AUGUST 2013

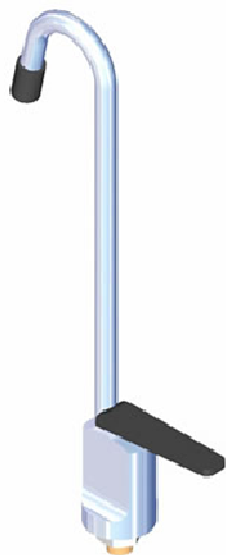

Replacement Bottle Filler for Aqua Water Coolers

The Bottle filler supplied with Aqua Water Coolers was upgraded in January 2013.

Acorn Powell has retained a small number of the old style filler (model AQ-A7012-011-001) to cover replacement needs.

The list price each is £75.00.

A replacement trigger (the part coloured black) is available separately as a spare part at a nett price of £7.00

The replacement unit (AQ-GF1) is operated by a push-button rather than the lever on the old filler. The push button model should be more vandal resistant than the lever version..

The new model is priced within our taps catalogue with a list price of £60.00

Unfortunately the old version cannot easily be replaced by The new one as the original tap hole diameter is too small for the new filler. The hole would have to be increased from approximately 12mm to 18mm diameter.

If the skills/facilities are available to drill out the tap hole, we would recommend the new one. However, if in any doubt, we would recommend a like-for-like replacement.

Both taps are subject to 5% discount off the list prices above.

The carriage cost in both cases is £7.50. VAT is extra.
