Discover the Benefits of Consort Claudgen's Electric Heating Solutions

Designed for Comfort, Engineered for Efficiency

At Consort Claudgen, we understand the unique needs of hotels and B&Bs. Our diverse range of electric heaters and air curtains offer many benefits, making it a popular choice in the hospitality industry.

Energy Efficiency

Electric heating systems are highly efficient, converting nearly 100% of the electricity into heat. This ensures minimal wastage of energy, reducing overall energy consumption and costs.

With high-performance heating elements and advanced control features, our heaters can help you manage energy consumption effectively, leading to substantial cost savings over time. Opt for our advanced models with features such as presence detection or open window detection for even more energy management options.

Comfort and Control

Comfort of your guests is paramount. With our heating solutions, guests can easily personalise their room's temperature. Options like Wi-Fi capabilities, wireless controllers or integrated electronic 7-day timers allow for easy customisation, ensuring a warm, comfortable stay that leads to glowing reviews and repeat business.

Easy Installation

Our electric heating systems are relatively easy to install compared to other heating options. They don't require complex ducting or pipework, making them ideal for retrofitting in existing buildings or rooms.

Versatility and Design

Whether it's the lobby, guest rooms, dining areas or outdoor patios, we have a heating solution to match. Our heaters are not just functional, but also aesthetically pleasing, designed to blend seamlessly with any interior or exterior setting, enhancing the overall look and feel of your establishment.

Dependable Quality

Quality and reliability are at the heart of every Consort Claudgen product. When you choose our heaters, you're investing in durable, high-quality units that are designed to withstand the test of time, ensuring a comfortable environment for your guests, year after year.

Explore our diverse product range and find out how Consort Claudgen can bring comfort, energy efficiency, and cost savings to your establishment today!

Transform Your Hospitality Space with Consort Claudgen

At Consort Claudgen, we understand that every corner of your hotel or B&B contributes to your guest's experience. Our diverse range of electric heaters seamlessly blend in with your establishment's décor while ensuring optimal comfort and energy efficiency.

Entrance and lobby areas

The first impression counts. Our air curtains and high-level fan heaters provide consistent, welcoming warmth while preventing drafts and energy loss from frequently opened doors. Their stylish design elevates the ambience, impressing your guests right from the start.

Bedrooms and bathrooms

Guest comfort is our priority. Our panel heaters, with Wi-Fi capabilities, wireless controls or integrated electronic 7-day timers, offer a personalisable room temperature. Their sleek design harmonises with any interior, enhancing your guests' restful stay.

Conference or meeting rooms

Ensure productive and comfortable meetings with our panel heaters and wall-mounted Chelsea fan heaters. These offer energy-efficient heating with versatile control options, creating a conducive atmosphere for any event.

Restaurants or bars

Our panel and radiant heaters maintain the perfect ambience for a memorable dining experience. Easy temperature adjustments mean staff can swiftly respond to guest needs and weather changes, ensuring ultimate comfort.

Spa or Fitness centre

In the challenging environments of spas and fitness centres, our ceiling heaters and quartz or radiant heaters provide effective warmth without compromising on efficiency. Your guests can relax and rejuvenate in an optimal setting.

Outside areas

Our IP55 Waterproof Quartzzone heaters extend indoor comfort to the outdoors, ensuring your guests can unwind comfortably in any weather.

In addition to providing premium heating solutions, we at Consort Claudgen offer exceptional service and support, always ready to assist with any questions or concerns. With us, you're not just buying a product - you're investing in a partnership. Let us help you create a warm, inviting, and energy-efficient environment that will keep your guests coming back.

Choosing the Right Control for Your Needs

Consort Claudgen understands that every hotel or B&B has unique needs and challenges, so we developed a wide array of heating control options to ensure your guests enjoy a comfortable stay. At the same time, you can enjoy maximum energy efficiency and ease of use.

Consort Connect

Experience advanced, comprehensive heating control with our Consort Connect app. This application facilitates the remote control of heating, including programming and energy-saving features.

It also provides an overview of energy consumption statistics, from daily to annual usage. The app is compatible with WiFi-enabled electronic 7-day timers and SL Consort heaters linked to an SLPBWIFI wireless controller.

Electronic 7-day timer

Our electronic 7-day timer heaters allow the programming of six different heating periods daily. The user-friendly digital control panel offers an easy-to-read display and tactile feedback buttons. It ensures efficient energy consumption through the ability to set comfort and setback temperatures.

Wireless control

- **SL run-back time control and thermostat**

These controls allow an operational heating cycle only when the controller is activated. The ease of installation and set-up is notable, with the ability to operate multiple SL heaters.

- **Advanced single zone wireless controllers (CRXSL, HRXSL and LC)**

These advanced controllers offer a programmable 7-day timer with six daily heating periods. They provide stable and accurate temperature control, resulting in improved energy and cost savings.

- **Multizone Control**

Our Multizone Control unit lets you independently manage temperatures for up to 8 different zones, ensuring the perfect climate in every corner.

- **Landlord Control**

For owners seeking total control, our Landlord Control system integrates an MLC controller with one or more LC controllers. Depending on your building's layout, you can control any number of LC controllers, offering unrivalled heating control across your property.

Note: All Electronic 7-day timer models are available with Wi-Fi ('WIFI'). Wi-Fi and Occupancy Sensor ('MWIFI') option is available with PLE and LSTE models only.

At Consort Claudgen, we don't just offer heating solutions - we provide tailored systems to match your exact needs, ensuring your guests' comfort while maximising energy efficiency. Our experts are always on hand to help you select and implement the best heating control options for your hotel or B&B.

**Experience the Consort Claudgen difference
- where quality meets innovation for
superior heating solutions.**
