ENSURING SAFETY THROUGH TESTING AND CERTIFICATION

Our rockfall solutions undergo a complex, rigorous test and certification campaign.

The assessment of their performance takes place through specific tests, both in normal conditions and extreme conditions, such as long exposure to salt spray and SO₂ sulfur dioxide.

In addition to international standard testing requirements for mechanical performance of the overall system, all the raw materials and components of Maccaferri Rockfall Barriers undergo dedicated aging tests, in order to ensure their reliability from the moment of installation to the end of their working

Engineering a **Better Solution**

Maccaferri's motto is 'Engineering a Better Solution'. We don't merely supply products, but work in partnership with our clients, offering technical expertise to deliver versatile, cost effective and environmentally sound solutions. We aim to build mutually beneficial relationships through the quality of our service and solutions.

GLOBAL ENGINEERS

In the second half of the 19th century, we invented Gabions and dramatically changed the civil engineering landscape. We are still changing it today. We work every day to find better solutions for our clients at every degree of latitude and longitude. Our worldwide network grows through innovation and diversification of sectors of activity and through an increasing range of high quality and environmentally friendly products and applications.

OFFICINE MACCAFERRI GROUP PROFILE

Founded in 1879, our Group soon became a worldwide reference in the design and development of advanced solutions, with offices in over 70 countries and 30 factories worldwide.

Our mission is to pursue excellence through continuous improvement, while delivering to customers engineered solutions that are innovative, advanced and environmentally friendly. We are committed to outstanding safety, quality and sustainability, to create value for all stakeholders as well as our communities.

MACCAFERRI APPLICATIONS

HYDRAULIC WORKS

SOIL STABILIZATION & PAVEMENTS

BASAL REINFORCEMENT

DRAINAGE OF STRUCTURES

AQUACULTURE NETS/CAGES

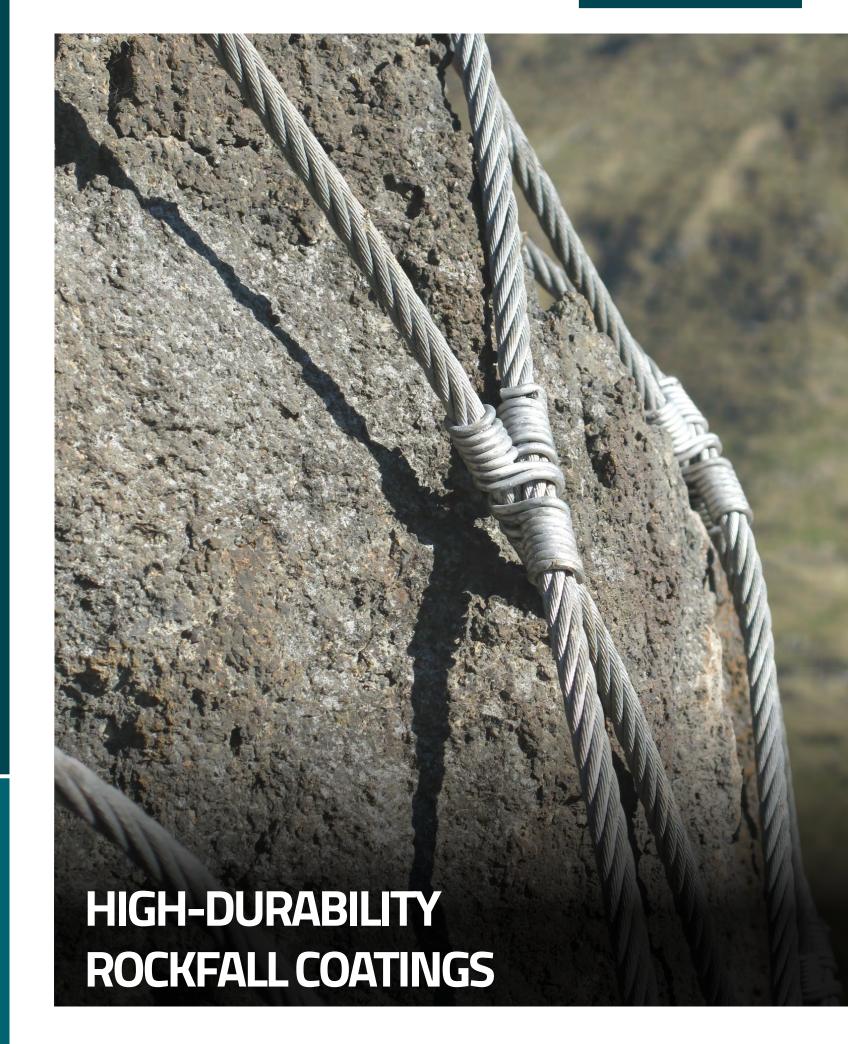

CONCRETE FLOORING,
PRECAST & OTHER USES*

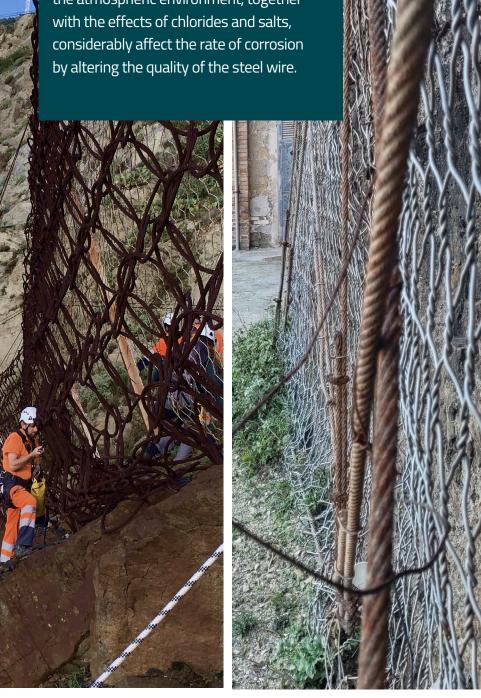

INDUSTRIAL MANUFACTURING

MACCAFERRI

When exposed to aggressive environmental conditions, a rockfall protection can quickly deteriorate, threatening the security of people and

The exposure to wetness and pollution of the atmospheric environment, together

Corrosion of the steel wire can lead to the deterioration of rockfall protections.

The application of an advanced coating enhances the performance of our rockfall protection systems preventing wire degradation.

A **5x longer durability** means less maintenance and a lower total cost of ownership.

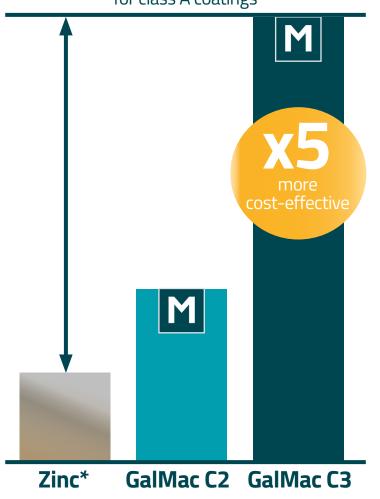

Zinc class B is not compliant with ISO 17745:2016.

DO NOT PLAY WITH SAFETY, **FOLLOW THE STANDARDS!**

Maccaferri GalMac C2 and GalMac C3 coatings guarantee a design working life of at least 50 years in C2 and C3 environment classes respectively.

> In accordance with the standards: ISO 17745:2016, ISO 17746:2016, EN 10233:2013

WORKING LIFE for class A coatings

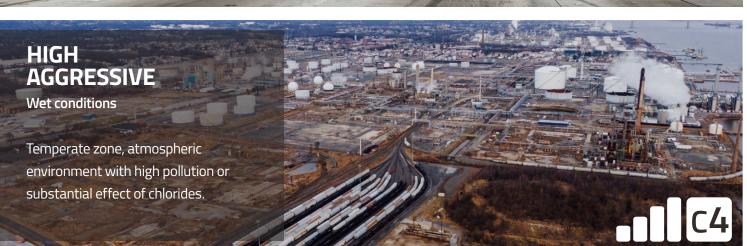

COATING WORKING LIFE ENVIRONMENT Class A only Years

Class It offig			
Zinc	25	LOW AGGRESSIVE	
GalMac C2 (Zn95%/Al5% Alloy)	50	Dry conditions Temperate zone, atmospheric	
GalMac C3 (Zn90%/Al10% Alloy)	120	environment with low pollution. Dry or cold zone, atmospheric environment with short time of wetness.	

Zinc	10	MEDIUM AGGRESSIVE
GalMac C2 (Zn95%/Al5% Alloy)	25	Dry conditions Temperate zone, atmospheric
GalMac C3 (Zn90%/Al10% Alloy)	50	environment with medium pollution or some effect of chlorides.

Zinc	
GalMac C2 (Zn95%/Al5% Alloy)	10
GalMac C3 (Zn90%/Al10% Alloy)	25

* ISO 17745:2016 does not include zinc class B.
