Multipart Flushglaze Rooflight

402-TDS-UK-002 - v1.3 - 23 Mar 2021

Name: Multipart Flushglaze

Type: Fixed flat modular rooflight

Description:

The Multipart Flushglaze is a fixed modular product designed to provide maximum daylight with minimum visible internal structure. This product is available in four different configurations:

Self-Supporting	Back-to-Back	Glass-Fin	Walk-On
A simple weathertight silicone	An internal beam formed of	A heat-strengthened laminated	A walk-on product using back-
joint is used between the	two back-to-back angles is	glass fin is used to support the	to-back angles to support the
glazed units.	used to support the edges of	edges of the glazed units at	edges of the walk-on glazed
	the glazed units at their joints.	their joints.	units at their joints.

A variety of optional extras such as special colour and easy clean coating are available.

This product is robust and long-lasting, boasting excellent thermal performance and air tightness.

Intended Use:	Fixed rooflight to provide natural daylight and weather resistance. The product is fixed and does
	not open. Only walk-on units may be walked on.

External Weathered Upstand Dimensions of Standard Flushglaze Unit: Min Section Span: 400 mm Max Section Span: 4000 mm Min Section Width: 400 mm Max Section Width: 4000 mm Min Section Area: $0.16 \, \text{m}^2$ Max Section Area: 10.00 m² 3° Min Upstand Pitch: Max Upstand Pitch: 70° Glazing Vision recommends a pitch of at least 5 degrees for standard units.

External Weathered Upstand Dimensions of Walk-On Flushglaze Unit: Min Section Span: 400 mm Max Section Span: 4000 mm 400 mm Max Section Width: 4000 mm Min Section Width: Min Section Area: $0.16 \, \text{m}^2$ Max Section Area: 10.00 m² Max Upstand Pitch: 1° 70° Min Upstand Pitch:

Glazing Vision recommends a pitch of 1° for walk-on units.

Note that the minimum and maximum span, width and pitch are dependent on various factors, your technical sales advisor will be happy to advise on these. Further information on upstand requirements and product dimensions can be found on our website or by contacting your technical sales advisor.

Glazing:

A wide variety of glazing specifications are available for this product. Your technical sales advisor will be happy to answer any questions regarding specific glass specifications or glazing performance requirements. Otherwise, quotes include suitable and cost effective glazing proposals.

Unless otherwise stated, the default loadings used for specifying walk-on glass will be a distributed load of $1.50 \, \text{kN/m}^2$ and a concentrated load of $2.00 \, \text{kN}$ per a $50 \, \text{mm} \times 50 \, \text{mm}$ square area (standard domestic loadings). A variety of anti-slip finishes are available for walk-on glass.

Standard Colours:

Qualicoat approved RAL 7015 slate grey outer, where inner framework is visible (back-to-back and walk-on units), this is also RAL 7015 as standard.

Performance and Weathertightness:

The aluminium frame of the product employs a dual hardness EPDM insulating gasket to thermally isolate the frame from the interior of the building. Structural integrity is assured through the use of finite element analysis (FEA) and testing.

U-values are calculated for each product and will be supplied in our quote. Further information and specific performance details can be obtained from your technical sales advisor.

The product is sealed to the upstand using silicone and fixed in place with structural fixings which are either concealed by a clip-on cover or with lead (or other material) flashing (wall abutted units) leaving a sleek external finish.

The standard Flushglaze unit has been thoroughly tested and achieved the following classification

Size: 2000 mm span x 2500 mm width Pitch: 0°

Test	Standard	Classification/Declared Value	
Air permeability	EN 12207	Class 4	±600 Pa
Watertightness	EN 12208	Class 9A	600 Pa

Security and Certification:

This product is designed with security as a priority. This product is tested to LPS2081 Issue 1:2015. It is approved by the Loss Prevention Certification Board (Cert/LPCB ref: 1347a) and Secured by Design:

Secure (Security Rating A)

Secure+ (Security Rating B)

separated by an 0.8 mm thick PVB interlayer).

The inner pane must be at least 8.8 mm PVB The inner pane must be at least 9.5 mm ionomer laminated glass (two 4 mm thick panes laminated glass (two 4 mm thick panes separated by a 1.5 mm thick ionomer interlayer).

This product has been independently performance tested by the British Board of Agrément (certificate number 12/4895). To achieve certification, it underwent a rigorous testing regime that included weathertightness, security, thermal performance, structural integrity and durability of paints and sealants.

Optional Extras:

The following optional extras are available for this standard product at additional cost:

Easy Clean Coating: A coating applied to the external face of the glass that facilitates water run-off. Helps the

glass stay cleaner for longer and makes cleaning easier.

Self-supporting and glass-fin units have a single colour as standard. This can be swapped Special Colour(s):

for a special colour. Back-to-back and walk-on units have separate inner and outer colours

as standard. Each can be swapped for a special colour.

Cover designed to mask the top of upstands which may be visible through glass when Upstand Top Trim:

viewed from above. Includes detail to recess standard plasterboard.

Wall Abutments: The product can be fixed and weathered to a wall rather than an upstand on up to three

sides.

EPDM: A flexible membrane to provide additional waterproofing between the upstand and the

product. This option is only available for the Walk-On Multipart Flushglaze.

A suite of sales drawings is available.

Bespoke options may be available upon request but may incur additional design fees – contact your technical sales advisor for more information.
