KÖSTER CT 227 1C Silane System

Concrete waterproofing system

KÖSTER CT 227 1C Silane System

The KÖSTER CT 227 1C Silane System is a one-component, diffusible, low-odor, crack-bridging, easy-to-use waterproofing system for indoor and outdoor use on mineral substrates such as concrete, cement screed, and mineral plasters and on stable old coatings in private and commercial real estate.

Areas of application

BALCONIES

TERRACES

GARAGES

Key features KÖSTER CT 227 1C Silane System

- Very good coverage
- High UV and weather resistance
- Resistant to medium mechanical and chemical loads
- Good slip resistance: With the addition of KÖSTER Anti-Slip Granulate 20, a slip resistance class of R10 is achieved. R12 can be achieved by fully covering with kiln-dried quartz sand CT 485, 0.7 - 1.2 mm.
- By using KÖSTER Color-Chips with contrast and full broadcast as well as surface sealing with KÖSTER CT 327 1C Sealer, a wide variety of individual surface designs can be achieved
- Low odor during processing
- Physiologically harmless

System components

10 kg

KÖSTER CT 227 1C Silane
is a one-component, crack-bridging, UV- and weather-resistant, solvent-free, pigmented floor covering for light to medium mechanical and chemical loads.

5 kg
