Grab-a-Rail
The Kitchen Support Rail System

Supporting Kitchen Independence

Supporting kitchen independence

Grab-a-Rail is the new, lightweight kitchen support rail system, designed to give users increased independence and reduce the risk of falls when navigating the kitchen space.

- + Tested to a maximum weight load of 15.5 stone / 100kg
- + Quick and easy to install
- + Supplied in 2 sizes of 600mm and 1000mm. The 1000mm can be trimmed down to 810mm and the 600mm can be trimmed down to 450mm
- + Minimalist design, supplied in white to compliment any kitchen
- + Optional left and right-handed returns are available, to prevent items catching on the end/corners
- + Safe and secure fixing points, four fixing points per bracket for a secure installation
- + Offers flexibility to accommodate the customers desired fitting requirements
- + Durable, safe and designed to withstand everyday use
- + Can be fitted to new AKW kitchens or retro-fitted into existing kitchens

“ Customer & Professional Testimonials

I am writing with immense gratitude and joy, as I truly believe that the addition of a Grab-a-Rail in my kitchen has been a life-changing experience for me. At the age of 89, every step I take comes with caution, but having this simple yet remarkable device has restored my confidence in my own kitchen, thank you.

Ivy - Customer

It reminds me of the rails that we used for Ballet, I don't believe I will get my leg that high. But it feels sturdy and I feel safer with a hand rail in my kitchen.

Lizzie - Customer

The Grab-a-Rail stands as a prime example of inclusivity, catering to various generations for enhanced stability while using the kitchen. From children learning to cook to an older person struggling with balance, and even wheelchair users needing to manoeuvre while holding utensils or ingredients, this thoughtfully designed rail accommodates a range of needs, providing both confidence and convenience.

Kate Sheehan - Director, The OT Service

Overall looks like a really helpful product which I'm sure would be very helpful in increasing safety and independence to many people when they are carrying out kitchen tasks.

Jo Scarle - Occupational Therapist

”
