

SecureLine® Doors (SR1 - SR4)

The Fendor SecureLine® Door range encompasses glazed and non-glazed doors to provide for almost every requirement. The range includes SecureLine® SR4 doors with large viewing panels. All Fendor doors are precision engineered and designed to withstand experienced attempts at forced entry.

Reinforced and made of robust steel construction, SecureLine® doors are tested by BRE's (Building Research Establishment) Loss Prevention Certification Board (LPCB) to LPS 1175 Rating 4. This gruelling standard involves repeated attack on various parts of the system including locks, hinges and door plates and involves a range of tools including power tools.

SecureLine® doors can be manufactured with an SR4 rated vision panel as well as a range of locking systems. The SecureLine® door range can be adapted to provide for resistance against high blast pressure, ballistic and fire as well as with toxic seals and acoustic rated performance.

In particular, the Fendor SR4 door system is designed to meet the requirements of high security applications including public utilities installations, public buildings, embassies, secure vaults, museums, retail, military and jewellers.

Quick View	
Product	SecureLine® single and double door sets, including SR4 approved hardware and vision panels
Application	Approved for use in utility and public buildings, vaults, museums, retail and comparable applications
Fire Rating	To meet current British and European Standards
Warranty	Warranty of up to 25 years (deliberate damage excluded)
Quality	Designed, manufactured and installed in accordance with ISO 9001 (certificate available)

SecureLine® Blast Rated Door Set

Glazed SecureLine® Single Door and Facade

Glazed SecureLine® Double Door Set

SecureLine® Doors Features

Standard features

- Double and Single Leaf outward opening doorsets
