AKW DigiPumps®

The AKW M11, M17 and M20 DigiPump® range provides quiet, reliable, and high-performance waste drainage in showering areas where gravity drainage is not achievable.

Quick and easy to install, AKW DigiPumps® are compatible with our wide range of pumped wastes and shower trays. M11 (11l/m) models are ideally suited for use with electric showers, with M17 (17l/m) and M20 (20l/m) models better suited for mixer showers with higher flow volumes.

+ Superior pump performance with between 11-20lpm maximum capacity in a 'real life scenario'

+ Safe for use with IP45 rating

+ Pump head features four valves with flap valve and bowl design, two non-return valves, and is reversible to allow for installation of inlet pipework from the left or right

+ Suitable for use with wide range of electric and/or mixer showers of different makes via settings

+ Offers a wireless connection to the flow sensor within AKW SmartCare Plus® and SmartCare® Lever electric showers

+ Automatically responds to the shower being operated via internal or external flow sensor

+ A hard-wired connection can be made to the flow sensor of an iTherm electric shower and many other brands.

M11 DigiPump®	25470
M17 DigiPump®	25450
M20 DigiPump®	25460

Wireless Pump Module

The Wireless Pump Module connects AKW SmartCare Plus® and SmartCare® Lever electric showers to the AKW M11, M17 and M20 DigiPumps® by receiving information from the shower and transmitting it to the pump.

The wireless module comes with a PCB that is plugged into the shower heater unit, wirelessly connecting the shower to the pump. Our range of DigiPumps® enable waste drainage where gravity drainage isn't achievable, with the wireless module removing the need to feed wires behind existing tiling or wall panels.

+ External wireless communication device compatible with AKW SmartCare Plus® and SmartCare® Lever electric showers

+ Once the wireless pump module is paired with the shower it will remain connected even if both the shower and pump are isolated from the mains supply

+ The module continually checks the link between the pump and the shower

+ Works with AKW SmartCare Plus® and SmartCare® Lever electric showers without the need to configure

AKW Electric Showers Wireless Pump Module	29089

Note: Suitable for showers purchased from April 2021 and with version 2 software (contact Technical Support if you are unsure)

Auxiliary Pump Switch

The Auxillary Pump Switch is designed to activate the pump to drain water away without the need to turn on the shower. This helps facilitate cleaning and excess water drainage.

+ All AKW DigiPumps® can be turned on externally with the press retractive switch that contains an internal spring so that it automatically resets to OFF upon release

+ The AKW DigiPumps® software has been redesigned and upgraded to accept the cable for the switch for easy connection and installation
