

THE EDEN PROJECT

www.acobd.co.uk

THE PROJECT

The Eden Project is one of Cornwall's top tourist attractions and features two large Biomes that house a large variety of plants from all over the world. It welcomes around one million visitors each year and its Visitor Centre toilets are in constant use during the day.

THE BRIEF

ACO Building Drainage was asked to provide contractor Cornwall Safety Flooring with a functional, easy to install and aesthetically pleasing channel drainage solution for the refurbishment of the Visitor Centre toilets. The refurbishment work – including the installation of new drainage - had to be carried out at night to minimise disruption.

THE SOLUTION

ACO Building Drainage specified 28.5 metres of Modular 125 Stainless Steel Linear Drainage System – its most popular channel system, and slip resistant Quadrato grating.

David Hutchings, Operations Director at Cornwall Safety Flooring, comments: *“The products from ACO Building Drainage were fast and simple to install, and were ideally suited for use alongside the safety flooring we specified.”*

“The facilities previously had slot drainage, which was difficult to clean. However, we were able to weld the vinyl on the new safety flooring straight to the inlet channels on the ACO products to give a sealed system, meaning there's no dirt trap. The flooring and drainage is now more practical and much easier to clean.”

ACO. The future of drainage

DRAINAGE FOR SPORT & LEISURE APPLICATIONS

Whether you require drainage for pool and shower areas, high capacity drainage for sports grounds or rainwater outlets for leisure centre buildings, ACO Building Drainage can design and manufacture high performance drainage systems to suit your needs.

Our products offer market-leading performance with regard to corrosion resistance, durability and, when appropriate, hygiene. Our in-house design team also provides expert technical support at every stage of your project.

We provide drainage for a wide range of applications within the sports and leisure sector including: swimming pools; sports grounds; major sports stadia; leisure centres; visitor centres, and parks.

IN WHICH SECTORS DO WE OPERATE?

ACO Building Drainage specialises in the development and manufacture of high performance drainage systems for a wide range of sectors

Food Processing

Commercial kitchens

Hotels

Infrastructure

Commercial & Industrial

Healthcare

Education

Sport & Leisure

Residential
