# Manual Operation Flip Top Tills

# Manual Operation Flip Top Tills

## Introduction

Safetell Manual Operation Flip Top Tills have a robust steel and stainless steel construction and external security key lock, to secure cash within.

When unlocked for operation the till is opened by a button press. Inside the exterior till casing is a locking removable cash box. The lid of the cash box is opened as the exterior till lid opens.

These tills are manufactured to a rugged high quality design for heavy commercial use.

No electrical connection is required.

This product is typically available for quick despatch, and can be self-installed or installed by Safetell technicians nationwide across the U.K.
