## WELCOME

---

Rawson Carpets are part of W E Rawson Ltd.

For 150 years, this privately-owned company has grown organically through the manufacture and cutting-edge uses of non-woven industrial textiles. Our growth remains strong because of W E Rawson's ongoing commitment to innovation, designed to meet the world's ever-changing and varied market needs.

Our product offering is that of solutions well suited to their planned usage. As such, each offering is backed up with the necessary test data to support the carpets suitability, durability, safety and sustainability. Our credentials are supported by multiple test data available online.

All products are manufactured in the UK, with over 90% of raw materials sourced from the UK and accredited with the 'Global Recycled Standard'. Our products are designed to comply with Class 33 wear classification and castor chair suitability. Products are tested for fire safety LRV assessed and available as BIM files. We are CFA, NBS source, & Barbour members. We manage our sustainability through ISO14001 and have Environmental Product Declarations (EPD's), Indeed all of our Nylon solutions are now manufactured Carbon Neutral.

## TUFTED LOOP PILE CARPET TILES

---

For a statement floor covering, a floor covering with design at heart, Rawson proudly introduce new comfortable and quiet Nylon Loop tile products.

Durable, cleanable and very aesthetically pleasing, the tufted range will contribute to a great space. Meeting the often stringent demands of a school, shop or busy office, the range provides choice, quality and great design.

All our Nylon Solutions are now Manufactured carbon Neutral and are supported with EPD's

Our Nylon strategy means that in many cases familiar yarns will be evident through the ranges to offer endless design possibilities and more design freedom. Our experienced team are always on hand to present these opportunities.

## EARTH CREATION

---

Inspired by the natural surface of the founding materials of planets.

Rawsons new Nylon carpet tile offering, called Earth Creation, offers a natural aesthetic with suggestions of meteoric rocks and dust coming together in space. Produced Carbon Neutral on a deep pile weight and with many colour options, the carpet tiles provide design freedom for our clients.

Familiar yarns run through each colour to allow for subtle transition or imposition of colour where desired. Laid broadloom, brick-bond or tessellated, Earth Creation designer carpet tiles can offer an impressive complement to your designed space.

Suggestions of rocks and dust forming together, the result is a subtle structured finish with a woven style texture.

## URBAN CAMO

---

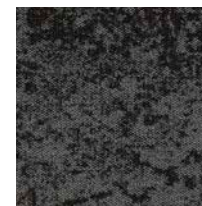

The offset of 2 colours in Urban Camo depict the sometimes defragmented arrangement of shades and lines of the many differing urban landscapes of our time.

Our latest design is a lightly structured solution dyed nylon carpet tile with modern patterning that can complement any room, from a school classroom, countless office interior opportunities or for a statement retail space and boutique hotel. This non directional tile comes in a selection of subtle colours and has matching yarns to allow for subtle transition of colour. Differing aesthetics can be achieved with differing lay patterns.

## RIVEN

---

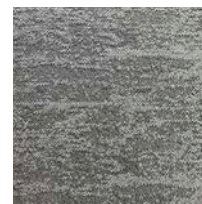

**Riven is a statement floor, personalised and flowing.**

Slate, Shale, Concrete and Graphite, with 2 ply construction, are shades which alone, or combined, can give the feel of nature's materials as matching yarns run through each colour. Moss, Rock, Brook and Stone are offered with colour, natural expression, and individuality.

Here is a range that gives choice and design freedom. Each colour sits beautifully alone. Or, blend Riven's textured design with other matching product colour ranges.

Multi loop textured design in quality nylon yarn. Available in tile or plank. A deep and luxurious tile for your space.

## JAZZ BAR

Our Jazz range is complemented with Jazz Bar. A barcode effect patterned tile utilising matching coloured yarns from the jazz range.

Installed alone, as shown can create a striking pattern in tessellated pattern or indeed brick-bond, however, randomly dropping in a bar tile to complement a Jazz installation, or bordering with Jazz Bar offers our clients more design options.

## JAZZ BAR

JLT40 - Barspice  
- (Chocolate and Spice)

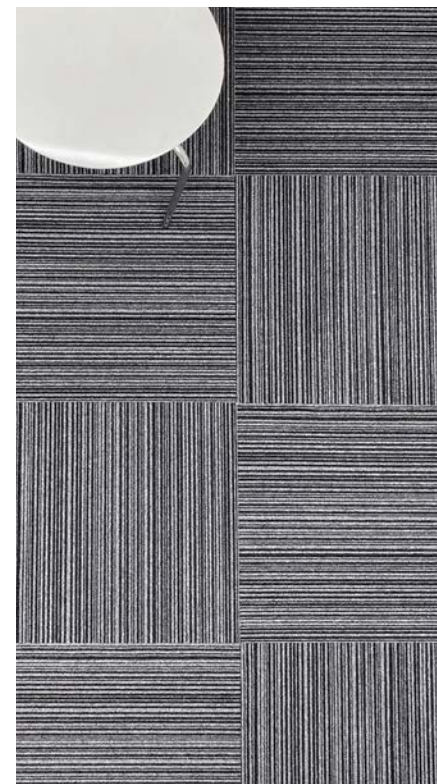

JLT41 - Barbean  
(Granite Blackbean)

JLT42 - Barism  
(Blackbean & Trism)

JLT43 - Barphire  
(Sapphire and Trism)

## JAZZ SYNTH

For the subtle transformation of colour, Use Jazz Synth. Again utilising matching yarns from the Jazz range, Jazz synth can work beautifully alone, whether brick bonded, or laid in plank format with herringbone.

The design options are endless. Used as corridor bordering, transferring colour in large open spaces, or inputting colour lines that seem to fade away, Please see our website site for numerous layout options or contact our team.

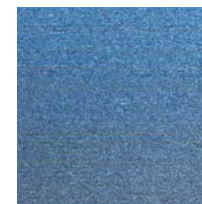

## JAZZ SYNTH

JLT36 - Beanoke (Blackbean and Smoke)

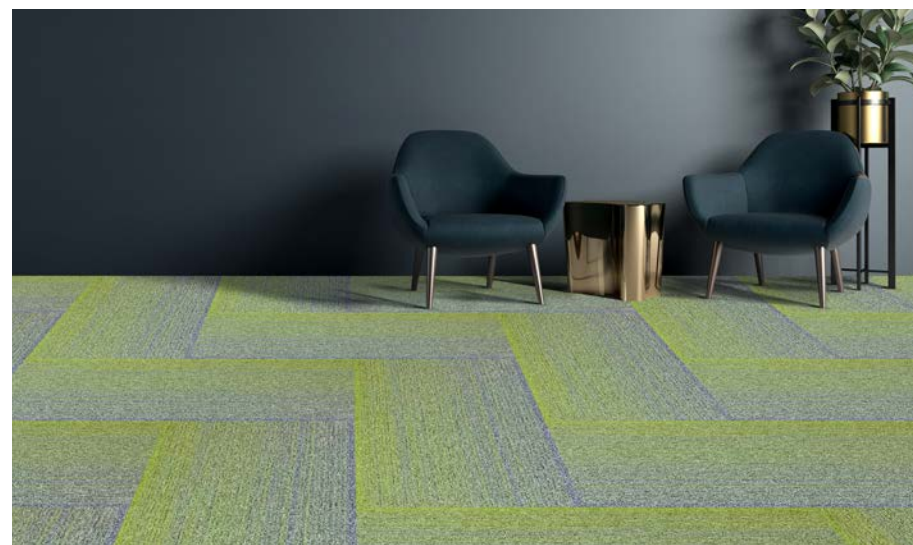

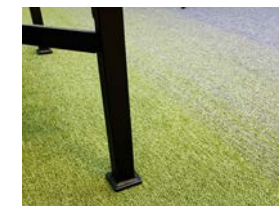

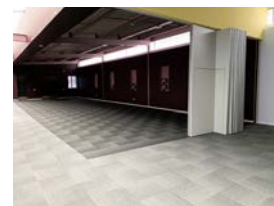

JLT37 - Smokeism (Smoke and Trism)

JLT38 - Skyism (Sky & Trism)

JLT39 - Springism (Spring & Trism)

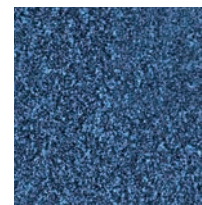

## JAZZ CUT

A deep luxurious cut pile carpet tile in range of 12 exciting colours. Laid tessellated or broadloom, the product provides exceptional comfort and thermal performance.

## FIBRE BONDED CARPET TILES & SHEET

---

**Rawson's heritage, 'a world of fibres', is clearly displayed with our fibre bonded carpet offering.**

As one of the original UK manufacturers of fibre bonded carpet tile and sheet, you can rely on the quality, dense needle punched ranges.

New colours in our Heritage ranges provide more appeal and now we have pleasure in introducing new products to the range which surely push the boundaries of what a fibre bonded tile aesthetic can achieve.

Our carpet tiles and sheet offer exceptional quality and durability. The clear advantages of using a fibre bonded product from Rawson include low maintenance, comfort under foot, great thermal properties and impressive acoustic reduction contributing, to a calm and productive learning or working environment.

## RECOVER

A Fully Recyclable Carpet Tile Solution.

No Landfill, No Additives, A Single Polymer product.

Made From 80% Recycled Material with proven routes to full Recyclability.

180 recycled plastic bottles are utilised per sqm'

Earth

Safari

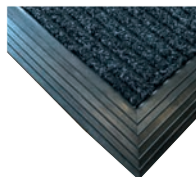

## BESPOKE CARPETS, LOGO AND INLAY SOLUTIONS

As a long standing manufacturer, Rawson has the ability to manufacture carpets to suit the often specific demands of our clients, whether that be for a special colour match or certain resistance, we are the team to talk to.

Indeed, a lot of our work is in providing specifically produced products to satisfy client's needs. Please contact us to see if we can help.

The range is complemented with the ability of our team to provide intricate inlay or logo mat solutions. All we need is a PDF and we can create a personalised tile or entrance mat for your facility. This can be done in any product in any colour. Logo mats can be completed using pre-cast rubber edged profiles for a complete durable mat.

## BACKING SOLUTIONS

### QUIET BACK

Our 6mm polyester backed comfortable backing solution creates a quiet and cushioned floor covering. Achieving sound reductions of up to 28dB, the solution contributes to a calm working and learning environment. Available for our sheet and tile offerings, supplied pre-bonded to your chosen product. Please contact one of our staff if you require more information.

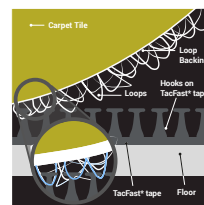

### IMPERVIOUS BACK

An antibacterial and impervious polypropylene carpet backing. This backing is an option on Patio, Eurocord and Felkirk. This provides a completely impervious seal to protect the sub-floor below.

The solution is very effective in ensuring that any moisture can not transfer to the sub-floor, whether wood or concrete, preventing lingering moisture which can create smells and mould.

With product and backing made solely out of polypropylene, here we have a 100% recyclable flooring solution.

### STICKFAST

Our new polyester backing has been specially designed to bond perfectly to the hook profile of a hook and loop bonding strip, allowing for an immediate, weather proof and very quick uplift bonding solution.

This application is very popular in environments where floors will be lifted more than once a year. For example: regular uplift and replacement of heavily soiled areas (ie entrance wells); short term use carpet for events (exhibition floors); carpet protection or change of use areas; and raised access flooring projects where access is constantly required.

## ENTRANCE FLOORING SOLUTIONS

---

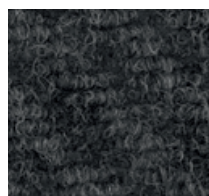

**Every commercial building requires an entrance floor system to provide a cleaning and drying service to foot traffic before walking on the chosen interior floor.**

With our years of experience we have ensured the broad range of products offered will fulfil the primary and secondary barrier matting requirements for your facility.

The use of Titan or Spikemaster as a secondary barrier solution is a regular choice.

## DOMINATOR SUPREME

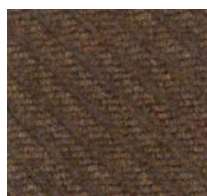

Heavy duty primary entrance flooring solution. With multiple heights and a specific shoe cleaning purpose, this product has proved its effectiveness across a diverse range of installations. This floor will protect your buildings interior floor coverings. The diagonal patterning allows for cleaning of shoes whatever the direction.

## OUTDOOR SPORTS & PLAY SURFACE SOLUTIONS

---

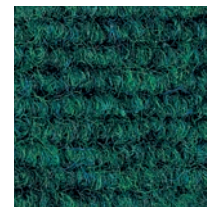

Rawson is proud to introduce a comprehensive sport and play surfaces solution. Complementing the multi-use UV stabilised Patio range, the offering now provides multiple textures and designs along with padding systems to satisfy any outdoor sport or play surface requirement.

## SPIKEMASTER

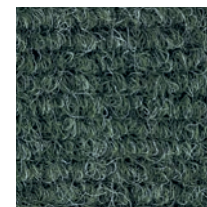

A specifically engineered flooring solution for areas where spike and sports shoes are worn. Whether a golf or cricket club, this antistatic product will provide the required support and resistance. Offered in a range of suited colours, Spikemaster not only provides a flooring solution but complements the aesthetic of the environment. Spikemaster is also regularly specified as a secondary entrance barrier flooring.
