Life Made Better

Wall Panel Collection

## Your Style, Your Choice

**AKW offer an extensive range of high-quality wall panel options across three ranges of high-pressure laminate and PVC wall panels.**

Focusing on the most popular designs in the AKW ranges, there is a plain white option for users requiring colour contrast against accessories, or the more contemporary matt greys, black and white marble finishes for a high-value appearance.

Wall panels have specific benefits for different installations and budgets. However, the advantages of wall panels over tiles are significant for all ranges, as detailed on the following pages.

# Benefits of Wall Panels over Tiles

Wall panels have many benefits over tiles, from the considerable time saving to the ease of maintenance. The key benefit of our wall panel collection is peace of mind, with up to 35-year warranties available.

AKW offer three ranges encompassing classic and contemporary finishes. When a bathroom is getting renovated or adapted, wall panels can be a stylish, functional addition to your room.

Easy to install, easy to clean and stunning to look at, wall panels can be every professional or resident's best friend.

## Specifiers, Housing Associations and Care Homes

Quick installation time means less time for the user without bathrooms

High-value appearance in the bathroom area for less cost than tiling

Cheaper option, especially when carrying out multiple refits

Low maintenance and easy to clean, no grout lines where bacteria could build up

Less skill requirement from installers, which is cheaper than specialist staff and makes use of the resource working on the rest of the refit

## Contractors/Installers

Considerable time saving compared to tiling

Minimal tool requirement

Does not require a specialist tiler, easy to install

Material cost saving on overall job against tiling

Easy to create high-value appearance in the bathroom area

## Occupational Therapists

Non-clinical appearance

Easy clean

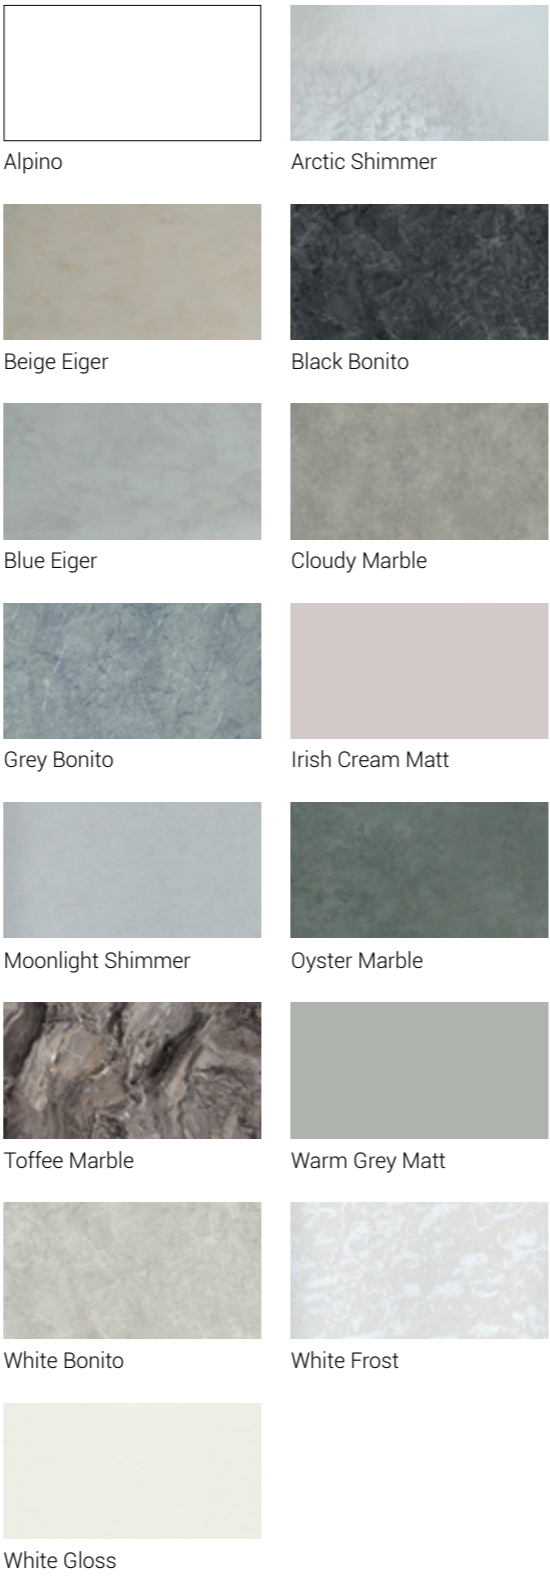

No grout lines where bacteria could build up

# Origins Wall Panels

These high-pressure laminated wall panels are offered as an alternative if a tongue and groove system is required to provide a seamless finish on a new wall.

The printed paper design is impregnated with phenolic and melamine resins on one side only.

## Features & Benefits

- + Available in 15 contemporary decors inspired by latest interior design trends
- + The printed paper design is impregnated with phenolic and melamine resins, dried and compressed to form a hard-wearing, high pressure laminate (HPL) coating on a WBP plywood substrate core for square edge board and exterior grade medium density fibreboard (MDF) for tongue and groove boards
- + Quick and easy to fit with no specialist skills or equipment needed to install
- + Hard-wearing structural grade material
- + Wide variety of extrusions available, offering a solution to any installation challenge
- + Made of structural materials so fixtures such as shower seats and grab rails can be fitted securely, without impacting weight loading
- + Maintenance free, no need for additional grouting
- + Tongue and groove click system (2400 x 600mm & 2400 x 900mm) provides a subtle, seamless finish and is an alternative to installing two panels with a straight joint profile

## Technical Specification

Construction Material	High-pressure laminate (HPL) faces on WPS plywood substrate core (Square edge) & exterior grade medium density fibreboard (MDF) (Tongue & Groove)
Product Dimensions	3 panel sizes: 600mm x 2400mm x 11mm (Tongue & Groove) 900mm 2400mm x 11mm (Tongue & Groove) 1200mm x 2400mm x 11mm (Square edged)
Thickness	11mm
Wall Panel is Trimmable	Yes

# Marlbrook Wall Panels

**AKW Marlbrook Wall Panels are the perfect alternative to tiles, with a water and scratch-resistant finish on both sides of the panel, and multiple colour options to choose from.**

Marlbrook is the ultimate adaptation wall panel, designed to be durable, low maintenance, and long-lasting. These square edged, high-pressure laminated, structural wall panels are ideal for covering uneven walls and can be used to create boxing around pipework in the bathroom.

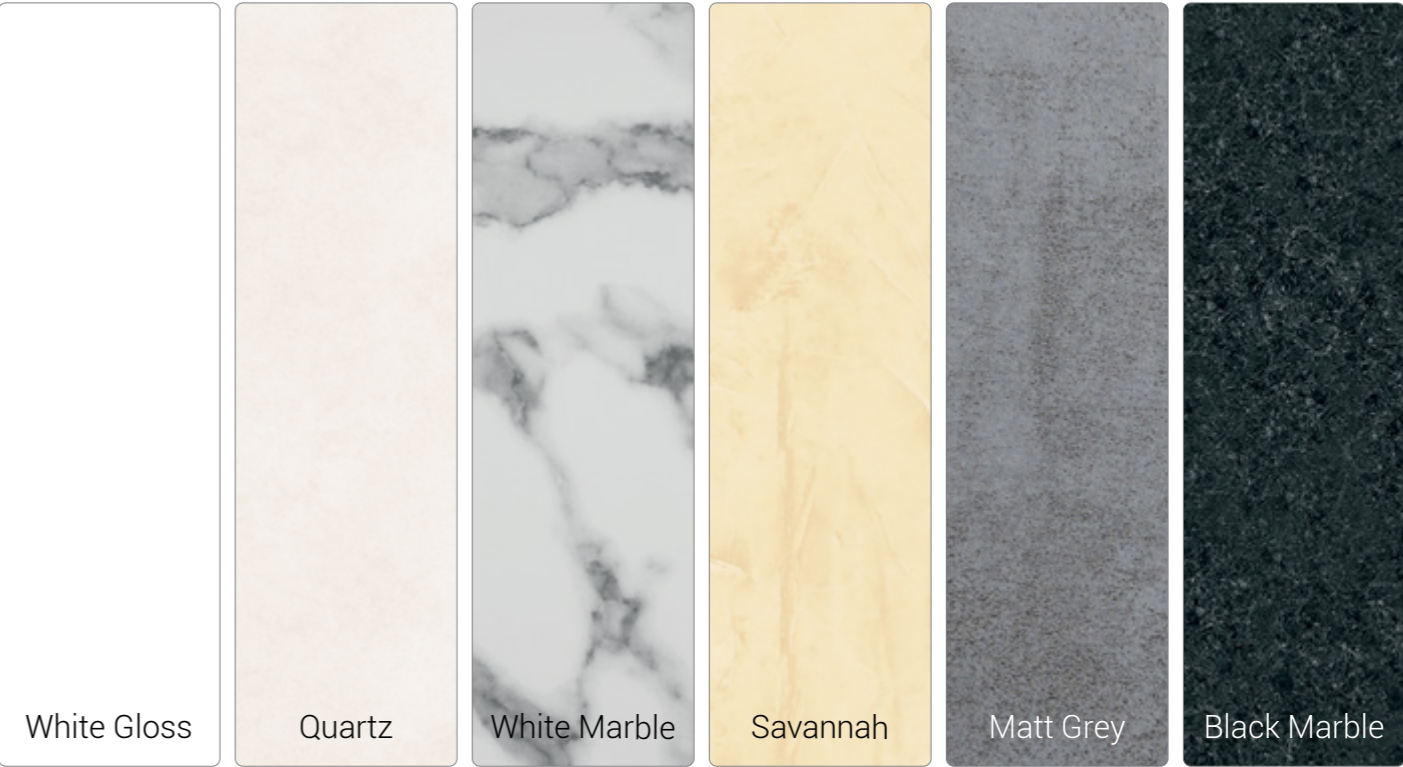

Features & Benefits

- + Panels are finished on both sides to allow either side to be used as the face; this is more forgiving if scuffs occur on site
- + Quick and easy to install with the items in your toolbox; no specialist skills or equipment needed to install
- + Available to be purchased separately in 300mm, 600mm, 900mm and 1200mm panels which are easy to transport and manoeuvre, with each panel packaged separately
- + Also available to be purchased in a kit of a 300mm and 900mm panel, with each panel packaged separately
- + Low maintenance solution, with no need for additional grouting
- + Panels offer a large surface area and can be fitted directly over tiles, making installation less labour intensive; e.g. a 1800 x 900mm shower area would require just 3 panels and relevant profiles
- + WPS plywood substrate core is bonded with a High Pressure Laminate (HPL) to give a completely waterproof surface
- + Constructed from structural-grade materials which allow fixtures such as shower seats and grab rails to be fitted securely, without impacting on weight loading
- + Multiple profiles are available for every installation challenge

Technical Specification

Construction Material	High-pressure laminate (HPL) faces on WPS plywood substrate core
Product Dimensions	308mm x 2440mm 608mm x 2440mm 908mm x 2440mm 1220mm x 2440mm
Thickness	12mm
Wall Panel is Trimmable	Yes
Available Colours/Finishes	White Gloss, Quartz, White Marble, Savannah, Matt Grey, Black Marble

## Alveo PVC Wall Panels

**AKW Alveo PVC Wall Panels provide a highly durable, practical bathroom solution that is easier to install and maintain than tiling and is available in a range of contemporary finishes.**

The robust PVC panels are designed to be low maintenance, with fewer joins and dirt traps, and no need for grout.

They are incredibly quick and easy to install, with panels covering large sections of the wall and offering the flexibility to fit directly over almost any existing surface, enabling you to transform bathrooms and wet rooms faster than ever.

These lightweight wall panels are suitable for use in adaptations when wall panels are installed onto a structural wall, with the Alveo fixing kit used for fixing accessories to prevent indentations in the panels.

**ALVÉO**

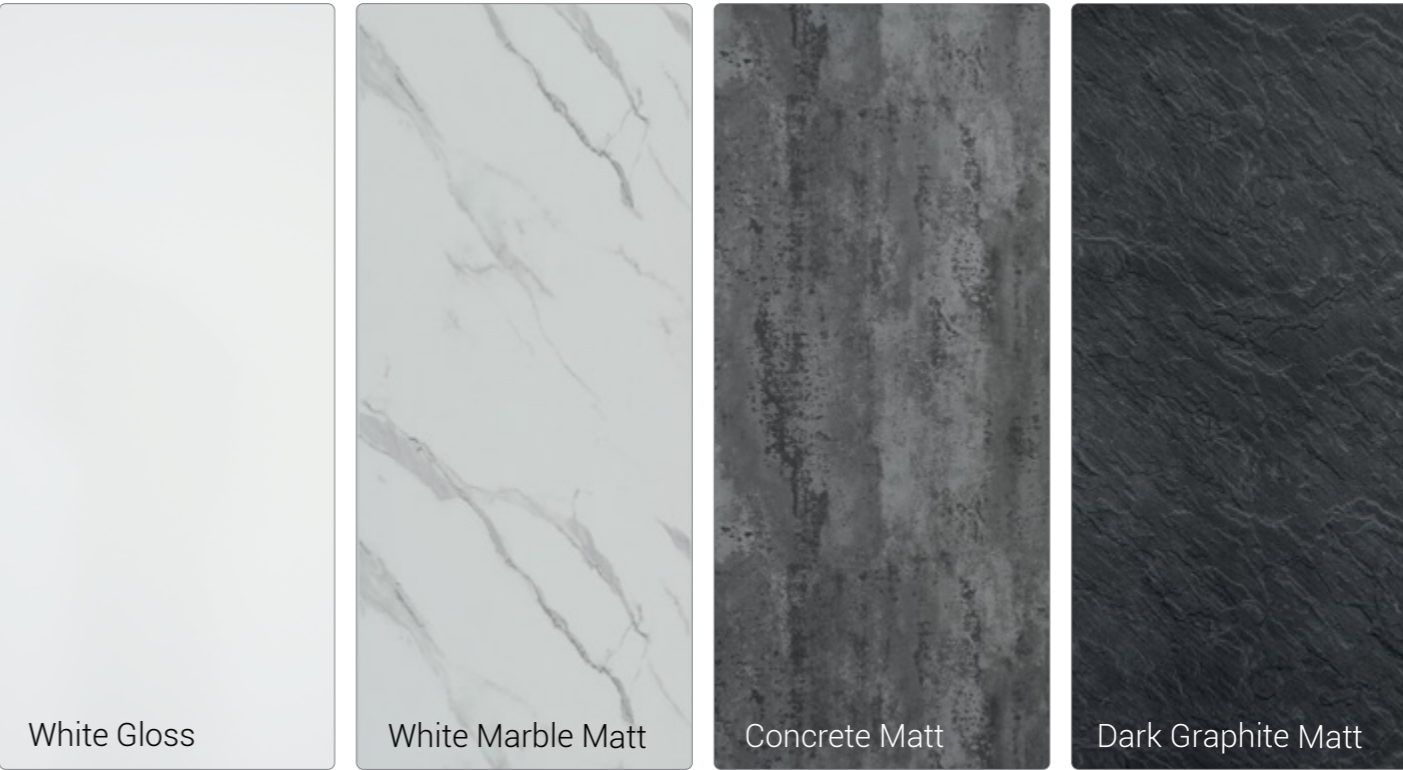

Features & Benefits

- + Panels available in 600mm and 1000mm widths
- + 600mm panels supplied in packs of two, 1000mm panels supplied individually
- + Available in four contemporary colours with matt and gloss finishes
- + Constructed from durable materials that once installed and sealed are designed to withstand everyday use in a variety of bathrooms
- + Internal panel structure features hollow vertical channels, making them incredibly lightweight and easy to handle
- + Quick and easy to fit with the items in your toolbox; no specialist skills or equipment are needed to install
- + Panels and profiles can be easily trimmed down on site
- + Designed to fit over almost any existing surface – including tiles – helping to save time and money during installation
- + Interlocking tongue and groove edge provides a seamless finish when joining two panels along a flat wall
- + Variety of 2500mm (L) aluminium profiles available with a satin anodised finish (End Cap, H-Section, Internal Corner, External Corner, Bottom/Top)
- + For vinyl floor wet room installations, 3000mm (L) Safety Flooring-to-Wall Panel Profiles are also available; these are supplied in a matt white finish
- + Low maintenance solution that is simple to clean using warm soapy water, with fewer joins and dirt traps, and no need for grout
- + Panels are incredibly hygienic, with no absorbent materials to help prevent mould growth
- + Accessory Fixing Kit enables showers, shower seats, grab rails, and other weight-bearing accessories to be fitted safely and securely to the wall without damaging the panel finish

Technical Specification

Construction Material	PVC
Product Dimensions	600mm (W) x 2500mm (L) x 10mm (D) 1000mm (W) x 2500mm (L) x 10mm (D)

# Fixing Kits

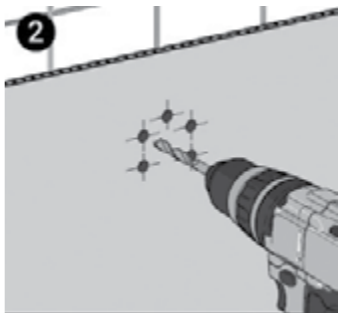

- + Includes: 14mm Drill Bit, 40 Solid Spacers
- + Designed to prevent damage to PVC panels when installing weight-bearing accessories such as showers, grab rails, or shower seats
- + Once the required holes are drilled, insert a solid spacer into the internal hollow channel between the front and back of the panel, this will provide additional support for the screw and prevent the exterior finish from incurring damage during installation of the accessory
- + Supplied with Alveo PVC Wall Panel Kits as standard, also available separately

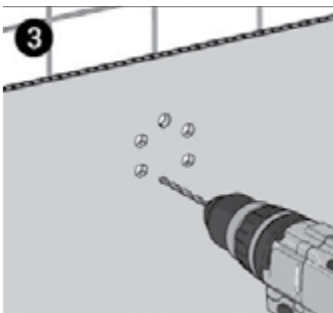

### How to use

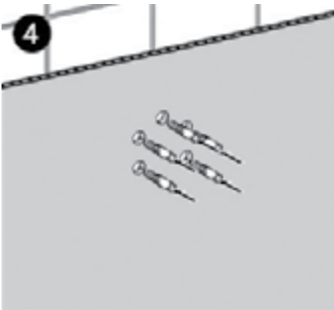

Put the grab rail into position and mark position of holes.

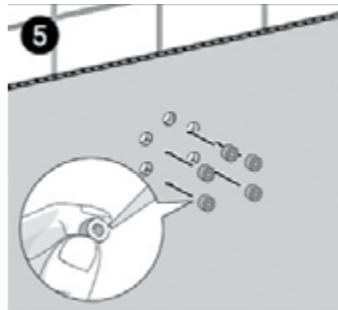

Use 14mm drill bit and drill holes only into PVC wall board.

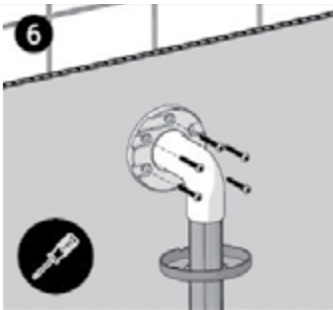

Drill holes into the wall in the same position, using a smaller/suitable drill bit depending on wall type (if necessary).

Insert wall plug (if necessary) to the wall through the PVC wall board holes.

Apply adhesive on the back of the bushes, insert them into PVC wall board and make flush. Leave the adhesive to set.

Line up holes with grab rail and PVC wall board and screw in place.
