

INSTARMAC

highway maintenance | streetscape systems | tile adhesives and grouts | commercial flooring

the company

Instarmac Group plc is a multi award-winning market leading company – a specialist in the manufacture and distribution of cement, bitumen and resin based products to the world market for over 30 years.

service

more than just a material supplier

At Instamac we believe that service does not begin and end with an order. Technical support, practical on-site training, material innovation and in-house logistics are all at the heart of our overall service package.

We are committed to delivering high specification, rapid strength, fast-track products and systems, to ensure high standards of quality and resilience. We offer everyone expert customer service, technical advice, site support, comprehensive bespoke training and RIBA CPD accredited seminars.

state-of-the-art facilities

A purpose designed outside skills area and an indoor training facility are specially developed for your use. Our external demo area is ideal for our highways maintenance and urban regeneration systems, whilst our interior high-spec training room gives the perfect environment for using our commercial flooring and tiling products.

material awareness

A purpose designed training centre offers our customers and specifiers the opportunity to try products prior to contract, ensuring maximum confidence in use and ultimately delivering best value to the client.

at the forefront of technology

Innovation, Research and Development are stimulated by the relationships with our customers. **Listening to needs** and providing real solutions.

responsibility

environment

We have implemented a number of measures such as intelligent lighting, rain waste and washout recycling, warm air recycling, waste oil, printer cartridge, plastic and pallet management.

All of these measures, and a company culture that constantly strives for new initiatives, has led to our seal of approval from the Carbon Trust.

Working with the Waste & Resources Action Programme (WRAP) we are continuously increasing our use of recycled materials such as glass and rubber.

“ It is vital that Instarmac balances its commercial, social and environmental responsibility to deliver a sustainable business plan ”

the brands

Instarmac Group plc sell a wide range of construction industry materials and systems under four specialist brands.

ULTRA CRETE

A range of products developed with unique rapid set properties, for highways maintenance, 1st time permanent repairs and BBA/HAFAS approved ironwork reinstatement for grades 2, 3 and 4 carriageways.

ULTRA SCAPE

A range of streetscape products, from bedding mortar to grout to surface sealer, for all landscape and urban regeneration projects.

ULTRA TILE

An extensive range of specially formulated paste and powder tile adhesives, coloured grouts, sealants and primers for today's innovative fixing industry.

ULTRA FLOOR

A professional commercial flooring range of products including levelling and smoothing compounds, patch repair mortars, primers and damp proof membranes.

Instarmac provide a discreet contract blending service, and are happy to discuss individual requirements.

“As an award-winning innovative company we have dedicated our time and resources into thinking green and investing in the future.”
