

EQUILUX BUILT-IN SECURITY SHUTTER

**Entirely tailored to property
style, function and design.**

**Unobtrusive, high
performance security.**

**Fully insulated structural lintel
with recessed guides.**

The Equilux Built-In Shutter is an innovative solution to the ongoing issue of compromising design for security. Featuring cavity closer elements and integrated structural steel lintels, this security shutter system is completely concealed from view when in the raised position.

Providing an unobtrusive alternative to the traditional hood box, the Equilux Built-In Shutter has no visible guide rails or hood box. Maintaining the original features and architectural design of the residence, yet the home is completely secure once the shutter is deployed.

EQUILUX BUILT-IN SECURITY SHUTTER

Doors and windows represent the most vulnerable elements of a property. Specifically designed to enhance the visual appeal of prestigious properties, Equilux Built-In Shutters are leading the industry in security shutter style.

Creating an impenetrable barrier between intruder and property, Equilux Built-In Shutters are available specified up to SR3 standards and will be most effective when installed during the build stage of a project to reduce structural alterations.
