CYCLE SHELTERS BROCHURE

ACADEMY

cycle shelters

▲ **ACADEMY Cycle Shelter**
galvanised finish with polycarbonate roof
installed at Foss Island Business Park, York
shown with five COLLEGE stainless steel cycle stands (see page 86-88)

Furnitubes range of Academy free-standing covered shelter units are an ideal way to encourage cycle use. The contemporary heavy duty steel frame is extremely strong and galvanised for long-term protection against the elements.

In a bid to reduce the amount of car journeys, staff and pupils are being encouraged to cycle to work and school. The provision of cycle stands and shelters reduces cyclists fear of theft or damage to their bikes, and protects bikes from the elements. Secure cycle parking at stations, interchanges and visitor attractions increases traffic flow and reduces congestion by promoting bicycle and rail travel through integrated transport.

The durable corrugated roof is available either galvanised or galvanised and plastisol colour coated. A 10mm dual-walled clear polycarbonate roof is also available as an attractive modern option.

▲ **ACADEMY Cycle Shelter**
supplied to King Egbert School, Sheffield
galvanised finish with polycarbonate roof
shown with seven COLLEGE stainless steel cycle stands (see page 86-88)

▲ **ACADEMY Cycle Shelter**
plan view of cycle shelter
four cycle stands installed
accommodating eight bicycles

Shelters are supplied in kit form for assembly and installation on site. They are flanged for bolting down as necessary. The standard shelter can accommodate four College steel cycle stands, supplied separately (see pages 86-88). This will accommodate eight bicycles. Other combinations can be used.

Alternative shelter lengths, extension bays or bespoke designs are manufactured to order. Please contact a member of our Sales Team for more details.

TECHNICAL

Standard shelters are designed to house eight standard bicycles.

Installation

Shelters are supplied in kit form for site assembly. Roofing needs to be drilled on-site. Full instructions are provided.

We recommend that each foot is bolted down into a minimum concrete foundation size of 400 x 400 x 400mm.

Powder Coating

The Academy Cycle Shelter can be powder coated, providing a hardwearing, weatherproof surface. Large range of BS/RAL colours are available. For further information on paint finishes see pages 337-339.

Product Codes are in **bold type**. Dimensions are in mm, are approximate and do not form any part of the contract.

We reserve the right to change the design and specification on any item offered and, where possible, notification will be made.

FIN

cycle shelter

▲ FIN Cycle Shelter
shown with the FIN cycle stand (see page 90)

The Fin shelter is supplied in component form for easy installation on site. They are flanged for bolting down as necessary. The standard shelter can accommodate up to four Fin steel cycle stands, supplied separately (see pages 90-92). This will accommodate eight bicycles. Other combinations can be used.

The freestanding Fin cycle shelter features a roof that slopes from the front to the rear, protecting bicycles from the elements.

The single sided galvanised steel cycle shelter has a clear PET roof. The shelter is available with powder coated mesh doors. Frames are available painted as an extra option (see below).

ALPINE

cycle shelters

Furnitubes Alpine range of cycle shelters are a robust modular solution for cycle storage available in a range of configurations, sizes and finishes.

The new range is designed with security in mind, with large panels of see-through PET allowing CCTV to monitor the safety of bikes.

Suitable for bikes, motorcycles and scooters, the Alpine shelter is manufactured from heavy duty box section and constructed with fully welded panels. The 5mm thick transparent PET provides high visibility and keeps the shelter light and gives the feel of open space.

The modular Alpine units allow for a range of overall lengths. Adjustable feet provide the shelter with a degree of tolerances to suit variable site conditions.

ALP821-8150 Galvanised ►
Cycle stands on racks

ALP821-8150 EF Powder Coated ▼
Extended Front. Gate with hasp locks.

Supplied flat packed with installation instructions. Alternatively, an installation service with groundwork is available.

A range of colours are available for the powder coated framework of the shelter. Please contact Furnitubes for further information.

Shelters can also be fitted with an optional extended front with a variety of locking options.
