

THE EXPERTS IN SOCIAL HOUSING SOLUTIONS

MAKING HOMES WARMER

Dryseal has been formulated to deeply penetrate external masonry and provide optimal protection against the absorption of water and pollutants, as well as frost and salt damage.

Keeping external walls warm helps prevent both thermal conductivity and condensation on the internal walls.

Renovation Plaster is a BBA approved, fibre reinforced, cementitious plaster with damp-proofing and anti-condensation properties.

Ideal for use after an application of damp-proofing cream to prevent damage to decorative finished by residual wall salts and moisture.

Thermal Dry is a thermally insulating and water repelling, anti-condensation coating. Ideal for entire houses or individual rooms which suffer from black spot mould, caused by condensation. Black spot mould has a detrimental affect on the homeowners health, particularly the young and elderly, but with an application of ThermalDry, these undesirable conditions are avoided.

✓ UP TO 29% ENERGY SAVINGS

✓ UP TO 20 YEARS PROTECTION

✓ A PENETRATION DEPTH OF UP TO 17MM

✓ IMPROVES INSULATION BY KEEPING SURFACES DRY

✓ DRIES COLOURLESS

✓ EFFECTIVELY CONTROLS DAMP AND SALT MIGRATION

✓ PERLITE ENHANCED TO PROVIDE INSULATING PROPERTIES

✓ REDUCES THE RISK OF CONDENSATION

✓ PREVENTS FORMATION OF BLACK MOULD AND OTHER HARMFUL FUNGI

✓ HIGH COVERAGE RATE

✓ SIGNIFICANTLY REDUCES THE RISK OF CONDENSATION

✓ KEEPS WALL WARMER

✓ ANTI-BACTERIAL PROPERTIES

✓ IMPROVES THERMAL EFFICIENCY
