WE ARE IKO

IKO is a trusted UK manufacturer of roofing, waterproofing and insulation solutions, with more than 140 years of experience helping shape the built environment. Built on manufacturing excellence, technical expertise and a strong commitment to quality, we collaborate with customers across roofing, car park waterproofing and highways maintenance to support projects with solutions that are practical, reliable and built around real-world demands.

From early design conversations through to project delivery, IKO works alongside architects, surveyors, contractors and facilities professionals as more than a supplier. We are a partner in the process, providing trusted technical guidance, dependable support and the reassurance of nationwide manufacturing and distribution capability across the UK.

MADE IN THE U.K. SINCE 1883

SYSTEMS

REINFORCED BITUMINOUS MEMBRANES

Combining underlay, insulation and capsheets, this is a practical built-up waterproofing solution for flat and low-slope roofs in both new build and refurbishment applications.

SINGLE PLY

A waterproofing system for flat roofs, suited to new build and refurbishment projects such as factories, distribution hubs and warehouses, with no naked flames or gas torches involved during installation.

HOT MELT

For buried applications, IKO Permatec LI is the perfect choice for inverted roofs and is suitable for wide range of substrates, particularly concrete, with over 50% lower embodied carbon compared with the previous IKO hot melt system.

MASTIC ASPHALT

A traditional waterproofing solution designed to protect structures while respecting the building's character and detail. IKO Permaphalt LI delivers up to 72% lower embodied carbon than the previous IKO mastic asphalt system.

COLD APPLIED LIQUIDS

A practical waterproofing solution for roofing, car parks, balconies, walkways and stairways, with no hot works involved during installation. Ideal for restricted access areas or locations where hot applied systems may not be appropriate.

SUSTAINABLE ROOFING

From biodiverse ecosystems to water attentuation, IKO Elements brings sustainability goals into practical focus. With compatible waterproofing, trusted specialist partners and support tailored to each project.

MASTIC ASPHALT SCREED

IKO Permascreed LI offers a more considered screeding solution, combining zero water content, up to 38% lower embodied carbon, than previous IKO screed systems, and a curing time of around four hours, compared with the usual 28-day curing time of traditional concrete screeds.

HIGHWAYS & CIVIL ROAD PROJECTS

Keep the road network moving with our IKO Road range, which includes bituminous surfacing, bridge jointing and repair solutions for ironwork reinstatements, bridge decks and preventative maintenance.

CAR PARK WATERPROOFING

Designed for areas with high traffic movement, our IKO car park waterproofing range offers waterproofing and deck systems developed specifically for car parks, with high skid resistance and a durable surface finish for demanding deck environments.

SECTORS

From roofing systems to infrastructure solutions, IKO supports projects across the UK with specification-led expertise and practical technical guidance.

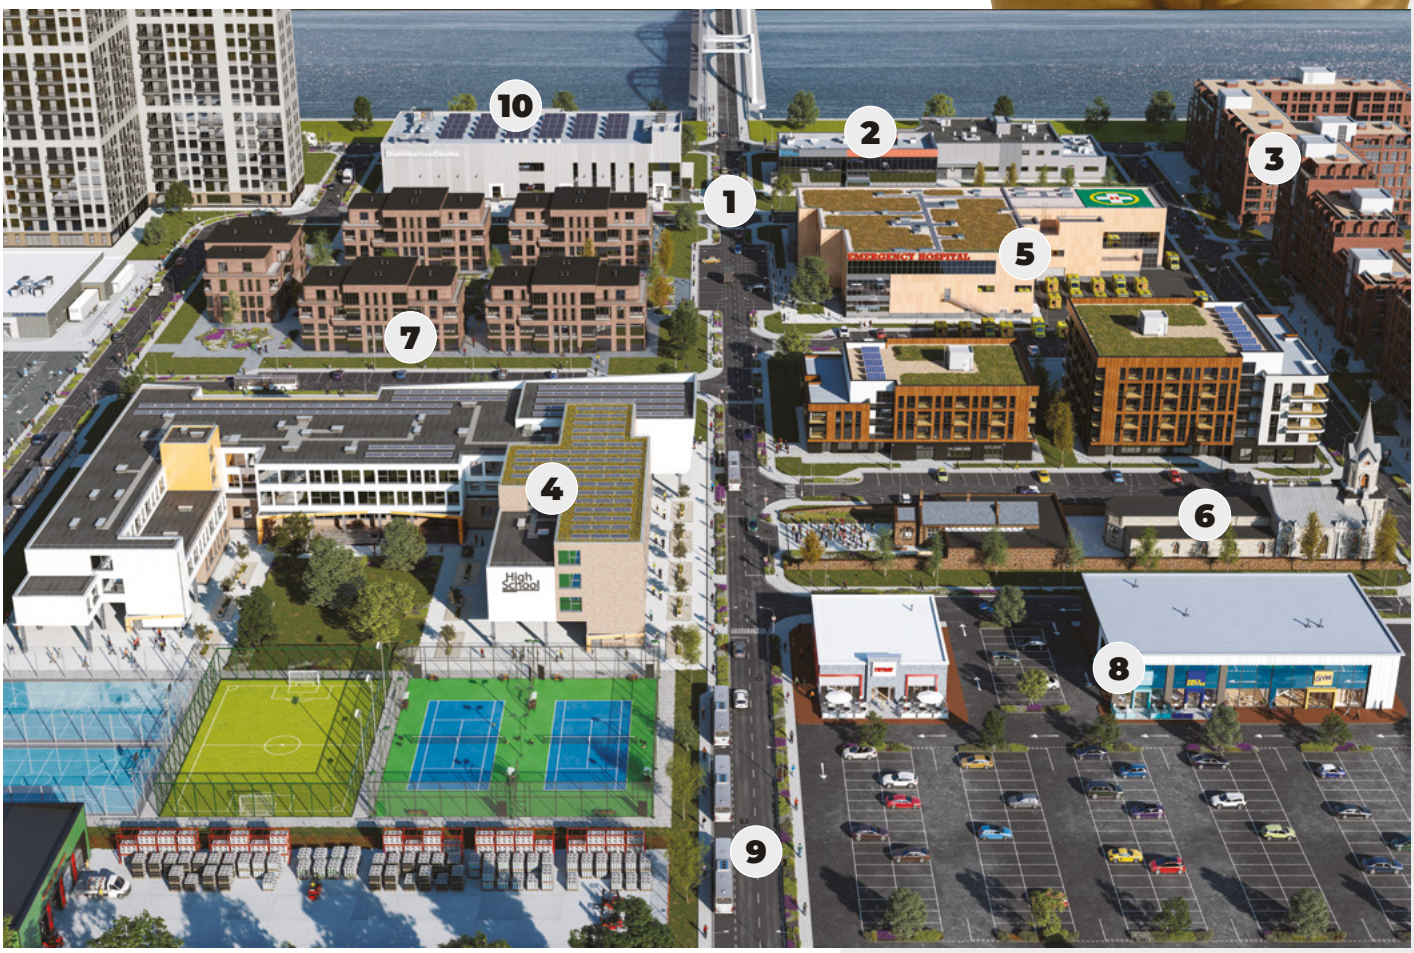

Working closely with architects, specifiers and contractors, we help shape solutions that respond to project requirements, support compliant design and contribute to a smooth path from specification through to installation.

SERVICE, QUALITY AND COMPLIANCE

At IKO, support goes beyond supply. We work in collaboration with architects, contractors and supply chain partners throughout the life of a project, helping guide decisions, resolve challenges and support delivery from concept through to completion.

RELIABILITY & QUALITY
UK manufacturing with expertise and robust quality control processes, IKO roofing systems are developed to support consistent product quality, with BBA-certified durability available across selected systems.

EFFICIENCY & TIMELINESS
Through established UK manufacturing and supply capabilities, IKO supports efficient project delivery with dependable product availability and responsive service when it matters most.

TECHNICAL EXPERTISE & SUPPORT
From early design discussions through to installation and aftercare, IKO provides practical technical guidance to help customers identify suitable solutions and respond to project requirements with confidence.

TRUST & COMPLIANCE
IKO works in line with relevant industry standards and regulatory requirements, supporting clear information, responsible specification and a transparent approach throughout project delivery.

SUSTAINABILITY
IKO's sustainability approach combines science-based carbon targets, PAS 2080-certified carbon management and wider ESG action across responsible sourcing, local manufacturing, low-impact product development and transparent reporting.

SYSTEM GUARANTEES
Our systems are installed by approved contractors, with operatives trained on the specific systems they use, helping to support consistent installation standards across the project.

Partnering with IKO means trusted support beyond product supply, with tested systems, clear technical guidance and a responsible approach to compliance, alongside sustainability commitments including Science Based Targets and PAS 2080-certified carbon management.
