

# Stannah Midilift CL

Safe, stylish, and reliable:  
cabin platform lifts for home  
and commercial access

**Stannah**

## Elegance and accessibility, combined

If you're seeking convenience and comfort, our range of cabin platform lifts might be your perfect fit.

Carefully designed for passenger movement – with a cabin and choice of controls – our Midilift CL can bring the confidence of a familiar lift experience into a wider range of settings.

At Stannah, we've successfully installed thousands of cabin platform lifts just like these, all over Great Britain. And now, we're launching a new era of safe, efficient, and environmentally friendly lifts for home and commercial use.

It's your lift, your way.

Lift car & shaft dimensions	12
Order & installation process	14

## A welcoming space – tailored to your environment

With a comprehensive range of lift cars, finishes, and materials – as well as indoor and outdoor options – Midilift CL has the versatility to suit all kinds of public and residential environments. Whatever your vision, we have the colours and textures to look the part.

Importantly, they'll also fit your space. All our lifts require a minimal pit as standard but can be placed on a finished floor with a ramp if a pit is not possible. This means you can enjoy the convenience of a cabin lift even when limited depth or headroom makes other lifts difficult.

### Energy efficient comfort – with simple installation

Our Midilift CL cabin platform lifts are built to meet the needs of vertical mobility in all private and public environments, with its hydraulic drive and microprocessor control system ensuring a smooth and quiet ride every time.

The smooth operation and stylish cabin provide a superior level of comfort and ease of use, whilst staying true to the typical small footprints and reduced builders work typical of these lifts.

But they're also built to consume as little energy as possible. The CL lift offers low energy consumption and uses a single phase power supply, with features such as green LED technology and energy saving programming.

### Robust safety and quality you expect from market leaders

We take safety extremely seriously, so we ensure every lift built and installed complies with our strict industry regulations and company processes, helping buildings to comply with the Equality Act, Part M Building Regulations (England and Wales), and Section 4.2 of the Building Regulations Technical Handbook (Scotland). Our Midilift CL range is CE marked, meets 2006/42/EC Machinery Directive and complies with the Supply of Machinery (Safety) Regulations 2008 (2008 No. 1597).

**And remember, it's from Stannah**

When you choose the Stannah name, you get the kind of support that only comes from a family business – with five generations of lift expertise.

From your initial enquiry to installation and beyond, our friendly experts will support you every step of the way to deliver your ideal cabin platform lift.

If you're a private homeowner looking to future-proof your building or add a little extra luxury, we can work alongside your contractor to make your vision a reality. Likewise, commercial customers can deliver stylish, compliant accessibility that satisfies the Equality Act.

Plus, every model has a two-year warranty, including four service visits per year for added peace of mind.

## Simple, cost-effective access for all

The CL range delivers a traditional cabin platform lift experience with great features.

### Key facts

Lift description	Platform lift with full-height cabin
Max. no of stops	5 stops
Max. travel (m)	12m
Speed (m/s)	0.15 m/s
Load (kg)	250kg, 315kg, 385kg (depending on car size)
Application	Indoor or outdoor
Drive type	Hydraulic drive with remote control cabinet 700mm (w) x 400mm (d) x 1500mm (h)
Entrance configuration	Single / through / adjacent car/ three sides
Fixing	Structure supported / Wall mounted into shaft by others
Guide mounting	Side mounted / Rear mounted
Headroom	Internal car height + 350mm
Internal car height	2100mm as standard
Pit Depth	100mm or 120mm with granite floor in the car
Control type	Constant pressure/ Automatic (with car door option)
Door type	Choice of cabin and landing doors
Power	Single-phase supply (25A Type C MCB)
Noise	Between 57-63 dB(A)

## Technical features

	Standard	Optional
<b>Lift structure</b>	<ul style="list-style-type: none"> <li>• Wall-mounted into shaft by others</li> </ul>	<ul style="list-style-type: none"> <li>• Painted steel shaft structure in RAL 9016 (traffic white) finish with infills to match</li> <li>• Structure and infills painted in a different colour (RAL)</li> <li>• Clear glass infills</li> </ul>

## The nation's lift specialist – for more than 150 years

The Stannah family has been installing and servicing lifts across Great Britain since 1867. That heritage brings some important benefits.

Naturally, we want you to get the perfect lift experience. But we understand that goes beyond just delivering a product. It also means being there when it matters most.

Whether you're a homeowner or a professional, you'll enjoy a tailored service, including on-site planning, a dedicated project engineer and technical and maintenance support post installation.

In fact, we make the same four commitments to every customer:

- ✓ A company you can rely on
- ✓ Costs that make sense
- ✓ Superior service and ongoing care
- ✓ Quality guaranteed

Always true to our word

### Six steps to your ideal lift

#### You make contact

You can contact us via email or phone to get started on your Stannah journey, sending any photos, project details, building drawings or required specification you may have.

#### We'll provide a free no-obligation quote

Based on your information we can either supply a free no-obligation quote or if needed we'll get in touch to visit your home or commercial location to discuss your options.

#### Confirm your interest

Once you've decided to proceed, and you're happy with the quote, just give us a quick call and we'll begin finalising contracts and getting to work on your builder's work drawings and requirements to enable you to get the site ready for lift installation.

#### Getting site ready

Working to our product delivery timescales and any project deadlines, as the project progresses your dedicated project engineer will visit. They'll run through the lift specification with you and complete any dimensional checks we need before installation.

#### Installation begins

Two of our NVQ-qualified installers will fit your lift quickly and safely, working to the highest standards. Once ready for the final stages of lift install we'll provide a detailed handover to ensure you are confident using your lift.

#### Ongoing support from a leading service company

Every one of our latest Midilift CL products comes with the added reassurance of ongoing servicing through one of our 11 service branches. Our branch network takes care of all makes and models of lifts and our exemplary service levels, breadth of coverage, and 100,000-strong service portfolio set us apart from the competition.
