

Hidden Platform Lift

A simple yet effective access solution. The Hidden Platform Lift combines elegant design with robust construction, which can be fully adapted to its surroundings. When not in use, the lift is hidden in the floor where it flushes with the existing floor.

Hidden Platform Lift

Standard Features

Suitable for indoor or outdoor installation
Overcomes small level differences up to 500mm
Robust system with a high lifting capacity of 400kg
Safety skirt (rises 100mm) roll off protection

Optional Features

Flooring by others to match existing floor material
Remote control
