

### The AUTOPA Speed Ramp 50

The AUTOPA Speed Ramp 75 is designed to slow traffic to approximately 5mph. The high visibility combination of black and yellow sections with white reflectors ensure that the ramp can be seen in all weather conditions. Manufactured from heavy duty recycled PVC, these ramps are suitable for all vehicles, including HGV's with pneumatic tyres up to 44 tonnes.

Fully modular, AUTOPA's speed ramps are made up of a variety of sections (each sold separately), allowing any length of speed ramp to be created as required. All shoulders and inners are available in black or yellow; use the chart below to determine the correct number of each required for your site.

### Options

Order Code	Description	Weight
138 106 050	Shoulder Section (Yellow)	3.2kg
138 106 055	Shoulder Section (Black)	3.2kg
138 106 060	Inner Section (Yellow)	13.0kg
138 106 065	Inner Section (Black)	13.0kg

### Component Quantities

Ramp Length	2.0m	2.5m	3.0m	3.5m	4.0m	4.5m	5.0m
Shoulders	2	2	2	2	2	2	2
Inners	3	4	5	6	7	8	9

### Product details

75mm above ground  
 420mm wide  
 Inner Section: 500mm long  
 Shoulder Section: 210mm long

### Installation & use

All bolts, fixings and reflectors are included with the ramp segments (bolts provided are suitable for fixing to a concrete surface of at least 100mm thick). Due to variable vehicle specifications some 'grounding' may occasionally occur. In order to minimise 'grounding' ensure the area surrounding the ramps is flat and level with no nearby surface irregularities or gradient changes. This product is guaranteed for 12 months (if installed and used correctly).
