Stainless Steel Solutions for
Building & Construction

Aperam is a global leader in stainless steel solutions, offering a multitude of effective, innovative and environmentally friendly products.

Through the Uginox brand, we offer the market's most comprehensive range of surface finishes, each adapted to the unique expectations of our customers.

Widely recognised by project managers, developers, architects and contractors for our long-standing expertise in the construction sector, we are able to anticipate end-user needs and, thanks to our global presence, support our customers with everything from technical assistance to product co-development.

A 100% recyclable product : stainless steel is the “green material” par excellence and is infinitely recyclable. Within the construction sector, its actual recovery rate is close to 100%.
