

**SCHIEDEL** METALOTERM

# Metaloterm Vantage

Twin Wall Insulated Chimney System

# System Description

**Vantage** is a quality twin wall chimney system with a quick lock jointing system. It is used for wood burning or for solid fuel stoves. With a quick lock jointing system. The components have a twin wall construction with a male spigot and a female socket to provide simple and rapid installation.

With its fully sealed components, **Vantage** can be installed both internally and externally. **Vantage** is supplied with a ten year conditional warranty.

## Applications

- Gas-fired stoves
- Wood-fired stoves
- Approved solid fuels
- Oil-fired appliances

## Key Features

- 10 year warranty
- Suitable for internal and external applications
- Distance to combustibles 60mm (50mm in free air)
- Also available in black powder coated finish
- Easy to install Twist-lock system
- Weatherproof, fully sealed components
- High density, mineral wool insulation
- Made from high grade stainless steel
- 316L stainless steel inner wall for the highest corrosion resistance
- 304 stainless steel outer wall in an attractive, polished finish

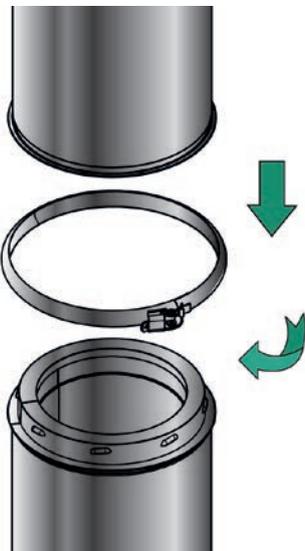

## CE marking

Metal system chimney section	EN 1856-1 EN 1856-1 EN 1856-1 EN 1856-1	T450 T600 T450 T600	N1 N1 N1 N1	D D D D	V3 L50050 V3 L50050 V3 L50050 V3 L50050	G50 G50 G60 G100	} in free air } in combustible shaft with ventilated fire stop
Product description	Standard number	Temperature level	Pressure level (N: negative pressure, P: positive pressure, H: high positive pressure)	Condensate resistance (W: wet/D: dry)	Corrosion-resistance class and flueliner specification	Soot fire resistance (G: Yes   O: No) and distance to combustible material (in mm)	

# Technical characteristics

Technical characteristics				
Application	Chimney/Flue system			
Operating mode	Dry			
Pressure	Negative pressure			
Operating Temperature	450 °C / 600 °C			
Thermal Shock	1000 °C [max 30 min]			
Inner Wall	material	AISI 316L/EN 1.4404		
	thickness	0.5 mm		
Outer wall	material	AISI 304 BA/EN 1.4301		
	thickness	0.5 mm		
Insulation	type	Mineral wool		
	thickness	25 mm		
Fuel Type	Wood/Gas/Oil/Approved Solid Fuels			
ID mm	125(5")	150(6")	175(7")	200(8")

Cross section cm <sup>2</sup>	123	177	241	314
Weight ±kg/m	5.5	6.5	7.5	8.0
Chimney diameter				
The chimney size should be as recommended by the appliance manufacturer. Where there is a requirement for a flue diameter smaller than the appliance spigot, then the operational requirements of the appliance and the configuration of the flue must satisfy the flue sizing requirements of EN13384—1 for single appliances.				
CE approved				
EN1856: T450 N1 D V3 L50050 G50 [in free air]				
EN1856: T450 N1 D V3 L50050 G60 [in a combustible shaft with ventilated fire stops]				
EN1856: T600 N1 D V3 L50050 G100 [in a combustible shaft with ventilated fire stops]				

## Joint design and construction

The joint is made by fitting the female end over the male end and engaging the joint system by rotating the component clockwise. A locking band is then fitted to secure the joint, as shown. The Vantage joint incorporates an eight barb twist lock coupler system to allow easy and rapid installation of the product.

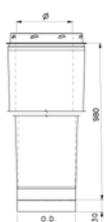

# Starter Components

## Stove Pipe Starter Section (short)

Use this adaptor to join single wall, enamelled flue pipe to your twin wall. Both the single and twin wall flue pipe must be of the same diameter to use this product. Locking band included. Short tapered version.
