VENTILATION
ALLOWING ROOFS TO BREATHE

Ventilation is important, it helps to mitigate condensation, regulate moisture levels, and maintain thermal balance. Continuous circulation helps protect structural timbers, insulation and internal finishes from long-term damage caused by trapped heat or humidity. Our comprehensive range of roof ventilation, ancillary and dry fix installation solutions is engineered to meet industry standards, providing the assurance of proven quality, reliability and durability.

TRIED. TESTED. TRUSTED.

Timloc Building Products' InVentive range of roof tile and slate vents has successfully undergone BRE testing to PD CEN/TR 15601 for resistance to wind-driven rain, giving further assurance of quality and reliability.

Each test is a thorough evaluation of the vents' impact on roof weather tightness. The results speak for themselves — every vent tested successfully maintained the roof's weatherproof performance, providing proven protection and long-term reliability.
