white.

Smooth, quiet closing

The door has a mortice lock with lever / knob acc. to DIN 18251 class 3 and is prepared for profile cylinders (backset 55 mm). The door closes easily and quietly since it is equipped as standard with a plastic catch and steel bolt, deadlock insert and key, and on request with a profile cylinder.

Flexible fitting

Thanks to the height adjustment and individual surface design, ZK doors are also ideal for modernising any room from the basement to the roof. They can be flexibly used in existing standard frames and all Hörmann steel frames (prepared for series V 8000 hinges).

- 1 Honeycomb insert
- 2 Adhesive
- 3 Zinc coating
- 4 Steel
- 5 Powder coating / foil coating

You can individually design your door's smooth, silk matt surface.

The door leaf can be shortened at the bottom. With a height adjustment of up to 20 mm, this door is suitable for any modernisation project.

As a door leaf or door set

OIT 40 doors are available as a ready-to-hang door leaf or as a complete ready-to-fit door set. The door leaf is delivered with fitted lock and bright-galvanized leaf parts of hinge V 0026 WF firmly screwed into the reinforced sections. The door set consists of a door leaf including lever handle set and a special corner frame made from 1.5-mm-thick galvanized sheet steel with powder-coated primer in Traffic white (similar to RAL 9016) as standard.

Frame equipment

The frame is fitted with an EPDM seal on 3 sides, with welded frame parts and grouting lugs. The door is delivered with corner and profile frame as well as block frame; you can also insert it into an existing standard frame or in every Hörmann steel frame.

Door hinges selectable in the building system

The door can be optimally adjusted with maintenance-free 3-part hinges as standard. As an option, you can obtain three-way adjustable VX hinges.

Mortice lever / knob lock

The lock is prepared for a profile cylinder (backset 55 mm) and fulfils all DIN 18251 requirements. The equipment includes a plastic latch and steel bolt, deadlock insert as well as a key. The lock is also supplied with a profile cylinder on request.

Steel and timber well combined: particularly robust door leaves in three infill versions

Whatever you want!

Preferred colours

Hörmann steel doors are available in inexpensive preferred colours and all RAL colours as well as high-quality decors. Surfaces are powder-coated with a primer (painted for external doors) which makes them especially resistant and durable.

Preferred colours		KSI Thermo46, MZ Thermo65, MZ Thermo46	KSI 40	H3 OD	ZK, OIT 40	MZ, H8-5, Quadro
1	RAL 9016 Traffic white (standard)	●	●	●	●	
2	RAL 9010 Pure white			●

25	White Ash (only suitable for indoor use)		●		●	
26	Light Oak (only suitable for indoor use)		●		●	
27	Beech (only suitable for indoor use)		●		●	

All colours based on RAL

The colours and surface finishes shown are subject to the limitations of the printing process and cannot be regarded as binding. Dark colours should not be used for doors that are exposed to the sun, as an increased material expansion may impair the door's function.

Proven and inexpensive frames

Hörmann steel frames are especially robust and can withstand “accidents” with toy cars or run-ins with hard objects. The hot-galvanized and primed surface can be painted individually, letting you match it perfectly to the look of the steel or timber doors used. On request, the frames also come with a high-quality powder coating in any RAL colour.

Product characteristics

Corner and profile frames for 40-mm-thick rebated door leaves

Ready-to-fit standard frames galvanized and with powder-coated primer in Light grey (similar to RAL 7035)

Versions

- Ready-to-fit and welded
- To screw or clamp

Fitting in

- Brickwork
- Partition wall

Corner or profile frame

Where do you want your internal door to be fitted? This question must be answered before you can select your frame. If installed in brickwork, in the basement for example, an inexpensive corner frame is all you need. However, for the living areas we recommend a profile frame enveloping the wall. Partition wall frames are always designed as profile frames and are ideal for dry loft constructions.

Welded or to screw or clamp

All Hörmann standard frames for brickwork or partition walls are ready-to-fit and welded or to screw or clamp. They come in a handy package that can be transported in a car and are already prepared for easy fitting by yourself.

Variety is our strength

We have every frame you could possibly need. We offer door and window frames or passage frames between rooms. The frames are also available with segmental arches or Norman arches as well as in combination with a side element and transom light. All frames are additionally available in a final coating in any RAL colour or an elegant stainless steel version. We would be pleased to advise you.

Flexible, long-lasting, elegant: VarioFix frame

For the Hörmann steel profile frame VarioFix, wall tolerances of up to 20 mm are no longer a problem: The adjustable decorative rebate compensates for different wall thicknesses during renovations and new construction projects. As easy to fit as a timber frame, the steel profile frame is additionally distinguished by its long service life and attractive design. Only VarioFix offers high resistance and an elegant shape coupled with the fitting principle of timber frames.
