6M | 10M DRY FIX RIDGE KIT

DATASHEET

Convenient mechanical fix solution for roof ridge installations

Use

- Most types of slate, concrete or clay roof tiles.
- Round or angled ridge tiles.
- Most pitched roof types from 15-55°.
- New build and retro-fit projects.

Features & Benefits

- Preassembled fixing screws and clamping plates.
- Ridge union with adjustable clip positions for ridge tile up to 30mm thickness.
- Universal ridge batten strap for ease and flexibility.
- Long lasting, reliable and virtually maintenance free.
- Protects against wind uplift, water ingress and general deterioration.
- Provides 5000mm²/m (5mm continuous) ridge ventilation.
- Easy, fast, clean and generally safer mortar free installation.
- Water resistant yet air permeable membrane roll.
- Strong, malleable and corrosion resistant aluminium flashing secured to roll.
- 55mm wide ridge union width provides additional water bar protection.
- Assurance of stainless steel clamping plates.
- Maintains consistently smart appearance.
- Not impacted by building settlement.
- Helps prevent entry of large insects, birds and vermin into the roofline.

Quality

- Helping to meet:
  - BS 5534 Code of practice for slating and tiling.
  - BS 5250 Code of practice for control of condensation in buildings.
- Complies with all other relevant regulations and standards.
- Independently tested and complies with BS 8612.

Material & Colour

- Ridge unions and clips manufactured from UV protected and colour fast polypropylene
- Water resistant and ventilated roll membrane with attached self-adhesive and coloured aluminium flashing (colour may vary from pictured)
- Galvanised steel ridge batten straps
- Stainless steel screws and clamping plates (colour may vary from pictured)
- Available in black
- All kits are supplied with black ridge unions and clips
