

Sovereign holds a comprehensive range of accreditations and approvals for its products, helping ensure that when you choose Sovereign you choose **QUALITY**. The Company is also a leading member of the key professional bodies.

- **The Royal Warrant:** The coveted Queen's Royal Warrant was awarded in 1987 in recognition of the success with which our products have been, and continue to be used at Royal residences.
- **ISO 9001:** Sovereign Chemicals is fully BS EN ISO 9001 accredited for its manufacturing systems and product quality processes.
- **BBA Certified:** Many Sovereign products have received prestigious British Board of Agrément approval, requiring them to pass the most stringent of testing regimes.
- **BSI Damp Proofing:** Sovereign's entire range of Damp Proofing products are accredited to the demanding BS 6576 standard.
- **BDMA:** The British Damage Management Association provides professional accreditation in the building recovery and restoration sector.
- **PCA:** The Property Care Association represents trusted specialists for key problems affecting buildings, including condensation, timber decay and insect attack, dampness and water penetration.
- **RIBA:** Sovereign is a member of the Royal Institute of British Architects. Membership provides access to the latest building research carried out by this key body.

Sovereign are here to offer **FREE** help and advice

The floods that hit Cumbria and North Lancashire in 2015 devastated the homes, businesses and, of course, the lives of countless families across the North West. As the waters subside it's time to start the heartbreaking task of clearing and rebuilding. Sadly though there's often much more to renovation than just cleaning up and drying out... That's where Sovereign come in to provide FREE help and advice.

Formed in 1965, this famous Cumbrian company is recognised industry-wide as leaders in the manufacture and supply of premium quality products for the renovation, rot, insect infestation and damp treatment industry, and particularly for those issues that arise following flooding.

In fact our damp proofing, rot and remedial treatments are SO well-respected that in 1987 we received perhaps the ultimate seal of approval with the awarding of The Queen's Royal Warrant. This unique accreditation was given in recognition of the quality of our damp proofing products which have been used extensively in the Royal Residences.

What is more, because of the exceptional level of accreditation, many of our damp, proofing, insecticide and rot products carry fully independent peace-of-mind guarantees when installed by an approved contractor.
