

Wykamol are installing almost 400 solar PV panels across their two production sites

A SOLUTION FOR EVERY PROBLEM

THE UK EXPERTS IN GREEN WATERPROOFING AND PROPERTY PRESERVATION

Our solar energy investment will be saving over 62 tonnes of CO² emissions per annum, but what does this mean in plain measurable terms?

- Enough energy saved to make 1,170,000 cups of tea, that's 22,500 cups per week!
- Enough energy saved to drive 189,000 miles in a large 2L diesel vehicle, that's 3600 miles per week!
- Enough energy saved per annum to stop the melting of 186M2 of Artic ice , that by the way is about 2.5M in thickness!
