- ▲ EASY TO CLEAN AND MAINTAIN
- ▲ SMOOTH NON-PORUS HYGIENIC DESIGN
- ▲ WIDE CHOICE OF COLOURS
- ▲ CAN BE SUPPLIED WITH OPTIONAL SENSOR SPOUTS OR MECHANICAL TAPS

Description

The solid surface wash trough is ideally suited for use in schools, universities, nightclubs, bars, restaurants, office and hotel washrooms, where a modern aesthetically pleasing appearance is desired.

The wash trough can be supplied in a choice of standard or special colours in both splashback (for wall mounted water outlets) or taplanding (for deck mounted outlets) designs. The solid surface wash trough is designed for deck mounting, or "sit-on" type installation onto a base unit, carcass or vanity unit (by others) and is supplied in a range of standard or special lengths.

Construction

The wash trough is manufactured from a blend of acrylic resin, natural pigments and aluminium hydroxide to give a natural stone appearance. A two stage thermal curing process at high temperature gives the solid surface material superb strength and durability. The coloured wash trough is formed with a centre waste outlet and either an integral splashback or a taplanding with rear upstand. The wash trough is designed for deck mounting, or "sit-on" type installation onto an existing vanity unit type construction (by others) Available in five standard lengths or special lengths, all solid surface wash troughs are supplied with an unslotted flush grated waste fitting.

Sizes

Both splashback and taplanding models are available in standard lengths: 600 mm, 1200 mm, 1500 mm, 1800 mm and 2400 mm. Special order lengths can be supplied up to 2400 mm.

Options

- ▲ Special colours
- ▲ "Non-Touch" sensor spouts and taps
- ▲ Mechanical taps
