## Compatible flooring and wall cladding system

### Made for each other

Anthony and Cleopatra. Ant and Dec. Fish and chips. Some things are meant to be together – like Altro flooring and Altro wall cladding. They've been designed to fit together perfectly, forming a sealed, watertight system for enhanced safety and hygiene. And because our flooring and wall cladding are designed to be compatible, when they're installed correctly, you won't need to worry about joined surfaces 'parting company'. This makes them great for areas like kitchens and bathrooms where you can't compromise on safety and hygiene.

## Coordinating designs

Our flooring, wall cladding and doorsets aren't just designed to work well together – they're designed to look good together, too. We develop our colour palettes to match or complement each other, so you can create harmonious interiors.

Of course, there are times when you want colours to contrast – for example, to aid way finding for those with dementia or impaired vision. We have lots of expertise in this area and can give you information on appropriate colour combinations.

## Matching accessories

We also have a range of accessories to enable you to create watertight, fully sealed junctions between our flooring and wall cladding – including colour-matched joints and welds for discreet transitions and a great-looking installation. Job done.

## Saving you time, hassle and money

When you buy flooring and wall cladding from us, life becomes easier. You'll just need to deal with one person, saving you time and hassle. We also offer the convenience of:

- full project management, including specification writing, cleaning information and on-site demonstrations
- dedicated technical hotline, service excellence manager and local sales consultants covering all projects
- site visits when required – pre, during and post installation
- readily-available stock and delivery, with a nationwide distribution network
- a full range of CPD presentations to help you understand the key factors in product choice
- package pricing

## Peace of mind

Altro were established over 95 years ago and we're now a leading global manufacturer of flooring and hygienic wall cladding. This means you can rely on us to deliver what you need, when you need it. The Altro promise is our commitment to putting you first in everything that we do.

## Warranties for products and installations

We have full confidence in the long-term performance of our products, and we back this up with generous, industry leading warranties. Wall cladding installations undertaken by Altro Premier Installers are also warrantied.

Rosemary Shrager's Cookery School

## Tested and proven products

With over 60 years' experience in safety flooring and 30 years' experience in hygienic wall cladding, we have an in-depth understanding of the market and know our products stand the test of time.

- All Altro products are rigorously tested to UK and European standards
- We have lots of case studies and testimonials for your references
- Trial areas and local references sites are available – just ask

## Sustainability

We can help you reduce your carbon footprint with our sustainable products. Our safety flooring contains recycled parts, and some of our flooring can be re-used and recycled post-consumer. To maximise recycling of our products, we co-founded the Recofloor recycling scheme in 2009 and founded Recowall in 2010.

**Don't forget, if you want help writing NBS specs just ask!**

# Solutions for **commercial kitchens**

## – how we have all your needs covered

### **Altro Whiterock hygienic wall cladding**

1. Fully sealed, hygienic system
2. Fully bonded to substrate
3. Prevents water ingress and debonding
4. Reduces unsightly stains
5. Internal and external angles are thermoformed on site to create an uninterrupted surface with pencil size radius corners; this removes the need for corner trims, which can trap dirt
6. No grout means dirt and bacteria have nowhere to hide
7. Very tough to chip or crack, providing significantly better impact resistance than tiles
8. Compliant with European Directive on the Hygiene of Foodstuffs

### **Altro Stronghold 30 safety flooring**

9. Provides safety underfoot in heavy traffic conditions where water, oil and fat are present and frequent spillage is likely
10. TRRL  $\geq 55$ , our highest rating for slip resistance
11. Sustained slip resistance of 20 years
12. 3mm thick for lasting durability, noise reduction and comfort
13. Impervious, non-absorbent and washable
14. Compatible with drainage systems

### **The integrated system**

15. Totally sealed, hygienic system
16. Impervious, non-absorbent and washable
17. Withstands extremes of hot and cold temperatures
18. No shedding of loose particles from flooring or wall cladding means no nasties in the food
19. Coved junctions between wall cladding and flooring
20. Both flooring and wall cladding are approved by HACCP, meaning reduced hazard risk and fewer inspections
21. Sound investment – designed to retain appearance for up to 20 years

# Solutions for **wet areas**

## – how we have all your needs covered

### **Altro Whiterock hygienic wall cladding**

1. Fully sealed, hygienic system
2. Fully bonded to substrate
3. Prevents water ingress and debonding
4. Reduces possibility of bacterial / fungal growth
5. No grout means dirt and bacteria have nowhere to hide
6. Internal and external angles are thermoformed on site to create an uninterrupted surface with pencil corners; this removes the need for corner trims, which can trap dirt
7. Very tough to chip or crack, providing significantly better impact resistance than tiles

### **Altro Aquarius safety flooring**

8. Sustained slip resistance of TRRL  $\geq 50$ , which provides safety underfoot and protection from the dangers of water and soap build-up
9. For shoe or barefoot use in wet or dry
10. Safety in any type of shoe – rubber, hard or soft soled and trainers
11. Can be laid to falls so is compatible with draining systems and gulleys, unlike tiles

### **The integrated system**

12. Totally sealed, hygienic system consisting of wall cladding, doorsets, flooring and jointing
13. Robust system that can be hosed down or pressure washed
14. Coved junctions between wall cladding and flooring
15. Flooring and wall cladding can be overlapped for watertightness and hygiene
16. Concealed transition strip can be used to provide a greater angle between flooring and wall cladding, meaning water is less likely to run under the join
17. Meets requirements of the Equality Act
