# COPPER CASTINGS

## Copper Castings

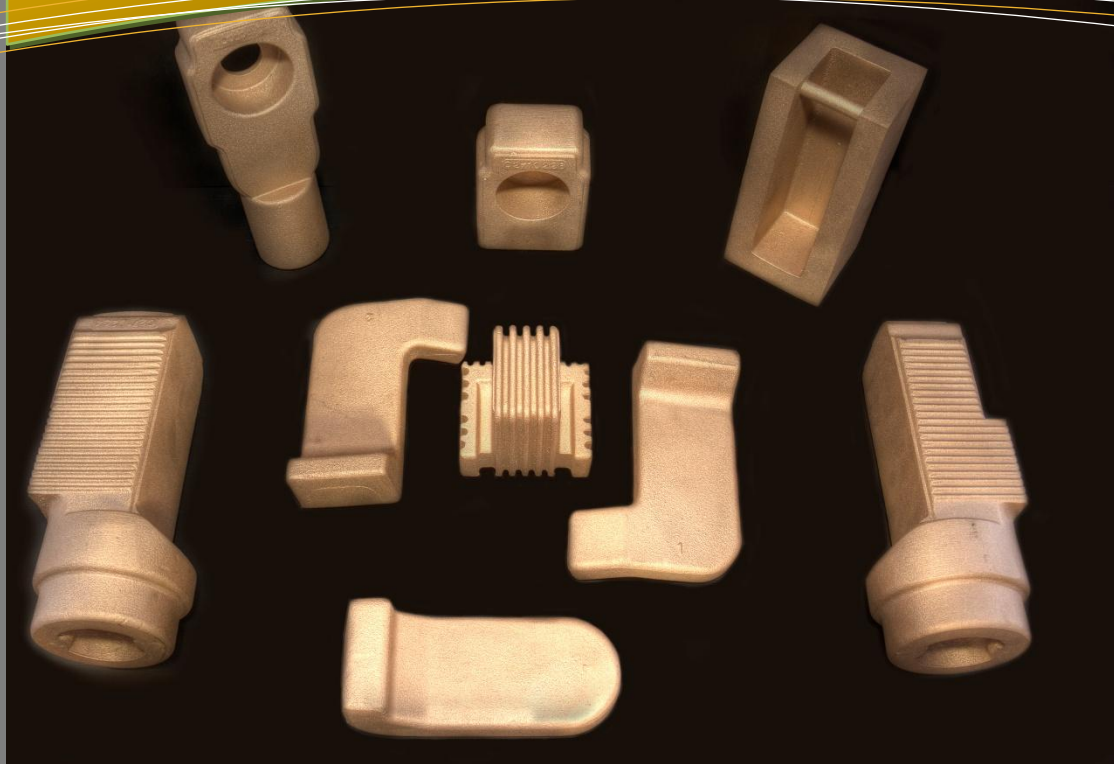

FSE Foundry has specialised in sand castings for resistance welding and electrical switchgear for over 50 years.

Applications range from:

Busbars

Switchgear

High heat-transfer parts

Copper alloys available:

High Conductivity Copper

Chrome Copper

Nickel Silicon Chrome Copper

Close control of the casting and heat treatment variables ensure that demanding conductivity and mechanical properties are achieved often to over 98% IACS.

FSE also have the ability to incorporate water cooling tubes within the casting.

FSE Foundry can provide you with complete service, from pattern design and production, to metallurgy, quality control, castings and finishing, all under one roof

WE AIM to:

- Provide a quick response to enquiries with manufacturing expertise
- Provide a number of casting processes to meet customer requirements
