Special Features

- ▲ HBN 00-10 PART C SANITARY ASSEMBLIES
- ▲ HYGIENIC EASY CLEAN DESIGN
- ▲ COMPLETE WITH LEVER MIXER TAP WITH COPPER TAILS
- ▲ FREE STANDING OR WALL MOUNTED

Description

The hospital pattern (HBN 00-10 Part C Sanitary Assemblies (previously HTM64 Sanitary Assemblies (2006) janitorial unit is ideal for installing in Medical and Hospital facilities including cleaners rooms, workshops and kitchens. The janitorial unit is a combined bucket sink with removable grating and hand wash basin. For ease of cleaning and hygiene the bucket grating is easily removed and when not in use can be stored vertically on the front or side of the bucket sink.

The unit is supplied with a lever operated monobloc mixer tap with copper tails, swivel spout for directing water into the basin or sink and four stainless steel support legs with adjustable feet.

The janitorial unit can be free standing or wall mounted using the concealed bracket supplied and utilising the front legs only for support. This arrangement offers ease of installation where existing surface mounted pipework etc. is present.

Construction

The janitorial unit is manufactured from 1.2mm thick grade 304 stainless steel with all exposed surfaces polished to a satin finish. A removable bucket grating and a lever operated monobloc mixer tap with copper tails, swivel spout are provided.

The unit is supplied with a waste kit comprising two unslotted waste fittings, a removable plug for the basin, a standpipe / overflow tube for the sink and interconnecting pipework, four stainless steel support legs with adjustable feet and a concealed wall mounting bracket.
