- ▲ COMPETITIVELY PRICED
- ▲ OPTIONAL **Enviro-Glaze** COLOUR FINISHES ON LENGTHS UP TO 2400 mm

Description

The trough urinal can be wall mounted at adult or junior height leaving the floor clear for ease of cleaning and hygiene. The wall hung urinal is economically priced, easy to install and can be supplied, as an option, in a choice of Enviro-Glaze colour finishes making it an ideal alternative to traditional ceramic bowl urinals. The product is available in a range of standard and special lengths.

Construction

The urinal is manufactured in one piece without joints or crevices from 304 grade stainless steel, with all exposed surfaces polished to a satin finish

The requisite fall to either a right or left hand outlet is built into the channel and the back of the urinal is designed to ensure an efficient spread of flushing water without drips or splashing. The urinal back panel is sound deadened to eliminate drumming. Available in either five standard lengths or special lengths, all urinals incorporate concealed sparge pipes and integral return ends for either wall or free standing installations.

Each urinal is supplied with a dome grated waste fitting and automatic cistern and flushpipe.

Options

- ▲ Corner infill section for "L" or "U" plan configuration
- ▲ End feed and off centre flushpipe connection
- ▲ Stainless steel automatic cistern product code 131
- ▲ Stainless steel undershroud to conceal waste pipework
- ▲ Choice of **Enviro-Glaze** colour finishes (up to 2400mm length)
