- ▲ HEAVY DUTY CONSTRUCTION
- ▲ SUPPORTS LOADS UP TO 500 KG
- ▲ FOLDS AWAY WHEN NOT IN USE
- ▲ AUTOMATIC SWING-DOWN LEGS
- ▲ ADJUSTABLE FEET

Description

The Bariatric folding shower seat is designed to aid washing, bathing and showering and can be supplied in either a left hand or right hand format. The large seat, heavy duty frame and swing-down legs with adjustable feet ensure a stable platform which will support loads of up to 500 KG. The unit is coloured white and has an antibacterial coating. When not in use the shower seat can be easily folded up against the wall and locked into the upright position. Very little effort is required to pull the seat down from the wall and the legs automatically swing down as the seat is lowered to the horizontal position.

Construction

The Bariatric folding shower seat is manufactured with a one piece 10 mm thick high pressure laminate seat with phenolic resin core, integral drainage slots, finished in white with an antibacterial coating. The frame and swing-down legs are in heavy duty steel tube with a white vinyl antibacterial and warm to the touch coating. Adjustable feet are fitted to the three support legs. The hinge bracket and wall mounting flanges are manufactured from 3 mm thick stainless steel. The folding shower seat is constructed to support loads of up to 500 KG.

Safety Warning

Shower seats are no stronger than the wall fixings and walls to which they are attached and must be firmly secured in order to support the loads for which they are intended. Consult and comply with local building regulations and standards. The unit will support static loads of up to 500 KG when properly installed and used. To avoid potential seat malfunction or potential injury, DO NOT use seat if weight exceeds 500 KG or if the shower seat is not adequately secured to the wall.

Options

- ▲ Left Hand seat
- ▲ Right Hand seat
