

## The AUTOPA Hinged Parking Post

The original hinged parking post; patented in 1959, and still the preferred choice for the protection of individual parking spaces throughout Britain.

The extremely durable and reliable design of the parking post ensures your parking space will always be available. The reflective, high visibility band ensures your parking post will always be seen.

The AUTOPA parking post is unlocked by pressing down on the cap and rotating the key (Supplied with 2 keys). The post is then fully raised or lowered and relocked.

The Master Suited version comprises of random locks which can all be operated by one master key.

## Product details

750mm x 203mm x 102mm (h x w x l)  
64mm diameter tube  
110mm minimum vehicle clearance  
Plastic cap

## Installation & use

Each post requires bolting down to a suitable concrete surface (not less than 300mm<sup>3</sup>) by means of two 16mm anchor bolts. The area surrounding the installation must be flat and level with no nearby surface irregularities or gradient changes. Care must be taken to ensure the circular base recess is kept clear of concrete and any other debris during installation and use. This product is guaranteed for 12 months (*if installed and used correctly*).
